Tell me, what's the difference about installs, updates, and bots?
Also let's say I bought 2000 "Installs" of you, how long would they last?
I remember buying 100 installs from someone on HackForums, they all died overnight.

I remember buying 100 installs from someone on HackForums, they all died overnight. Maybe he bot killed them, or someone who he sold them to bot killed the installs.

Updates are when someone gives their bot to someone else, its like they override their virus that they gave with your virus.

Do you have any kind of guarantee that I won't lose my bots the day after I bought them?

I'm not to waste money on 2K bots if I lose them the day after, or two weeks after for that matter.

Cerebro - December 8, 2011, 11:50 am

Might be able to buy 500. My PP is limited however I can get onto the send page.

I'm running linux so before I do, I would like some test installs.
