Thread: [A chance to hack the KKK's \(unofficial\) site!](#)

rubydacherry - November 27, 2011, 10:41 am

<http://kukluxklan.bz/support/lib/exe/mediamanager.php>

Googogogogogo. Do what you want :P.

tracker1098 - November 27, 2011, 10:43 am

deface??if so let me know plz:D looks good

JezGaming - November 27, 2011, 10:48 am

"The uploaded content did not match the .gif file extension." well.... i cant deface XD

Kiobe - November 27, 2011, 10:51 am

Yeah, I got the same problem as JezGaming.

Keep trying. You'll get some publicity if you do this.

Vasko1223 - November 27, 2011, 11:04 am

I uploaded it but I can't have open the c100.php Tried LiveHTTP headers...

HeXagone - November 27, 2011, 2:27 pm

the website contain a virus !!

hope that help you to deface lol

Cicada - November 27, 2011, 3:04 pm

isnt that site worth a nice amount of points on rank my hack?

if only i wasnt noob lawl

SayWoot? - November 27, 2011, 3:08 pm

MSE just found 3 backdoors on that site !

purplegreen - November 27, 2011, 5:42 pm

(Nov 27, 2011 04:08 PM)SayWoot? Wrote: [\[CITE\]](#) MSE just found 3 backdoors on that site !

It was the shell, and it is harmless. Trust me, MSE found three backdoors for me but it is really nothing at all. :)

Anyways, I can't wait until somebody hacks this website. The KKK was like the Westboro Baptist Church, and unofficial or not, I'll get my fair share of lulz when the site gets defaced.

Best Teemo NA - November 27, 2011, 6:19 pm

They are allowed to have their views and express them freely so just leave it alone damn..

iDuL - November 27, 2011, 7:11 pm

Somebody should def fuck with these idiots.

RedDot_-TCPS - November 27, 2011, 9:49 pm

shit i,m up for fucking with the KKK hitme up

_DeNy - November 28, 2011, 10:21 am

Well I found out how to create PHP files... Not sure where to go from there though.

blackperuvian - November 28, 2011, 10:25 am

<http://www.virustotal.com/file-scan/report.html?id=5af71ce825524db0f91eb8d2bc36930142451205c0b1ad78d5d8d338ece3553a-1322504265>

HaxOr? - November 28, 2011, 10:26 am

Even if you upload .php file it will download automatically ...Do no point of trying.

_DeNy - November 28, 2011, 10:53 am

(Nov 28, 2011 11:26 AM)?? ? x O r ? Wrote: [\[CITE\]](#) Even if you upload .php file it will download automatically ...Do no point of trying.

Then we have to find out how to access them directly instead of through the script they have.

ownking123 - November 28, 2011, 10:55 am

So, I know this is hackforums... But what are we doing here? And whats an sql injection... Cause if its something you download then surely you just do that ^^ I haven't got a clue what to do here, so don't hate on me heheheh :D I wanna be a great Haxor tho :D

_DeNy - November 28, 2011, 10:58 am

An SQLi won't do anything here. If you don't know what's going on, do a bit of research. That's what I do.
