TO DO:

You have to psot screenshot.
and obfuscator you use.

It is using IF THEN ELSE so,

brfalse to brtrue rofl

Too easy

g1ll1s - December 16, 2011, 11:16 am

you know that was most likely infected right?

Meerkat.? - December 16, 2011, 11:23 am

LOL this isn't even a crackme.

Like Ethernal Five said, BrFalse to BrTrue.

You can even read the correct answers in .Net reflector...

At least TRY to make it somewhat challenging. I used different encryptions, filtered out letters so you get numbers only, then multiply those numbers with something random.

Too bad it also used an if statement so it was easy to crack. Finding the correct answer would have been pretty impossible :P
