PyScHo.HacKer - December 7, 2011, 2:03 am

Hey All, Yes its possible to hack any facebook accounts with facebook

So lets start

Requirements

- 1) A target would have to be in ur friends list
- 2) A little Brain

Ok

Now we goto the email provider website (GMAIL,HOTMAIL,AOL,YAHOO) That victim use, and we go click Forgot password.

And u see all uses Security Questions & Answer for email account recovery

Now we choose a recovery option as Security Questions

There u see many victims use like school name,at where Born,Father name,Mother name bla bla

Then we goto the victim Facebook profile and click on info, there we get plenty of use full info,

We use the usefull info we need that to recover the Email accounts and Hack Facebook

This Trick almost work 60%

You can try this same trick to hack any email accounts too :)

Have fun, Happy hacking ??

Thanks for informations. But there are some things i don't understand. When I choose, "forget password" on hotmail web site, the question is not here anymore...

I have to find the pass of a friend, he waste so much time on facebook, he don't listen to me when I say Facebook is not a sure media.

Thanks for reading, and sorry for my bad english.

typical of lamers

pandemikkk - December 27, 2011, 6:55 pm

low quality post!!! after >1000 i expect better

G0ku7 - December 27, 2011, 7:42 pm

Not a low quality post at all..

Maybe the easiest method of taking over fb acc's
who are not that comfortable with Keyloggers,Rats.

Most of the time chatting with other people when u ask a random question they wont even know

the only downside is if they have a different answer for the security question.

now a days it does not work hahahahhahahhahahhahahhahahhahahhahahhahahha
