Thread: [\[TUT\] - Easy Spreading](#)

DragonsGoMOO - December 8, 2009, 7:32 pm

Hey everyone this is my first tutorial ?

Some people pmed me on about how i spread because i barely started and i'm doing so well that i'm going to tell you ?

::: Fake Video :::

Posting a video of a hack/crack on youtube!

[IMG][http://i47.\[censored\].com/24nhg86.png](http://i47.[censored].com/24nhg86.png)[/IMG]

1. Download firefox:

<http://www.mozilla.com/products/download.html?product=firefox-3.5.5&os=win&lang=en-US>

2. Firefox plugin (youtube video downloader): <https://addons.mozilla.org/en-US/firefox/addon/13990>

3. Find a youtube video thats fairly old with high views (i prefer games/cracks like Combat Arms, COD6, Windows 7 keygen, Steam Crack)

4. After you download the video you may or may not want to edit it, it shouldn't be hard to figure out that part.

5. Upload your fake video and be sure to use good keywords and post TONS of video responses.
~DONE~

::: Garena Spamming :::

Find out what they want and then spam it!!!!

[IMG][http://i49.\[censored\].com/eg37r9.png](http://i49.[censored].com/eg37r9.png)[/IMG]

1. Download Garena and make an account: <http://www.garena.com/>

2. Login to Garena ?

3. Find a chatroom that has a couple of english speaking people ?

4. Wait until someone says anybody have "blank blank" for example (where can i get mw2 multiplayer)

5. That's when you login rename your server asap upload it and spam.

I did this today just for this small tutorial and i got 6 paypal accounts and 30+ people on my cerberus server.

Note: All the downloads that are on my videos and that i spam are not scantime or runtime.. i just generate it and let noobies download it. I only crypt files when i post warez ?

0xebfe - December 8, 2009, 7:36 pm

now THATS why my computer is so slow after i downloaded all those aimbots...hmmm lol

Ziore - December 8, 2009, 7:36 pm

Very good tutorial, thanks you!

Lets start spreading :D

Codeine - December 8, 2009, 7:37 pm

wow very nice tut there, ya youtube is a great low effort spreading method

r4pidkillz - December 8, 2009, 8:01 pm

Awesome! Glad I found this. I've been asking around how I should go about spreading. Thank you.

Mendacious - December 8, 2009, 11:14 pm

Grimm, I PM'd you but you never responded.

Could you answer this question?

Is your cereberus server FUD and who/what crypter you used?

Zeon - December 8, 2009, 11:16 pm

Nice tutorial, yeah youtube is my favourite method. I also use Triond for this type of stuff.

I explained in the tutorial that i dont use any crypter for my server ?

if you need help add me on msn: dtownfresh@live.com

imAcarrot - December 9, 2009, 5:32 am

nice tut. i think youtube is the most effective spreading method!

Anubis - December 9, 2009, 5:36 am

nice tricks and tips...thanX

eneakume - December 9, 2009, 5:50 am

Copied my Garena idea :D

DragonsGoMOO - December 10, 2009, 1:50 am

Here is another update =P

If i said no its because i have already had 10-20 people add me. ?

Aand i have setup cerberus for about 8 people and had to portforward for them. ?

So dont reply to my thread like that. If you catch me on msn at a good time then ill help you over teamviewer. ?

Hano - December 10, 2009, 3:00 pm

With youtube what sort of return rate/viewers do you get? Do you need quite a few views/videos to get a good number of bots or is it pretty easy?

Well just make sure the video is something people will find with the search. Dont make it something totally weird.. make it something that you would want/look for.

and make sure you get at least 5: 4 star ratings and comments, you can just tell some friends to rate and comment it for you.

And for the comments, make them approved only, dont disable comments :)

so you can just approve the questions and not the pissed off victims ?

Mr. Ocean - December 10, 2009, 6:43 pm

Grimm could you help me setup cerebus some time? PM me if you can and ill give u my msn.

Thanks! I guess that makes your video much more prominent in searches too?

Also having spammed a few videos in video responses I've realised something, you can only respond to one video with one video so can't spam one video to loads of responses as it just deletes the previous one! Your tut makes it seem like its best to spread to loads of videos with your one, or thats how I read it lol. didn't just spend an hour doing it before realising...

KaidzAccount - December 14, 2009, 8:04 pm

Awesome tutorial, and you helped me a ton over TeamView fixing my Cerberus problem, so thanks again man.

I got NOD32 by the way, like you suggested. I love it! I got my serials etc. from <http://www.NOD325.com> and I even got NOD32 installed on a second computer. I discovered (through testing) that if you get your Cerberus server to be installed while NOD32 resident shield is disabled, then your server will defy all of NOD32's attempts to clean/quarantine/delete it because it just re-copies itself instantly, if it is injected into another process such as iexplorer.exe (Internet Explorer).

Thanks for this tutorial and the help over TeamView again! grimmflow is a beast!

I'm running Windows 7 right now :) I love it. I downloaded Windows 7 Eternity, it's by like teamrocket or something :o Rockersteam? Idk. Anyway it's beastin.

Ettercap isn't working for me on it though ?

But on topic now -

Great tips, I figured just posting youtube vids of actual hacks for games just with stuff binded to it would work well, too, which is pretty much what you said xD.
