Thread: [plz plz plz](#)

mr.qduriRRRwww - December 14, 2011, 2:19 am

hi guys

can any one help me what is the best way to be a hacker?

Psyberion - December 14, 2011, 4:25 am

The best way to become a hacker is to read and try, read and try. You should also learn a programming language. There's a really good thread on this, here:

<https://hackforums.net/showthread.php?tid=1598616>

It's long, I know, but I think it'll help you a lot, so read it.

Good luck and happy hacking!

You can also refer to the link about by reading a tutorial on this too

<https://hackforums.net/showthread.php?tid=1284168>

Take you time and understand everything before you proceed to the next level.

Never hurry when you're beginning to hack. Be patient

Agreed. I was very eager to learn ALL the things when I began. So I started everywhere at the same time. Didn't turn out so well, I didn't learn that much. So focus your energy on one thing at a time.

Don't say. Plz. Plz. Plz.

You will get nothing.
