Thread: ? Infinity Crypter v4 ? 0/37 - Bypass SONAR/KIS/AVG | 32/64 BITS | Scanner | AUTO-BUY

DeMoNi - *December 18, 2011, 3:18 am*

Buy this crypter and IPKiller, and get a 5$ discount on every package ;)

Partners :
Need a powerfull, cheap and long time FUD Java Drive-By ? Take a look here :

s?hane - *December 18, 2011, 3:36 am*

Gui is Nice,
Best of luck with sales! :)

xor - *December 18, 2011, 3:38 am*

Vouch for DeMoNi , clean and friendly GUI, GLWS

DeMoNi - *December 18, 2011, 3:38 am*

(Dec 18, 2011 04:36 AM)Sh?ne Wrote: *[CITE]* Gui is Nice,
Best of luck with sales! :)
Thanks for the vouch bro, online and selling now, FUD for 3 weeks !

JPhenom - *December 18, 2011, 3:39 am*

Amazing crypter and legit owner, gl with sales.

sdq - *December 18, 2011, 3:50 am*

Are you giving out test copies?

I want to try it first.

DeMoNi - *December 18, 2011, 3:51 am*

(Dec 18, 2011 04:50 AM)sdq Wrote: *[CITE]* Are you giving out test copies?

I want to try it first.
I can give you a one hour test copy bro, shoot me a PM ;)

SIM-888979 - *December 18, 2011, 3:56 am*

Please give credits to Aeonhack for his theme.

Good luck with sales!

DeMoNi - *December 18, 2011, 4:19 am*

(Dec 18, 2011 04:56 AM)Zombot Wrote: *[CITE]* Please give credits to Aeonhack for his theme.

Good luck with sales!
Yes I will edit thread and add credits to Aeonhack and Irion :)

Invulnerability - *December 18, 2011, 4:37 am*
I will try it now and give some feedback later

NOTEPAD - *December 18, 2011, 4:42 am*
Are you giving a test copy out? if so i will buy after if i like it.

IDontNeedAUsername - *December 18, 2011, 4:43 am*
You probably won't care but there is a mistake in rule 3. It says upload upload to a virusscanning site. And in rule 2 it says unless with 1 S.

DeMoNi - *December 18, 2011, 4:51 am*
(Dec 18, 2011 05:43 AM)Dodge and Fuski Wrote: *[CITE]* You probably won't care but there is a mistake in rule 3. It says upload upload to a virusscanning site. And in rule 2 it says unless with 1 S.
Will edit it asap bro, just a small mistake :p
And btw, I no longer give out vouch copies, but I can still give you a try on Teamviewer,or a test crypt ;)

ChromiumHF - *December 18, 2011, 4:52 am*
LOL Demoni your Crypter? - Good luck with sales.

DeMoNi - *December 18, 2011, 4:54 am*
(Dec 18, 2011 05:52 AM)ChromiumHF Wrote: *[CITE]* LOL Demoni your Crypter? - Good luck with sales.
Yes my own Crypter bro, I started this project a while ago, but now finished and working ;)

sdq - *December 18, 2011, 5:05 am*
Vouch for this guy, gave me a test copy.

DeMoNi - *December 18, 2011, 6:14 am*
(Dec 18, 2011 06:05 AM)sdq Wrote: *[CITE]* Vouch for this guy, gave me a test copy.

Vouch for Demoni

Thanks for the vouch bro, enjoy the crypter ;)
Online and selling now :)

Krumpz2G - *December 19, 2011, 10:47 am*
I might actually buy this. I'm usually skeptical about crypters though so hopefully it's worth the $35. When I get money for Christmas, I plan on getting some gifts for myself and this is on the list.

DeMoNi - *December 21, 2011, 7:39 am*
Crypter is up for sales guys, FUD since 2 weeks now !!!

Amnisiac - *December 22, 2011, 2:25 pm*
vouch for DeMoNi

It is FUD since 3 days !!

Hacker-error - *December 22, 2011, 2:31 pm*
It's FUD since 3 days since YOUR purchase but it's FUD since 2 weeks now.

Great coder, great people, he helped me with TV for see that this crypter is very good. The file is FUD and my server Blackshades is not corrupted.
Moreover, he gave me some installs to test the server crypted.

HUGE VOUCH for DeMoNi.

Ordinary - *December 23, 2011, 7:58 am*
Hey DeMoNi , I need you on aim

I can't sign in since the update

aim : ImOrdinaryxD

aim me ASAP please and thank you

Great crypter still

DeMoNi - *December 24, 2011, 5:58 am*
(Dec 23, 2011 08:58 AM)Ordinary Wrote: *[CITE]* Hey DeMoNi , I need you on aim

Still selling guys :)

eeeeeesy - *March 23, 2012, 3:46 pm*
i just purchased a lifetime subscription to this crypter today. a very quick and smooth transaction while purchasing. seller answered all my questions. so far seems legit. just to be accurate i wont be posting my review on fudness just yet as i think i should play with this crypter for a little while first before i say anything about fud time or how quick updating is though, but i was assured by seller that updates are very quick within 20 minutes of detection and fudtime is about 2 weeks. i will say that i really like this scanner monitor option, i havnt seen this in any other crypters b4.

DeMoNi - *March 25, 2012, 3:57 am*

Vouch for infinity crypter and demon, always FUD and features are working perfectly

Di???c - *May 2, 2012, 11:11 am*
Vouch for this great crypter!

Easy to use, fast support and a overall fantastic crypter.
I ordered the crypter, and it only took 10 minutes from my payment, to i had the crypter on my computer ;-)
FUD + very fast REFUD.

Works flawless with DC 5.2.2.

