Thread: [MeTuS Delphi 2.8](#)

**Salvage** - December 2, 2009, 9:25 pm

Hi, can someone pm me or post a metus delphi download link for me please? The download links around HF threads for MeTuS delphi, when I try them, some dont extract and I get errors. Kindly appreciated, thankyou.

thats your fault. dont you think this would have been brought up before? try turning off your AV. look at brent's thread on booters, best there is.
