Thread: [Would someone help me download a sharecash file](#)

Valto - December 3, 2011, 4:12 pm

I have been at it for a little more than an hour on \$harecash, kinda need help downloading this file or if someone would be kind enough to do it for me. Advice would be highly appreciated thank you.

Morbid Saint - December 3, 2011, 4:15 pm

Well give the link i'll see if i can downloader it via my download, if i can't i won't do more.

Valto - December 3, 2011, 4:19 pm

Well I tried sending it through pm but I'm still fairly new to this and under 10 post.

<http://sharecash.org/r/downloadpage/download.php?file=2425626>

That's the link, I tried to do it out of a favor of a friend but the survey wouldn't let me go through. So if you have any luck thanks in advance if not it's fine, I'll just tell him I couldn't.

Wow it seems that \$harecash changed all their site, my download doesn't work atm with it. I'm sorry but you will have to do it via the survey, or find someone that will download it via a better downloader or a premium account, good luck. And also please introduce yourself in the introduction section. Thanks.

zero5 - December 3, 2011, 4:26 pm

I can give it a try, downloaded my last spam file 3 days ago today.

Well I tried doing it normally for the surveys wouldn't work for some reason so it's very weird and alright well do.

Sure Zero5

zero5 - December 3, 2011, 4:44 pm

I managed to download the file. They are just as easy to bypass as they always used to be.

Here's your file:

<http://temp.betamaster.us/Ottoman+Doctor+DLC.exe>

(MD5: 92a8c0f0e2ddeaf95e37b544bc9cf0b9)

ctueddie - December 3, 2011, 4:49 pm

Nice, but for some reason I believe the exe itself is a FUD RAT/keylogger. Not the one you reuploaded zero5, but the shitcash one in general, because I doubt generators like those exist.

Edit : Either that, or it's a fake one used to make money on shitcash

Yeah you might be right. I however just downloaded it from shitcash and re-uploaded it to one of my servers. I never said I did a virusscan.

Actually if you don't mind me asking I'm curious as to what you used, and thank you alot for the download I'll pass it over to my friend now. I'll do a virus scan myself actually

I'd do a virus scan on virustotal.com, just be careful, as it could be FUD

Valto - December 3, 2011, 7:17 pm

It told me the file is clean, thank you for the website I will bookmark it

MordecaiScripts - December 3, 2011, 7:47 pm

I will have a crack at it. Ill post if i get anything.

Valto - December 4, 2011, 9:23 am

It's fine someone already helped me retrieve the file

I used a tool called Firefox and a small vuln I discovered months ago. That's basically it, won't share any details though.