+1

Jogger - *May 2, 2012, 11:20 am*
Vouching for this dude, he's honest and has good business practice. This is easily the best .net crypter.

The update is pro

You're just one of those idiots that assumes things.

It has 4.0 .NET Framework dependencies (Most computers have this), but it's not native. I'd expect to pay 50$ lifetime for a native basic crypter.

Add me on skype, I know why, it CAN be fixed easily on your side.

Still selling, still FUD. Final crypted file is even smaller than the file you crypt.

Scanner is working again too ^^

Lykos Thrylos - *May 6, 2012, 3:40 pm*

Ok good it's fixed :) have you got any png icon like when you send it on skype because I can't find one, thanks :D

PS: What is "assembly" ?

Coral beef - *May 6, 2012, 6:01 pm*

I just bought this, haven't been able to test this though i suspect your crypter is corrupting my files...
I had an old crypter that would corrupt my RAT and it did this also...
The thing that is worrying me is simply, the icon that i'm getting after crypting... It's just... Different to normal .exe's...:
[img]http://screensnapr.com/e/PGRV6L.jpg[/img]
And also, after i crypt the server, the crypter closes straight away.
And also, the scanner isn't working... And i fear what that guy said about startup not working...
I fear i may have just lost $35 xD
EDIT: I also keep getting this too... [img]http://screensnapr.com/e/ijp8eK.jpg[/img]
It keeps telling me 3.9.8 is out but i see no way to update despite having bought it today...
I don't see anywhere to check my current version either.

EkliooSs - *May 6, 2012, 6:08 pm*

Blackshades has a .net crypter setting button which basically makes the server with the most simple settings. All the fancy stuff is configured in the crypter.
When you crypt your server, is it the same icon as the one i'm getting?

EkliooSs - *May 6, 2012, 6:46 pm*

Kraxas - *May 7, 2012, 1:54 pm*
it try to update but it say the data stream has corrupt....

EDIT it update

DeMoNi - *May 7, 2012, 1:56 pm*
For everyone :
Update released, everything is working : scanner, icon changer and assembly changer, and all the other features.
Builder doesn't crash anymore, stub size is 33KB, and after crypt, your server is compressed so it is even smaller than before the crypt.

Still FUD, still selling, you can use the auto-buy here to receive your product instantly :
http://infinityproducts.org/

Lykos Thrylos - *May 7, 2012, 1:58 pm*
Everything is working fine except icon here

EDIT: It works, thanks

Coral beef - *May 8, 2012, 5:32 am*
Well i have to say i'm impressed that you actually update this.
Often, it can take months for the developers of something like this to update it and make sure it's FUD!
I still haven't managed to test it. I might buy a few test installs.

Lykos Thrylos - *May 8, 2012, 7:04 am*
Looks like the crypter is corrupting the DarkComet stubs, I added you on Skype for support.

Avriex - *May 8, 2012, 8:46 am*
I PMed you about purchasing this, but I'm a little bit afraid after noticing that people have corrupt stubs from both this crypter and Enigma crypter.
Are these fixed?

The2K - *May 8, 2012, 8:46 am*
I bought this and crypted a DarkComet stub, it's undetected and clean.

Vouch.

Avriex - *May 8, 2012, 8:51 am*

Yes, thank you, please do let us know.

The2K - *May 8, 2012, 9:25 am*
Tried it on my laptop, it seems that it just pops up a "failed to initialize" (non-fake error) then deletes its self and nothing else. Or "failed to install" I forgot. Pretty sure it was the first one.

Seems there's a problem.

Avriex - *May 8, 2012, 9:34 am*
(May 8, 2012 09:25 AM)The2K Wrote: *[CITE]* Tried it on my laptop, it seems that it just pops up a "failed to initialize" (non-fake error) then deletes its self and nothing else. Or "failed to install" I

Coral beef - *May 10, 2012, 11:56 am*
How do i get a private stub?
But first, you need to fix one incredibly crucial problem. When i set it to startup it ASKS if you want to run it or not... This is seriously not good, i have wasted like 1 week trying to get this crypter to work properly, finally the fixes came out and now it ASKS if you want to run the virus?
Kinda annoying, but i still maintain faith in the crypter because at least you update your crypter often.

DeMoNi - *May 10, 2012, 12:14 pm*
Coral beef Wrote: *[CITE]* How do i get a private stub?

?Ladon Kkc - *May 12, 2012, 9:43 am*

Since there was an update and sum weird icon got installed on my Desktop "Mpress" ? everytime i click Crypt file it just closes the crypter without any error or warning..

DeMoNi - *May 13, 2012, 2:40 am*

?Ladon Kkc Wrote: *[CITE]* Since there was an update and sum weird icon got installed on my Desktop "Mpress" ? everytime i click Crypt file it just closes the crypter without any error or warning..
Mpress is used to pack the file after crypting. For support add me on skype.

I'm having the same problem.
Without icons, it's 0/37, but when I select an icon it's like 5/37.

I've managed to get it 1/37 (avira) with a HQ icon + Firefox assembly info.

Coral beef - *May 16, 2012, 10:40 am*
Hey, i can never get this FUD...
So i'm interested in buying a Private stub.
But first i had a few questions...
How much is a private stub?
Are they all FUD?
How private is a stub? (Is it shared with other people, but only a FEW other people?)

DeMoNi - *May 17, 2012, 5:39 am*
@Everyone, stop posting here it is not FUD with an icon, or you will get a simple ban.
Just PM me if you have any problem. I know why it is getting detections with icons.

Released a new stub that should resolve your problems guys.

You clearly aren't doing something right, it's FUD for me.

