Thread: [\[Beginner TUT\] Get direct link from image shack with out an account \[Beginner TUT\]](#)

ToXiiC - November 26, 2011, 10:33 pm

Use google chrome, its the best.

Step 1:

Upload your picture at <http://imageshack.us/>

Step 2:

On the box for the direct link that is faded out, Right click > Inspect Element.

Step 3:

In the Inspect Element window it should have a line of HTML highlighted, just find were it says Value="http://img.imageshack.us/lksjflkjsjl.png" in the highlighted HTML and copy and paste it.

Very simple like I said in the title but what ever. ?

Onetwo - November 26, 2011, 10:40 pm

Or just use one of the other 1000 image hosting sites.

Rock3r™ - November 26, 2011, 10:49 pm

Or right click the image and select copy image url.

Ha5ular - November 26, 2011, 11:41 pm

I didn't know this, thank you very much.

x-x - November 27, 2011, 1:15 am

:D just upload more then 1 at a time and u will see a box of direct links on the bottom right cornor

Haha :P

Think this will work too.
