Thread: [\[Tutorial\] Basic Spreading Guide \[Detailed\] \[Pictured\] \[Part 2\]](#)

Wre@ked - December 1, 2011, 6:06 pm

More Spreading Guides:

[Basic Spreading Guide \(Part 1\)](#)

Things You Will Need:

You need to make a [Hotmail](#) account

For the Hotmail account make the username something that will appeal to guys like "sexybabe23@hotmail.com"

Download [Windows Live Messenger](#)

Setting Up Your RAT And Making It FUD:

DarkComet Setup ([Here](#))

BlackShades Setup ([Here](#))

CyberGate Setup ([Here](#))

These are the main RATs if you have another use the search button to find a tutorial!

Note: Your server is going to have to be FUD for this to work!

I would recommend binding your server with a picture so when they open it they are not suspicious this can be found [here](#)

Also I would use a extension changer to make your file say .jpg or .scr this can be found [here](#)

Spreading:

Go to <http://321teenchat.com/> hit "Always Run On This Site" and make your username something sexy ;) See Below: Spoiler ([Click to View](#))

Hit connect and it will take you to the chat page

Once inside the chat just type something like "young girl looking for some fun add me on MSN syexbabe23@hotmail.com" Use your hotmail account.

You will instantly be flooded with PM's and friend requests on MSN

Do not panic take your time and talk to each of them, this gives them a feeling of connection towards you

Example Chat:

You: Hiii

Victim: Hey

You: Asl?

Victim: 34 m usa, wbu?

You: 23 f usa, wanna pic for pic?

Victim: Yeah sure send me your pic

You: send them your picture over MSN

How to send a picture In MSN:

Click on the "File" tab in your instant messaging window.

Choose "Send a Single File" and then choose the person(s) you wish to send it to.

Your slave will download your file and they will be infected this is a very basic and simple tutorial and I hope this helped all of you! If you need any help with anything RAT related shoot me a PM or post [here](#)

Excellent TUT brother!!

Keep it up!! :D :D

THS - December 1, 2011, 6:11 pm

I use this method pretty much exactly except I use www.teenchat.com. There are normally around 120+ people in the singles zone haha.

Yes either one can work, this is just a simple method helping people that do not know :) but thanks for the feedback<3

xBlackHatx - December 1, 2011, 6:17 pm

every time want to pump HQ members and threads!

np bro!<3

?Hacker™ - December 1, 2011, 6:18 pm

Just read this whole thing, This is better then chat sites since you cam and they just want to stay on there. Hope this works.

The only thing I don't like about this method is that often the people are all exactly the same really haha. Mostly 20 something and older men pretending to be young guys and shit which is pretty creepy sometimes >.> But I'd reccommend this to anyone who is just starting out. Most of the people on there are completely oblivious to what is going on, even if your file looks a bit suspect haha.

Good tut as always from Wrecked! Keep it up man basic but could also work goodjob

CRT - December 3, 2011, 9:02 am

Great tutorial mate. Keep up the good work...this should help lots of members!

Smaxx - December 3, 2011, 9:43 am

This is all good but when you get them on your RAT they're wanking! xD

badlyfar - December 3, 2011, 9:45 am

Thanks for the Guide man! Keep them up!

I'm curious as to the website, not saying it's a JDB, but why does it not have "www." infront of it?

Thanks (Because you can google this and it has www. infront, as where this doesn't)

What do you mean use your yahoo account, then you will be flooded with requests via MSN? Do we make a Yahoo account or MSN account, I dont understand, thanks!

Thanks for that I meant to say use your Hotmail account and I just fixed it :)

Thanks!

EpiGamer - December 14, 2011, 8:15 am

When I try this MSN 50% of the time blocks the file, and those who do receive it can't seem to open it. It's weird because my friends are able to open it, why can't they? Note: I bind with a picture of a girl and crypt it

Yes, but do not worry you get flooded with people adding you. It will not take long

deadman88 - January 13, 2012, 10:34 am

thx alottt ...

'm going to try this, thanks for sharing :) is there any way i can test it out?

Wre@ked - January 13, 2012, 2:57 pm

Yes, you can test it out by spreading your RAT....

magemaniac33 - January 16, 2012, 12:44 pm

This does work, thanks! I just need to change the file since its obv. me.EXE lol

Wre@ked - January 16, 2012, 1:48 pm

Actually the .exe isn't to obvious people are stupid lol but thanks secrets ;)

magemaniac33 - January 16, 2012, 7:10 pm

It didn't work for me since the "FUD" crypter wasn't FUD and all exe's failed I could of had like 3/7 people :P

Wre@ked - January 17, 2012, 4:11 am

Ah that sucks bro. Make sure your crypter is FUD before doing this lol

Rage Against The Machine - January 17, 2012, 6:52 am

this is the method i use its pretty effective i got about 30 slaves every hr and a half

Wre@ked - January 17, 2012, 1:02 pm

Yeah its a pretty basic but yet effective method :)

barcos - January 19, 2012, 5:04 am

Very Good method thnks!thanks for the tutorial

?h?S??C????? - January 19, 2012, 8:10 am

haha amazing tut! keep up the work

mmeehh

Wre@ked - February 1, 2012, 8:40 am

Glad you both liked the tutorial I hope it helps you.

Alpharius Omegon - May 10, 2012, 9:57 am

Sad face, i can't do anything right now, got no FUD Crypter... And i don't even know if my RAT is working.. ?

Wre@ked - June 18, 2012, 8:44 am

I am back an active send me a PM if you need any help with this or any other of my tutorials :)

JumpWar - June 18, 2012, 3:00 pm

Haha been trying this ^^ the funny thing is you don't even have to go to MSN or anything just send them a downloadlink to your server ;)

Peppermint Butler - June 18, 2012, 5:20 pm

nice java drive by bro ? don't infect others on this site 321teenchat.com come on man seriously?

Wre©ked - June 19, 2012, 7:12 am

Well this guide is a bit old but it still working like a charm :)

Yoshidk - June 19, 2012, 7:53 am

This is a nice one

Thank you for sharing!

Wre©ked - June 19, 2012, 9:29 am

Sure thing I hope this helps you get many slaves :)

pleasure - August 23, 2012, 8:57 pm

does it still work if slave has antivirus running, i think it will delete the virus before it runs silently

SIM-1921032 - August 15, 2013, 5:08 pm

Nice job man you helped a lot of about speading :P

mathiash98 - January 31, 2014, 2:49 pm

Very good, but sadly there is no more MSN D:

Akhi4hacker - April 8, 2014, 10:46 pm

nice one .. but i dnt think this are work now