Add me on Skype, maybe I can help you out a bit

Skype = odel.goenka

Coral beef - *May 18, 2012, 2:17 pm*
(May 18, 2012 02:08 PM)daemon10 Wrote: *[CITE]* its detected by avg, nod please refud thisUse simple settings, put startup on, but not much else.
Make sure assembly is firefox or Java or something. It really helps to make it more UD...
Also, don't use a custom icon....

DeMoNi - *May 18, 2012, 3:11 pm*
It is completely FUD, be sûre to use a proper assembly and icon thats all.

Still FUD, still selling, you can use the auto-buy here to receive your product instantly :
http://infinityproducts.org/

pCoX - *May 18, 2012, 4:05 pm*
Best scan I got is here, not fud bro.. .

Scan report is brought to you by Foxxy Software

daemon10 - *May 18, 2012, 9:49 pm*
Its not fud

http://scan4you.net/result.php?id=5d0d5_1kpab9

I am not sure where you are getting your FUD results from. This NOD32 looks like generic to me.

DeMoNi - *May 18, 2012, 11:39 pm*
Eset and Ikarus seems generic, others may Côme from assembly and icon.
I cant access à Pc to refud until tommorow, I hope you guys CAN understand.

pCoX - *May 19, 2012, 12:13 am*
(May 18, 2012 11:39 PM)DeMoNi Wrote: *[CITE]* Eset and Ikarus seems generic, others may Côme from assembly and icon.

No problem, get it done asap DeMoNi. I am losing bots by the minute lol.

Koekert - *May 19, 2012, 12:14 am*
Damn, I just lost a shitload of bots as well, lol. However I still fucking vouch for Demoni. Hes friendly, helpful and I still love his crypter ;)

DeMoNi - *May 19, 2012, 11:33 am*
I Will access m'y computer in arround 24 hours, not sûre if i CAN finish it though, as I have an exam on Monday.

17R0LL - *May 19, 2012, 11:47 am*
Thanks for the information DEMONI, i also lost a lot of bots that i really needed :S

Coral beef - *May 19, 2012, 11:56 am*
(May 19, 2012 11:47 AM)17R0LL Wrote: *[CITE]* Thanks for the information DEMONI, i also lost a lot of bots that i really needed :S
Agreed =[
I lost a bot with 240m RSGP... Easily £50 lost...
Demon, why won't you answer my questions about a private stub?
Are you still selling them or what?

darkdream - *May 19, 2012, 12:47 pm*
4/37 for me with DARKCOMET,wait for the next update

17R0LL - *May 19, 2012, 2:48 pm*
Demoni why when i bought the thing called ''private stub'' it never been fud?

.Prince - *May 20, 2012, 3:26 am*
i hope you exactly tell us when you'll release the fud update , and it be very soon , today ! .

Ganzul - *May 20, 2012, 3:30 am*
Vouch for DeMoNi , Good Job !
Cordially
Oxwar

Koekert - *May 20, 2012, 4:43 am*
At least I am not the only one.. Went from 120 to max 20 bots lol. Too bad, first time I even went over 20 bots, and would never have imagined getting over 100 bots. Hope this will get FUD'd again,

wanting to hack some Runescape accounts for some money.

Just rescanned on Elementscanner. My server that used to be 0/37 two days ago has turned out to be 7/37 already.. Heh, but exams have higher priority, Demoni. Dont rush it.

DeMoNi - *May 20, 2012, 5:21 am*
Yes guys, I am revising for m'y tommorow test, I Will be back home in arround 6 hours, I hope I Will havé thé Time to refud it quicly otherwise it Will be tommorow after m'y exam.

PeWz - *May 20, 2012, 8:12 am*
You guys aren't accepting RSGP Right?

DeMoNi - *May 20, 2012, 12:34 pm*
PeWz Wrote: *[CITE]* You guys aren't accepting RSGP Right?
No I don't, however you can use a website to send them your RSGP, and to pay me trough PayPal.

Released a new stub, which is 1/37, just nod32 left, fixing it.
Use Java assembly with the button.

.Prince - *May 20, 2012, 12:58 pm*
can you please fix the scanner ? it says error couldnt connect to host , thanks for the quick fix , i know you'll refud it pretty soon .

DeMoNi - *May 20, 2012, 1:10 pm*
.Prince Wrote: *[CITE]* can you please fix the scanner ? it says error couldnt connect to host , thanks for the quick fix , i know you'll refud it pretty soon .
The scanner is being fixed by my partner Napster, there is a problem with scan4you.

CryptShock - *May 20, 2012, 1:33 pm*
Vouch for DeMoNi...
Great crypter good luck with sales bro!!!

lenglais - *May 20, 2012, 2:55 pm*
good crypter but i don't belive it's FUD 3 week's :/

daemon10 - *May 20, 2012, 4:49 pm*
(May 20, 2012 02:55 PM)lenglais Wrote: *[CITE]* good crypter but i don't belive it's FUD 3 week's :/
It isn't fud anymore. Excuses are becoming lame such as Exams, Jail, Sick, Family problems and so on. Personally i think if you pay for one month service nobody cares about these excuses! If you take the money then offer the service that you took the money for.. or give those people the down time because its really not their problem its problem on your side.

.Prince - *May 20, 2012, 8:33 pm*
i strongly agrees with daemon10 , i think all those who bought the monthly subscription should be given some extra time . i hope you consider it , thanks .

Heresys - *May 20, 2012, 10:09 pm*
(May 20, 2012 08:33 PM).Prince Wrote: *[CITE]* i strongly agrees with daemon10 , i think all those who bought the monthly subscription should be given some extra time . i hope you consider it , thanks .
Even thou Crypters are dying on here.. because to much customers.. its really hard to Keep it FUD.. If you have 30+ customers.. One could be scanning it on virustotal or other sites similer to virustotal..

