Looks pretty good, but there is too many HF vb.net themes.Spoiler ([Click to View](#)) I don't even like the Hackforums layout, IMO OMNI dropped the ball on the theme of this site, but whatever. Nothing you can do about it.

Another theme that looks just like the rest. Including mine, which you probably looked at and used code from - assuming because it has almost the exact same name as mine. Released it a while ago.

Yeah this site's theme and shit sucks ass. But it has a really good community and forums, so it kind of balances it out into a very good site overall.

What the hell are you talking about?

His

Yours[img]http://img824.imageshack.us/img824/5066/themewithcontrols.png[/img]

First of all, don't assume things. Second, where in the hell do you get the idea he copied any code from yours which you apparently want people to buy and his where his is actually well done.

Your's looks like a flat button, and is overall ugly and It looks like your just advertising your thread in hopes of getting some donations for your theme.

Spoiler [\(Click to View\)](#) Thats right, DONATIONS, because no one would actually buy that.

Meh.

I actually like it, it looks really nice. Just work on the progress bar and textbox.
