What are you having problems with?...

Gebove - December 16, 2011, 2:16 am

SPAM will take your site down and ban you for that very quickly. Admins are regularly on the lookout for this type of activity.

Darkwin - December 16, 2011, 2:16 am

Yeah i wouldnt use SPAM if i were you, they usually disable your account after a couple hours. try Myfrehost or Freehostia something like that.

whats a better site to use then?

im getting this error when i try to log in

Warning: mysql_connect() [function.mysql-connect]: Host '(ipaddresss)' is not allowed to connect to this MySQL server in /home/a7334947/public_html/index.php on line 47

You could use x10hosting, i haven't had any problems with them yet.

bomba123 - December 16, 2011, 2:28 am

try Ulmb or my3gb And i dont think you need to get Error with webhost im hosting my istealer there

Equisite - December 16, 2011, 3:19 am

Yea, I use My3gb

It is very good, and they don't look for any suspicious activity.