DeMoNi - *May 21, 2012, 3:47 am*

Exim Wrote: *[CITE]* Vouch for DeMoNi...
Great crypter good luck with sales bro!!!Thanks for your vouch bro.

lenglais Wrote: *[CITE]* good crypter but i don't belive it's FUD 3 week's :/It was like when I started selling v2, but now average is arround 5-6-7 days.

daemon10 Wrote: *[CITE]* It isn't fud anymore. Excuses are becoming lame such as Exams, Jail, Sick, Family problems and so on. Personally i think if you pay for one month service nobody cares about these excuses! If you take the money then offer the service that you took the money for.. or give those people the down time because its really not their problem its problem on your side.I am having some exams before my final exam which is at the 12th grade and is the most important exam.

.Prince Wrote: *[CITE]* i strongly agrees with daemon10 , i think all those who bought the monthly subscription should be given some extra time . i hope you consider it , thanks .I will start to code v4, and will give a free subscription week to all clients.

x3XTREMEx Wrote: *[CITE]* Even thou Crypters are dying on here.. because to much customers.. its really hard to Keep it FUD.. If you have 30+ customers.. One could be scanning it on virustotal or other sites similer to virustotal..I didn't let it die, I was just on vacation for 3 days, had an exam today. I tried my best to re-fud the stub and put it down to 1/37 with only nod32 left, so don't complain.

@It will be FUD within some hours, when I be back from school and I can finish it.

17R0LL - *May 21, 2012, 6:12 am*

Thanks demoni, you are the first coder and seller of a crypter i ever had that actually cares about customers

Coral beef - *May 21, 2012, 8:07 am*

(May 21, 2012 06:12 AM)17R0LL Wrote: *[CITE]* Thanks demoni, you are the first coder and seller of a crypter i ever had that actually cares about customers
It's been un-FUD for like a week now. And AVG constantly picks it up... Once AVG picks it up, you've lost at least 40% of your slaves, even if he re-FUD's it, you won't get them back.

DeMoNi - *May 21, 2012, 10:53 am*

17R0LL Wrote: *[CITE]* Thanks demoni, you are the first coder and seller of a crypter i ever had that actually cares about customersThanks bro for your support.

The private STUB is fud isn't it? Because if so illuse that

Kraxas - *May 23, 2012, 2:44 am*
It's fud in these moment? I really need it :/

17R0LL - *May 23, 2012, 2:46 am*
FFS (private stub ScanTime = FUD) RunTime avg detection.

Coral beef - *May 23, 2012, 6:31 am*
(May 22, 2012 05:17 PM)D?xing Wrote: *[CITE]* I am not kidding you get your own private stub demoni is alreading working on refud current stub
I asked him for a private stub and he said he wasn't selling...

240 people @ $20 minimum is $4800... That's a hella lot of money. I appreciate he is trying hard, but when he's getting $4800 minimum, it's kind of expected to be FUD'ded often.
Demon is actually one of the best crypter sellers i've ever seen. SO many people make crypters and let them die, whilst continuing to rake in the money.
It is a shame that the popularity of this crypter is so big... Private stubs would probably help a lot...

DeMoNi - *May 23, 2012, 7:05 am*
Stub is fud again, use Internet Explorer assembly so it will be FUD.

PM me your userame; so I CAN see why.

.Prince - *May 25, 2012, 12:49 am*

thanks , i recovered my login , you're very supportive and great coder , i'll try my best to get a fud out put with this .

darkdream - *May 25, 2012, 8:35 am*

not fud for me at the moment 3/37 with internet explorer assembly

.Prince - *May 25, 2012, 9:29 am*
plain and simple , don't even bother to post any more , the truth is ..

the crypter is awesome - too many are using it = hardly a fud out put .

how ever im getting fud or 1/37 at all times , maybe demoni would code something like 20 users per a stub , that would be great .

i completely vouch for Demoni , he's a badass coder , how i wish you consider to make a high class crypter at a very expensive price " to be sold only to 10 people or something close to .. ! , i'll surly buy it .

MadBid - *May 25, 2012, 9:32 am*
this crypter works nice keep it up man

DeMoNi - *May 25, 2012, 9:42 am*
darkdream Wrote: *[CITE]* not fud for me at the moment 3/37 with internet explorer assemblyNo way, right now it is 0/37 with IE assembly, take care of the icon you use.

.Prince - *May 28, 2012, 4:42 am*
still FUD , just crypted a new server moments ago , here's a screen shot of the result of me spreading over youtube using 8 videos and infinity crypter after almost two weeks of my purchase .

" note : for each crypter i use a different port , the 1k is entirely from this crypter only !! in two weeks period "

the infection rate based on downloads is an average of 85% , then i install on them a darkcommet server , yes some they have av's enabled and up to date .

note : if the file gets detected , no worrys , build a new server using a new icon and different yet legit assembly info , you'll get a fud out put . IF the server gets generically detected , the best way to solve this is to pm DeMoNi , he'll respond back to you and fix the problem fast .

truly fud :) , thanks DeMoNi .

DeMoNi - *May 28, 2012, 8:26 am*
@.Prince -> Thank you so much bro, I am glad you like my crypter ;)

Nearly one week the crypter is FUD ;)

[img]http://screensnapr.com/e/uu9APT.jpg[/img] I never touched virustotal?? EVER?? I would never touch virus total. Why would i pay for a crypter then ruin the very same crypter I PAID FOR??

