Wre@ked - December 13, 2011, 4:57 pm

Setting Up CyberGate v 1.07.5

Tutorial by: [Wre@ked](#)

CyberGate 1.07.5 can be downloaded: [HERE](#)

Note: I do not take credit for the download link

Index:

Setting Up a No-IP

Setting Up DUC

Setting Up CyberGate

Extras

Setting Up a No-IP:

1. First go to <http://www.no-ip.com/> and register, if you already have an account login.

2. Once inside your account hit "Add Host"

3. This is where you will create your host name. Look at the picture below and hit "Create Host" when finished.

Note: where it says "YOURHOSTNAME" that can be anything!

Setting Up DUC (Client):

1. Download DUC [here](#)

2. The installation should be self explanatory. Once finished downloading open the program and login using your information.

3. Select where it says "Select Hosts"

4. Inside of "Select Host" you will see your host name click next to it in the check box then hit "Save"

5. We are finished with DUC you can close out of it and it will remain open in the taskbar

Setting Up CyberGate 1.07.5:

1. Open up CyberGate and hit Control Center --> START --> Options --> Select listening ports

2. For this tutorial I will be using port 1607 but you can use any port you wish.

Note: Use the settings I have in the image above they are not required but suggested.

3. Now click Control Center --> Builder --> Create Server

4. Hit new then name it settings1 then hit OK. Click on settings1 and hit forward

5. Now we are in the connections tab first click where it says 127.0.0.1 999 and hit delete

6. Now hit add and put in your no-ip host name followed by : then the port example: yournoip.no-ip.info:1607. The identification will be the slaves name and the password can be anything!

7. Now move on to the "Installation" tab

8. Use the settings I use in the image above!

9. Skip over to the "Anti-Debug" tab check everything except Sandboxie so you can test the server on yourself

10. The final tab is "Create Server"

11. Use the same settings I have above and hit "Create Server"

12. You have successfully set your RAT up now all you must do is Port Forward a guide can be found here: [Wrecked's Port Forwarding Guide](#)

Extras:

1. Once your server is crypted you can start spreading your server and get slaves!

Q: How can I crypt my server?

A: A crypter can be purchased [HERE](#) try to find a free one [HERE](#) or asked for [HERE](#)

2. Once your server is crypted here are some spreading guides that can come in handy:

[Wrecked's Basic Spreading Guide \[Part 1\]](#)
[Wrecked's Basic Spreading Guide \[Part 2\]](#)
[How to Make a FUD Java Drive By](#)

Also using the [SEARCH](#) button can find you many other guides and tutorial

Thanks For Reading My Tutorial Please Comment To Keep The Thread Alive!

SatanTheGod - December 13, 2011, 5:10 pm

Nice tutorial!

+1 and how long did this take?

Wre@ked - December 13, 2011, 5:11 pm

Thanks for the feedback man planning on making more like this :)

Gerges - December 14, 2011, 12:26 pm

Thanks for the tut really help me get things up.

Great tut, detailed and full of pictures.

Wre@ked - December 14, 2011, 1:42 pm

(Dec 14, 2011 01:26 PM)Gerges Wrote: [\[CITE\]](#) Thanks for the tut really help me get things up.
Great tut, detailed and full of pictures.
Glad you liked it and glad I could help :)

striker26591 - December 18, 2011, 9:41 pm

Helped me a lot for a starter! Great work bro!

JOW - December 18, 2011, 9:49 pm

Cool man god tutorial I will bookmark this for future reference ;)

Roofiezz - December 18, 2011, 11:12 pm

Nice work mate, Few of these probably one of the best of them! ;)

Wre@ked - December 19, 2011, 6:44 am

Thanks guys means a lot to hear positive feedback!

Makaveli - December 19, 2011, 1:10 pm

Hate to sound like an idiot, but whats my hostname?

EDIT:Whoops, just read the note under the photo;)

haha its okay man hope this tutorial helps you with CG!

DsntExist - December 20, 2011, 3:51 pm

I'm going to try this right now, man I'm really hoping your port forwarding article works for me.

Janitor - December 20, 2011, 3:59 pm

Hey thanks man gna try it now I've never ratted before but my friend makes so much money doing it thanks!

Wre@ked - December 20, 2011, 4:07 pm

Hope this tutorial works and helps both of you beginning Ratting:)

DsntExist - December 20, 2011, 5:07 pm

Damn, I set up the Cybergate Rat exactly how you said I should but the port forwarding is holding me back.

