Or if is indeed C++ is not your work.

It's a VB.NET solution with a bunch of obfuscator resources. And a source file with C# code written in it. So, +1 for you.

????Chicago Bulls - December 6, 2011, 3:45 pm

yea i know because of the other countrys right?

CR33T3N - December 6, 2011, 4:53 pm

Well you can easily use VPN's or Proxys and its totally okay to spent 5min with a survey.

But seriously, if anyone can help me here I never get to unlock a survey.
I mean I try with all the recommended VPN's and use fakenamengenerator and stuff and I'm able to complete the survey, but the file just wont unlock <.<
I did thousands of surveys with different VPN's allready and allways the same shit.

UnEntitled - December 6, 2011, 5:07 pm

A scan would help credibility, you know.

????Chicago Bulls - December 7, 2011, 4:55 pm

oh yes, i forgot about a vpn, get a free one , search proxpn, i heard its a great free vpn.

It's FAKE. DO NOT FILL OUT SURVEYS FOR THIS!!

(don't say I didn't tell you...)

Brizzbane - December 14, 2011, 5:02 am

^--i guess thats the reason it's pointless to make posts warning people. ...just gets them more traffic as people dont even read the post right before them.

OP has it coming to him though..gonna make him my special lil project :).