This is ridiculous... Although i never touched virustotal, maybe you should work on getting your features ACTUALLY WORKING?. Like i said, i didn't touch virustotal.. But your built in scanner doesn't exactly work perfectly either.

There are plenty of websites you can scan on without a built in scanner.

Coral beef - *May 28, 2012, 9:02 pm*

(May 28, 2012 08:43 PM)Blink-182 Wrote: *[CITE]* There are plenty of websites you can scan on without a built in scanner.Agreed. That wasn't really my main point... My main point is actually YOUR point... There's plenty of other sites out there that WON'T Damage the crypter that I PAID FOR...

I'm not going to sit and rage because i'm sure demon can re-review this ban considering it was clearly a mistake...

Scanned by CloudCrypter.net - Online Scanner & Crypter

I will show you a preview of v4 asap too guys, and btw soon, there will be no more lifetime licences avalaible, only 6 months for 50$. Stay stuned ;)

Still FUD, still selling, you can use the auto-buy here to receive your product instantly : http://infinityproducts.org/and the person who buy in the past le lifetime licence?

DeMoNi - *June 2, 2012, 5:37 am*

(Jun 2, 2012 03:46 AM)darkdream Wrote: *[CITE]* and the person who buy in the past le lifetime licence?
I need to think more about this.
I Will tell you whats up.

DumbFoundDe4d - *June 2, 2012, 7:12 am*

Thanks for the answer earlier. Right now I'm crypting a file and its getting detected by NOD32 using the built in scanner.

darkdream - *June 2, 2012, 9:28 am*

detected by eset nod32 with vbc and itself injection, IE assembly

DeMoNi - *June 2, 2012, 9:55 am*

I fixed it, re-crypt and it Will be FUD.

.Prince - *June 2, 2012, 10:51 am*

hey bro it's been a long time since the last time we spoke , i hope you're doing just fine , again thanks for the wonderful product , i think it still detected by ESET NOD can you please take a look into it again ? thanks alot

again revouching ... using DeMoNi's crypter after 3 days spreading ..

[img]http://s16.postimage.org/i3mfk35o1/Untitled.png[/img]

Yo Demoni for gui you should also add a support chat would be very useful

morgendexter - *June 2, 2012, 3:42 pm*
Voch 4 DeMoNi Its not free like somwher ^^
wish u Luck with sells

M0untain Dew - *June 2, 2012, 4:17 pm*
Hey, DeMoNi I just purchased this and I didn't recieve any information on where to download it or anything. Can you please send me that info? Transaction ID : if you want me email I'll pm it to you just say so.

Edit : Nevermind, I recieved it in my spam box for some reason.

Hey DeMoNi, can you please post a screenshot for optimal settings for blackshades? I know you said use .net settings and itself but can i change settings in blackshades or should i leave it all default?

Is anybody online that can give me support? i have teamviewer and skype if you are online and willing to help me with it please pm me. i would really appreciate it.

Isn't persistance supposed to re-open the rat if it is killed in task-manger?

basically i want to know what settings for the crypter + blackshades are for having it startup with the computer, have it impossible to be killed in taskmanager and thats really all thats important....

the persistance part doesnt seem to work. if i end vbc.exe in task manager i lose my bot and it doesnt come back untill pc restart.

final edit : finally got it to work the way i wanted lol. its fud too.

Wound - *June 2, 2012, 10:56 pm*

I receive the error message, "Error: Unable to write to output file 'C:\Documents and Settings\Josh\Desktop\assemblychange.exe': Could not execute CVTRES.EXE." upon clicking, 'Build Crypted file'.

Please resolve this issue as I am incapable encrypting my file.

DeMoNi - *June 3, 2012, 12:06 am*

M0untain Dew - *June 3, 2012, 11:11 am*
For everybody pming me about what my settings are here is what worked for me with blackshades :

[img]http://zeyuu.net/i/4fa9dc89117b2528926220.png[/img]
[img]http://zeyuu.net/i/4fa9dc5cc21cc281112769.png[/img]

Also for everybody saying the scanner doesn't work. Keep trying and eventually it works, I get an

error too sometimes.

DeMoNi - *June 3, 2012, 1:58 pm*
Thanks M0untain Dew for the settings for blackshades.

DumbFoundDe4d - *June 3, 2012, 6:19 pm*
I vouch for DeMoNi

I had some problems that were quickly resolved.
As for people having scan problems, watch what you are binding to. I have binded to pdfs (Why not) and the scan will result in an error. This problem is easily fixed by making one file binded and one file plain, and scanning the plain file.

James Kirk - *June 3, 2012, 8:20 pm*
Can't crypt a file, it just crashes :(

DeMoNi - *June 3, 2012, 10:04 pm*

If the output file is too big, it may crash.

(Jun 3, 2012 08:20 PM)z5z2z Wrote: *[CITE]* Can't crypt a file, it just crashes :(
Just delete Mono.Cecil.dll to fix this mate.

Jogger - *June 4, 2012, 1:58 am*
Easily the best .net crypter. Vouch!!

darkdream - *June 4, 2012, 2:34 am*
firewall off and antivirus off but cant scan my files with the crypter scanner whats the problem?

.Prince - *June 4, 2012, 3:13 am*
(Jun 4, 2012 02:34 AM)darkdream Wrote: *[CITE]* firewall off and antivirus off but cant scan my files with the crypter scanner whats the problem?
i just tried it , its working , simply locate the file you desire to scan on your desktop to be easily locatable , click on select file , then hit the scan button , do not try to more or interrupt the crypter while doing so , depending on your file size the result will pop up when ever ready .

