Thread: [*\[FREE No \\$h!tCash\]\[RELEASE\]Scantime Crypter 1/44 UD\[RELEASE\]\[FREE\]*](#)

pilootman - December 6, 2011, 6:23 am

Hello Hackforums,

I'm releasing a Scantime Crypter, made by me - aka Mr.FoX

It works with RATs, keyloggers and much more, tested on darkcomet and DDoSeR.

A picture of the builder.

*EDIT

Sorry first password DID actually fail, cause I forgot 1 thing, updated now working :D

Password: kw=ujcDOnuuujti7g/XgcljAbZ/xcJ=0kwfunxnAS2CwSK4unIKJob55

Password Encrypted>HAZZ-15>BASE-64>TIGO-3FX>MEGAN-35

Have Fun ?

and don't forget, NEVER scan on virustotal!! ?

mortal - December 6, 2011, 6:31 am

thanx m going to download it :D thanx ..

androdox - December 6, 2011, 7:20 am

I don't get it, I can't decrypt the password. I tried to decrypt the encrypted pass first with Reverse, which looked okay, but after a time I just go errors, cause it just showed some piece of sh** letters. Then I tried to decrypt the thing at first with HAZZ-15, which looked instantly like a piece of cr*p.

Can you send me the direct password, please? :I

Sorry, first password went wrong, this one works 100%

Password: kw=ujcDOnuuujti7g/XgcljAbZ/xcJ=0kwfunxnAS2CwSK4unIKJob55

Decrypt it this way: MEGAN-35>TIGO-3FX>BASE-64>HAZZ-15

Have Fun ?

androdox - December 6, 2011, 7:33 am

so, first decrypt megan-35 or hazz-15? xD

Wayne, I try it out. Thanks

Haha. From where do you have the 0/44? I just know vscan.novirusthanks.org and virustotal.com, which I don't use.

What do you used for the X/44 result?

Dude this looks awesome still UD by most commercial AV's i just had a quick question about the use of your crypter with DarkComet v4.2F..I used the crypter and infected a VMware copy of win7 and it works great and all but once the machine is restarted the connection to my client is lost..this does not happen when I infect that same win7 with an unencrypted version of the same server..could you give me some advice? i tried both turning on the Module start up and leaving it alone and still no luck! appreciate the work and any advice you or the guys here can throw at me!

johnnybgood - December 6, 2011, 4:54 pm

Decrypted i will try it now. Hope its not backdoored....

Thanks anyway I created a sever, darkcomet 4.0 fix 1 and crypted but output is file with that "no icon file". Its probably not exe... Am I doing something wrong? "/"

When you press crypt and the dialog shows, you need to put .exe at the back of the filename ?

Chemar - December 7, 2011, 3:58 am

Does your crypter need any Net farmework version ? because when i save the crypted server i can't find it , i find only an application with no EXE extention . so i don't really understand what's going .

thank you bro and great work any way .

You need to put manually .exe on the end. He said that.

I hope its working with dc 4.0fix 1 I cant get slaves yet :)

It's not a virus ???

I bet it is because you don't got netframework installed on it.

If you don't trust it why bother anyways? ?

gaschi - December 7, 2011, 11:28 am

Ok i test it again , wait for my feedback , when it work ~ sorry bro ;) Ok its work , buts now 2/43!

Updated scan!!

Damn Kaspersky..

<http://synfyre.net/scan/8bc40991b736980074e454cd67cf8587>

BTW the keylogger disappears from the toolbar after about a minute.. And even if I run the unencrypted one too .. So its not the ctypters fault. :D Never mind , I will figure that out :D

GREAT JOB , keep it up !!! :D

Chemar - December 7, 2011, 5:16 pm

Not working on Dark comet 4.0 it's corrupting the server and CMD window pops up

any way nice work bro and good luck.

Thanks ?

Hope you guys enjoyed it ?

I'm going to sleep now, so good night and happy new year! ?

Subzero_X - January 1, 2012, 10:24 pm

It's not FUD. :(

5/9 detected. :(PWEEZ MAKE IT FUD AGAIN

Lolwow1 - January 2, 2012, 2:34 am

This is no longer FUD :c.

I know man, but I can't reFUD it.. and it's scantime..

that means if the victim runs it, virus scanner will detect it ?

ngit01 - January 2, 2012, 5:26 am

your palnning to refud again bro?

.

I'm trying to make a complete new crypter, which is runtime & scantime.

Still figuring out how to make it FUD, since I already spent 4 days on it with no further results.

Have nice day ?

aaronhance - January 2, 2012, 10:33 pm

I decrypted the pass M*.*.*.* then I got a runtime error :(

We should let this thread die now, cause I don't got any FUD/UD crypters ?

It's detected like 30/44 now.

Nah, I stopped making them..

Also stopped with botnets ?

Rebellion. - January 3, 2012, 4:07 am

Thanx mate decrypted it successfully !! :) ...Very easy to decrypt.

iAmEvo - January 4, 2012, 2:42 pm

im am having a hard time decrypting tryed everything still no luck. help

mbf - January 27, 2012, 12:28 am

I was actually able to decrypt this, I feel proud! But unfortunately the crypter didn't improve/hide my program's infections. Oh well!

NoClip - January 27, 2012, 2:43 am

Thank you crypter work perfectly, and thanks again for not putting spam link.
Keep it up!

Serial Menace™ - January 27, 2012, 2:10 pm

Whats the password please idk how to Decrypt I need this ASAP I have no time to learn how to decrypt so please help PM the pass?

ripesz - January 27, 2012, 2:28 pm

link isnt working bro, it just reloads try diff server

Serial Menace™ - January 27, 2012, 2:39 pm

This crypter didnt work with my DC server. tried it 3 times on <http://vscan.novirusthanks.org> and all my DC server setting are on default. Results>>>

Easy, old school decryption. WAY better leach protection then shitcash. Thanks, your the best man

:)

TIPS: please improve the gui, its a little sloppy ;)
