It's a 40 minute video on how to set up a IRC botnet, it take like 5, and is this video yours?

xLucidx - December 8, 2011, 2:53 am

This video is mine i state my name inside the video :)

3xploit.c - December 8, 2011, 3:34 am

40 minutes! video

Lol you can Code a botnet in that much time

xLucidx - December 8, 2011, 3:56 pm

You cannot setup an irc botnet in 5 minutes. How about you do it and get back to me. Time yourself :)

Yeah i recommend buying a cheap offshore vps or dedi if you want to host a botnet :P

Don't buy from santrex because they will fuck with you, saying your over your badwidth when your not. They have bad customer reviews, there cheap because they suck.

A botnet server? What the fuck are you talking about?

It is too hard to call it IRC server?

It's a irc server, and it's a botnet.. There for I shall call it a botnet server ?

Click here and see what a botnet is:

Code <http://www.watchguard.com/education/video/play.asp?vid=botnets1> Because an irc server is a irc server. If you went to someone and said set me up an irc server they will do just that, and there will be no bot added on to it. So you need to specify what KIND of server do you want. So, if i said to you i want a bot server... You're probably thinking there are millions of different kinds of bots out there they run malicious different code right? So you will need me to say what kind of bot... So i want a RAT server ? So, now you know not to call it an irc server.

For someone selling installs for the ddoser 3.6 client i believe in order to run the ddoser 3.6 you need windows xp am i correct? Unless you're running a linux distro my advice to you is to not comment because you are going to loose this troll.