DeMoNi - *June 4, 2012, 3:35 am*
Jogger Wrote: *[CITE]* Easily the best .net crypter. Vouch!!Thanks mate for your vouch ;)

darkdream Wrote: *[CITE]* firewall off and antivirus off but cant scan my files with the crypter scanner whats the problem?It seems to work for everyone, add me on skype, I will help you to see where is the problem.

MTM
yes , you can spoof the extension to .jpg , change the icon to a picture.ico , put it in a folder and add it to winrar , after he extract the files , it will pretty much look like as if it was a picture , how ever if he goes through it properties he'll find out that it's an exe file < " mostly dont do so " .

Infinity crypter has an extension spoofer .

hey DeMoNi , is there any new update anytime soon ? thanks for the hard work , love your products ! .

im not with the official support of infinity crypter product so i dont think i have the right to add you .. or maybe not , i dunno , how ever i support DeMoNi and his products .

maybe if you tell me what seems to be the problem , with a screen shot included , and a little bit of explanation i can be able to help you .

Avg is a false but bullguard is not bug will be fixed later today thanks for your time

Settings for dark comet and blackshades

M0untain Dew - *June 5, 2012, 8:22 pm*

Doxing has been trying to help me over TV. The injection to svchost.exe seems to be completely broken. No matter what settings I use from the crypter or blackshades it corrupts the server if you try to inject via svchost.exe. thank you for the help doxing. hopefully this will be fixed soon.

D?xing - *June 5, 2012, 8:25 pm*

Infinity is the best crypter I've used yet!
Big vouch for this wounderful crypter!

D?xing - *June 6, 2012, 5:23 pm*
(Jun 6, 2012 05:18 PM)M0untain Dew Wrote: *[CITE]* To be honest, I am really disappointed with this crypter since I have had it. Since I have had it I have never gotten it work with darkcoment. It corrupts my server no matter what and I have tried EVERY different type of settings for both the crypter and DC. I have only seen it be FUD for about 1 day and hasn't been FUD since. The persistence feature on the crypter has seemed to NEVER work no matter what RAT/settings I am using. The inject to itself feature hasn't worked since I had the crypter either, neither has injecting to a custom exe of your choosing. The only thing that works sometimes is injecting to svchost and it does not seem very stable. I am sorry if I offend anyone, the crypter does have some nice potential to be a good crypter once everything that is broken on it is fixed. Doxing does give pretty good

support though, I will say that. But even he couldn't get everything to work right for me. I'm pretty sure I am not the only one with these problems either. DeMoNi, if I I have posted anything I am not allowed to in the post, please PM me and I will remove it. I am just giving my opinion on the crypter, maybe other people have had better luck then me. Is it possible to refund me the $20 I spent on this crypter AT ALL? I know it says no refunds but I have only had it for 4 days and since I have had it, everything I have just stated does not work and I really would rather not pay for a half broken crypter.
The last settings I did for you worked perfectly but you want switch when I already told you settings

M0untain Dew - *June 6, 2012, 5:24 pm*

(Jun 6, 2012 05:23 PM)D?xing Wrote: *[CITE]* The last settings I did for you worked perfectly but you want switch when I already told you settings
Why should I be forced to have to use one setting ALL of the time when the crypter should be able to be used with different settings? When I read the description in the first post it didn't say anywhere that only one setting currently works. If you are working on fixing that, that's cool. Atleast let people know that before they buy it though. You only got it to work with blackshades as well, not dark comet.

Edit : Demoni gave me support via teamviewer and helped me fix the problems, it is currently working with everything...except if you run itself in sandbox you recieve an error. He said it will be fixed today.

D?xing - *June 6, 2012, 5:25 pm*

(Jun 6, 2012 05:24 PM)M0untain Dew Wrote: *[CITE]* Why should I be forced to have to use one setting ALL of the time when the crypter should be able to be used with different settings? You only got it to work with blackshades as well, not dark comet.
I told you use same settings for dc you said no you want use svchost

M0untain Dew - *June 6, 2012, 5:26 pm*

(Jun 6, 2012 05:25 PM)D?xing Wrote: *[CITE]* I told you use same settings for dc you said no you want use svchost
I did use those settings for dc and you even watched on tv and it did not work, but again why should i be forced to one setting when I paid for something that is supposed to be capable of more? Currently no matter what settings are used with dark comet, even the ones you showed me do not work.

Edit : Demoni gave me support via teamviewer and helped me fix the problems, it is currently working with everything...except if you run itself in sandbox you recieve an error. He said it will be fixed today.

Can anyone tell me why this crypter is not able to make FUD ? After crypting it's detected by avg antivirus :/

DeMoNi - *June 7, 2012, 2:36 am*

S.A.M. Wrote: *[CITE]* Can anyone tell me why this crypter is not able to make FUD ? After crypting it's detected by avg antivirus :/

I just used Firefox assembly and no icon, and it is 100% FUD.

M0untain Dew - *June 7, 2012, 8:44 am*

I can not believe you banned me for posting my opinion on your crypter. Nowhere in the TOS does it say that I can not post about my experience with the crypter. You banned me for posting that half your crypter doesn't work and I am disapointed because it did not say anywhere when I bought it that half the things it is suppose to do, do not work. If you ban customers that complain this crypter won't last long. Nobody will buy it because they will be scared to say something does not work in fear of being banned. You obviously do not know anything business related, or you wouldn't ban me for telling the truth. I was not asking for support when I posted it, I was posting my opinion and a review. It's funny you don't ban people who leave good reviews, but I actually said the truth and I get banned for saying something does not work. I don't think it's fair to people buying the crypter not knowing that certain features on it do not work. That's fine though, it is your crypter and if you want to ban me for something that I PAID for and all I did was post that something didn't work that's cool its your choice. I will not be purchasing anything from you in the future though because I shouldn't be banned for posting an honest review. Nowhere in my post was I flaming you, I even said it could be a great crypter if the bugs are fixed.

