?K47 - February 23, 2012, 3:59 am

Lmao good luck loading this into most crackers guarantee 99% of cracker cannot handle this large of a file and will just crash. Right on for sharin tho someone could break this up into smaller multiple pass lists

Mangox - February 23, 2012, 3:59 am

Please send me this method wana try :) thanks

IDrinkMooMooMilk - February 23, 2012, 4:00 am

I don't agree with this 'the best for cracking'

It's much, much better to use a giant usernamelist and a smallpassword list wich contains like 20 obvious passwords example:

123456
654321
12345
etc...

CyVi2011 - May 15, 2012, 10:24 pm

May U send me the link of the word list??

(May 15, 2012 12:28 PM)iRBAWS Wrote: [\[CITE\]](#) Hey!

How did you compress it so good?

Sending a PM!

My dear friend!

It's not as hard as you think!

because there's all a limited number of characters the compressor program will use a dictionary

instead of the words & so it compresses the file because lots of this letters are same!

for example:

123
1234
12345
123456

.
.
.
.
.

then :

123 = a
4 = b
5 = c

& there we have:

a
ab
abc
abc6

as u see the number of the characters will decrease & so the size!

?????