What could I have done wrong? I checked the port on www.canyouseeme.org and I keep getting "Error: I could not see your service on 108.213.88.199 on port (1607)
Reason: Connection timed out"

And then it continues to say most residential Ip's block ports. This might be wrong but I've seen a tutorial specifically dedicated towards port forwarding for an At&t uverse modem. (Which I have myself, and unfortunately that tutorial wasn't the best of help either) Is it the Uverse modem that could be holding me back?
Sweet mother of Serra Angel, I done it.

I successfully port forwarded now. ???

Thank you so much for this tutorial Wrecked. So the next step is Crypting right?

Wre@ked - December 22, 2011, 7:07 pm

ATOMIC - December 29, 2011, 9:26 am

Thanks! Great tutorial. Great work!

Wre@ked - January 2, 2012, 8:19 am

Thanks for the feedback I am glad you liked the tutorial!

EazyZ - January 2, 2012, 5:25 pm

Great, I've been wondering how to get this started for a while and thought I would try and finally check out some tutorials and this is turned out to be great, thanks for the help!

Wre@ked - January 7, 2012, 1:57 pm

Glad this helped you get started in RATTING. Good luck!

emjay78 - January 7, 2012, 10:28 pm

Hi...followed all the setting when i tried in my own laptop it is successful but when i tried to infect my other laptop..and try to run the server error message "the program can't start because mozsqlite3.dll is missing from your computer, try reinstalling the program to fix the problem"

What went wrong..?

Wre@ked - January 8, 2012, 4:50 pm

Try doing as it says try to re-install the program. I hope this helps let me know if it does not.

emjay78 - January 8, 2012, 6:18 pm

What program do i need to reinstall..? You mean i will create another server..?

Wre@ked - January 9, 2012, 4:04 am

No, I mean delete and then re-install cybergate. Let me know

SIM-947411 - January 9, 2012, 5:54 am

Thanks for the tut really help me get things up.

Great tut, detailed and full of pictures.

Wre@ked - January 9, 2012, 1:26 pm

Glad you liked it and glad it helped you get started!

emjay78 - January 10, 2012, 12:17 am

(Jan 8, 2012 05:50 PM)Wre@ked Wrote: [\[CITE\]](#) Try doing as it says try to re-install the program. I hope this helps let me know if it does not.

Tried to make another server twice... test it in my netbook with localhost 127.0.0.1 its successful, but when i tried make another server pointing to my ip/dns host and infect my other PC.. still it cannot be executed same problem exist.

Could it be the problem is on my other pc..? or its the server..?

BTW: the problem is not when i open the cybergate... its when i executed the server...

Wre@ked - January 11, 2012, 2:38 pm

Wait could you restate the question? Hopefully you have figured it out :)

Kuaza - January 11, 2012, 6:31 pm

Thanks, helped me a bunch :)
extra text because

United States of America - January 11, 2012, 8:17 pm

I know I'm late, but nice tutorial Wrecked. Keep it up;)

Wre@ked - January 15, 2012, 4:41 pm

Thanks guys glad you both liked the tutorial :)

razorx009 - January 16, 2012, 9:04 pm

Hey..Recently I had Formatted my whole PC.. Now i want to get Started .. I already Had a lot of Victims. But they don't seem to Come Up.. Please Help : (

Wre@ked - January 19, 2012, 4:08 am

Just use the name no-ip name and same ports and they should come up.

Whizkas - January 19, 2012, 5:40 am

Helped me alot :) See many tutorials but this one is absolute understandable.

System.out.println - January 19, 2012, 12:25 pm

Thnx dude, best tutorial I ever saw and used ;)

Wre@ked - January 19, 2012, 12:45 pm

Glad you both really liked it! I hope it helps!

?Darky - January 20, 2012, 10:26 am

When i crypt my cybergate rat It dont work anymore when i dont crypt it wurks

Teamviewer pl0x?

Wre@ked - January 20, 2012, 12:57 pm

The reason is because your crypter is corrupting your server. What crypter are you using?

Burn™ - January 22, 2012, 5:36 pm

Amazing tutorial! This will help so much people!

Wre@ked - January 23, 2012, 4:13 am

Glad you liked it bro. I hope it will help many members :)

The freak351 - January 23, 2012, 12:10 pm

Awesome :) Nice Tut
Grtz From Belgium

Wre@ked - January 26, 2012, 4:31 pm

Glad you like it bro I hope it helps you with CG

St0l3 - January 27, 2012, 1:23 pm

Does it need to forward port like on darkcomet v5 ?