Edit : Demoni gave me support via teamviewer and helped me fix the problems, it is currently working with everything...except if you run itself in sandbox you recieve an error. He said it will be fixed today.

I've had this crypter for about a month now and I don't have the problems you do. It is FUD almost 100% of the time. When it goes detected by even 1 AV DeMoNi updates it within a day, most of the time hours. I'm using BS and it is working just fine for me.

M0untain Dew - *June 7, 2012, 8:51 am*

I do believe you said "I have only seen it be FUD for about 1 day and hasn't been FUD since." now in my opinion that seems like complaining. Also, I've used this in the past with DC and it also worked.

DeMoNi - *June 7, 2012, 9:13 am*

I fixed it with M0untain Dew, he was just using bad settings for Darkcomet and the crypter ;)

If you installed it, then yes just ignore it.
This error happens on 3/4 customers only ^^

.Prince - *June 10, 2012, 3:24 am*

so my monthly subscription has just finished , it was a good run to test this crypter and decided to go for a life time package , earlier on this thread i read you've canceled the life time package and now its only for 6 monthis or a year , is this true bro ?

DeMoNi - *June 10, 2012, 3:28 am*

.Prince Wrote: *[CITE]* so my monthly subscription has just finished , it was a good run to test this crypter and decided to go for a life time package , earlier on this thread i read you've canceled the life time package and now its only for 6 monthis or a year , is this true bro ?
Currently, lifetime is still avalaible, but when v4 will be out, I will only sell, 1, 3 and 6 months subscription.

.Prince - *June 10, 2012, 3:46 am*

ok , so now when i buy the life time , i will get a new serial number , i dont have to re register again with net seal right ? ,. all what i have to do is just input the new serial number and thats it ? , when is v 4 gonna be released btw ?

quick edit , when v 4 is released , those who paid before , their licenses will remain life time right ??

DeMoNi - *June 10, 2012, 5:12 am*

.Prince Wrote: *[CITE]* ok , so now when i buy the life time , i will get a new serial number , i dont have to re register again with net seal right ? ,. all what i have to do is just input the new serial number and thats it ? , when is v 4 gonna be released btw ?

Yes, you will receive a new serial, and just redeem it.
v4 will be released after my exams are over, I will code faster with my new pc too.

I will have to think about this, but anyway, all lifetime members will at least get 6 months package.

.Prince - *June 12, 2012, 12:38 am*
crypting a file is pretty simple , you either use the crypter's settings or the server's settings ..

for an example , if you enabled start up on the server side , disable it on the crypter side ..

if you enabled persistence on the server side , disable it on the crypter side .. and so on , then simply edit the assembly , and hit the crypt button .

honestly , i like to use the crypter's settings side , so my server built is in raw , no start up , no injection , no persistence , no icon , no packer or compressor , ect ..

then load it into the crypter , use method 1 or 2 , enable start up " be smart choose a decent name can reduce detections .. " enable persistence , edit the assembly into something legit .. use imagetoicon convertor program to get a high quality icon that only you'll use , delaying execution helps evading avg , eset and avira ..realtime protection .. , then hit the crypt button .

i hope this helps some members .

what settings should i use for istealer 6.3 , to make it fud , i have never ever got it fud with this crypter

DeMoNi - *June 12, 2012, 8:38 am*
tbsboy Wrote: *[CITE]* what settings should i use for istealer 6.3 , to make it fud , i have never ever got it fud with this crypter
Just select and crypt with no icon, and it will be FUD.

LatitudeBlu - *June 12, 2012, 12:17 pm*
This is good information. But what about active protection's like in Comoda or Avira where it says, " (program.jpg.exe is trying to communicate with another computer - allow or block this?)

Is it possible to get past this even when the server is completely FUD against a av scan? Because even free antivirus have these features built in. And trying to fake a jpg, avi, etc is really hard when you get poppups.

Mate this is called a Firewall, and a crypter won't nothing against a firewall.

.Infinity. - *June 12, 2012, 2:48 pm*
Not a huge fan of this crypter. The result was FUD only after I played with the settings for a while,

and a couple of the options kept corrupting my server. As well, the stub size is ridiculously large. My bin went from 100 KB to 535 KB after crypting, and I didn't pump any extra data in at all.

Depravity - *June 12, 2012, 10:32 pm*

Does the feature, "Extension Spoofer" even work?

Every time I attempt to use this feature, my bin would still be an executable file.

The name would be altered to an extent, and the extension file will remain the same. (ex. serverjpg.exe)

DeMoNi - *June 12, 2012, 11:07 pm*

Bro it is a "spoofer" means file would be like this : serverexe.jpg, you need to activate extensions in windows.

(Jun 12, 2012 02:48 PM).Infinity. Wrote: *[CITE]* Not a huge fan of this crypter. Bullshit, to get a FUD output, just use an HQ assembly.

No options in thé crypter does corrupt your stub at all.

And the stub Size is 40KB.

You are clearly doing something wrong, or trying to trash sales.

.Infinity. - *June 12, 2012, 11:19 pm*

(Jun 12, 2012 11:07 PM)DeMoNi Wrote: *[CITE]* Bullshit, to get a FUD output, just use an HQ assembly.

And the stub Size is 40KB.

You are clearly doing something wrong, or trying to trash sales.

I'm sorry you can't handle the honest opinion of one of your customers. I have absolutely no reason to trash sales, I am not affiliated with any other crypter and I have no intentions to be. I purchased this product and have been thoroughly disappointed so far. I've tried multiple settings and they all produce massive stub sizes, most around 400 KB, not 40 KB. So either you're lying, or something is wrong with the crypter.

