Thread: [MITM Attack : Virus attack on Citibank Transactions](#)

Iviha595 - December 11, 2011, 10:30 pm

Intersting

I have developed a Proof-of-concept malware almost a year back. I have decided to release this video for public on how an attacker can perform Man in Middle on Citibank India. Instead of posting source code or binary file here (where Blackhat hackers may misuse), I am posting a recorded video for consumers to be aware of these types of attacks. When a consumer transfers fund to A, malware modifies the transaction to make sure it goes to B in real-time without user knowledge.

<http://www.yashks.com/2011/12/virus-attack-on-citibank-transactions/>

Regards,
Viha

hEy I'm not a black hat, can you send me the source code? ^_^

blackperuvian - December 11, 2011, 10:42 pm

I know better ways but cool method...

I will code a better one