Wre@ked - January 27, 2012, 1:56 pm

Yes you will have to port forward 1 port like DarkComet

LiquidDevil - January 28, 2012, 2:44 am

Greate Tutorial Thank you : p
This helped me sure

Wre@ked - January 28, 2012, 4:58 am

Glad this helped bro! Hope this helps you with CG!

uglykidjoes - January 28, 2012, 10:53 am

download link is down can you re up please

nepgax4o - January 28, 2012, 11:58 am

(Jan 28, 2012 11:53 AM)uglykidjoes Wrote: [\[CITE\]](#) download link is down can you re up pleaseHere you are ;)

<http://www.mediafire.com/?bm6a5hiy86h75k4>

Wre@ked - January 29, 2012, 5:51 am

Hopefully that is a safe download link I do not take any responsibility if it is not.

Hesco - January 29, 2012, 6:09 am

Cybergate is working with proxpn anymore?!?

jeroendg - January 29, 2012, 6:39 am

very good tut , im a starter myself , got this working while i didnt get dark comet working !
Great job

Wre@ked - January 29, 2012, 7:33 am

Glad you got CG working I wish you the best of luck in the RATing field :)

Huppeldepup8900 - January 29, 2012, 11:17 am

Very good tut. But I can't get it to work. I'm trying it on myself but when I open the server it says it stopped and I can't see anything in CG.

Wre@ked - February 1, 2012, 1:37 pm

Glad you liked it. That sounds like a port forwarding issue. Check to make sure your ports are open.

USM - February 1, 2012, 7:46 pm

Missing files:

mozutils.dll
nspr4.dll
plc4.dll
mozsqlite3.dll
nssutil3.dll

Wre@ked - February 2, 2012, 4:13 am

Try re-downloading cybergate and I believe this will fix you issue :)

back door - February 2, 2012, 6:17 pm

why dont people just use plutos guide?

Wre@ked - February 3, 2012, 4:16 am

Um, because I have made a guide that has seemed to help many people. Yes his is a good tutorial but that doesn't mean I cannot make one?

bernardo1989 - February 3, 2012, 4:37 am

Very good tut ;)

,

Thank you bro!!

deadman88 - February 3, 2012, 5:36 am

yeahh this is really good guide..good for beginner..;)

Wre@ked - February 3, 2012, 5:13 pm

Glad you guys like the tutorial! Hope it help you setting up CG!

Clemencia - March 25, 2012, 5:07 am

Nice tut bro! mad respect for you..

SekKE - May 8, 2012, 10:48 am

This is one of the best tuts out there, thanks!!!

douchebag - May 9, 2012, 8:05 pm

Nice tutorial bro, It helped me. Appreciate it for creating this.

TheBavas - May 22, 2012, 9:22 am

Hey Wrecked well i use cyber gate since months now i have made every setups but then i have little slaves however much i Rat. Does the CG rat has limitency of connections?so far i have had only max 20 slaves which never crossed 20 connections and my total connections shows 100 sometimes.What might be the cause for it?Thankyou

crashcat007 - May 31, 2012, 10:13 pm

perfect tutorial,thanks for making it so easy nd simple

Wre@ked - June 1, 2012, 5:28 am

Glad everyone liked the tutorial! PM me with any questions

Akp0weR13 - June 15, 2012, 1:27 pm

Thanks alot, for some reason this is the only port that works for me.
Great tutorial btw :)

Sion - June 15, 2012, 10:25 pm

can this vpn forward ports?

i might be getting confused with [censored] idk which would you prefer personally? thanks a lot for this detailed guide. ?

Ezekieel - June 16, 2012, 2:27 am

Nice tutorial, with prictures, detailed, and more..

Thank you ;)

Wre@ked - June 18, 2012, 8:39 am

I am very glad you liked the tutorial!

capsar - June 18, 2012, 12:18 pm

he, man is it just me or doesn't that link works i can't find a working download link of cybergate D:

Wre@ked - June 19, 2012, 7:13 am

Oh the link must not be working I will look around for a working link, thanks for letting me know :)

Samkent - June 19, 2012, 8:28 am

Same here, just downloaded version 2.3.0. Is that good also?

Anyways. Very nice tutorial! *Bookmarked

Wre@ked - June 19, 2012, 9:30 am

I just updated the link with a working download :)

Mob Zombi - June 22, 2012, 12:41 am

Awesome tutorial wrecked, Keep up the good work.

?