Feel free to check it out over Teamviewer with me. I have no reason to lie to people reading the thread. I simply wish for a crypter that is high quality.

DeMoNi - *June 12, 2012, 11:41 pm*

(Jun 12, 2012 11:19 PM).Infinity. Wrote: *[CITE]* I'm sorry you can't handle the honest opinion of one of your customers. I have absolutely no reason to trash sales, I am not affiliated with any other crypter and I have no intentions to be. I purchased this product and have been thoroughly disappointed so far. I've tried multiple settings and they all produce massive stub sizes, most around 400 KB, not 40 KB. So either you're lying, or something is wrong with the crypter.

Feel free to check it out over Teamviewer with me. I have no reason to lie to people reading the thread. I simply wish for a crypter that is high quality.
If you use an icon, for sure Size Will increase lol.
Add me on skype, something seems strange.

MCTDM - *June 12, 2012, 11:42 pm*

Thankyou D?xing
Helped me via TV to set up my BS settings and crypter settings and made sure it worked :), thankyou very much sir
great crypter he has here well worth the money spent :)

Depravity - *June 13, 2012, 12:01 am*

(Jun 12, 2012 11:07 PM)DeMoNi Wrote: *[CITE]* Bro it is a "spoofer" means file would be like this : serverexe.jpg, you need to activate extensions in windows.
I've attempted to use nearly all of the settings possible in a combination, but the lowest detection rate I was capable of acquiring were 3/37 antivirus scans that detected my bin.

Also, what were you implying when you stated that I need to activate extensions 'in windows'? Please elaborate; Sorry if I can't comprehend what you were implying.

XOwnage - *June 13, 2012, 4:11 am*

could you please add an scan ? thanks in advance

flo_sun - *June 13, 2012, 7:08 am*

can you refud it please
i have like 4 - 5 antivirus detecting it , not using any icons

PedroDJ - *June 13, 2012, 7:18 am*

(Jun 12, 2012 11:41 PM)DeMoNi Wrote: *[CITE]* If you use an icon, for sure Size Will increase lol.
Add me on skype, something seems strange.
Sorry man but is 3 / 37 or 4 / 37 for me too and I have tryed many settings, assembly, icon: can you refud it ?

Thank you :)

Regards

DeMoNi - *June 13, 2012, 7:21 am*

It is only 1/37, detected by NOD 32.
IF you can't simply randomize the assembly, then you should not use a crypter.

PedroDJ - *June 13, 2012, 7:34 am*

(Jun 13, 2012 07:21 AM)DeMoNi Wrote: *[CITE]* It is only 1/37, detected by NOD 32.

Randomized with the tool you have suggested me [and with EAZfuscator but this increase detection to 5 / 37].

I'm not a noob, only reporting you.

Have a nice day.

Regards

swooooooop - *June 13, 2012, 8:09 am*
I regret saying the crypters not fud! :) I'm loving it 0/37 :)

You're selling the community a product that is still detected by at least one antivirus program. Why don't you encrypt a file then display the scan on HackForums? This thread's title is misleading and I didn't purchase this product for 3-months to know that it is detected by at least 4 antivirus programs.

@Anonymous - *June 13, 2012, 12:39 pm*

how can i download Latest Version of it?

DeMoNi - *June 13, 2012, 12:49 pm*

Depravity Wrote: *[CITE]* You're selling the community a product that is still detected by at least one antivirus program. Why don't you encrypt a file then display the scan on HackForums? This thread's title is misleading and I didn't purchase this product for 3-months to know that it is detected by at least 4 antivirus programs.LOL, you think a crypter is always FUD every day, every hour. Then just go code your own. It wad detected only 6 hours. And I re-fudded it.

S.A.M. Wrote: *[CITE]* how can i download Latest Version of it?Relaunch the crypter, it will update it self.

Just released a new builder, and a new stub, use random assembly, and it will be FUD ;)

Still FUD, still selling, you can use the auto-buy here to receive your product instantly : http://infinityproducts.org/

kimgage - *June 16, 2012, 2:52 am*

Im loving this crypter, after my 1 month license expires will be buying for sure time life license :) Good job DeMoNi and good luck with the sales !

Kozziy - *June 16, 2012, 8:24 am*

vouch this crypter is always fud for me and i love it worth the money guys trust me.

Blueberrysky - *June 16, 2012, 10:10 am*

I bought it lifetime but when I bind my Server with it, I always have this problem when I'm opening it:

CLR ERROR :80004005 The program will now terminate.

Edit: The problem is that the main file that I am binding is not opening, but there is no problem for the second one.

Second edit: This is like something was missing in the main application, when we bind for example Server.exe with Installation.exe, Server.exe won't work because this is the first file to be binded.

Raikumi - *June 16, 2012, 10:41 am*

One of my vic scanned it with Norton 360 and caught it.

Re-FUD please.

Or am I just not using it right?

daemon10 - *June 16, 2012, 11:15 am*

Inject ItSelf doesnt work at all i tested on x32 on blackshades and other software doesnt do a damn thing.

White Ninja - *June 16, 2012, 12:19 pm*

10/37 with a binded file with an icon, 1/37 without the bind and icon.

Potential victims reported to have AVG, MalwareBytes, and Norton. I'll still have no clue why they tell me what anti they have over chat after they KNOW I tried to infect them lol.

DeMoNi - *June 16, 2012, 12:40 pm*

(Jun 16, 2012 10:10 AM)Blueberrysky Wrote: *[CITE]* I bought it lifetime but when I bind my Server with it, I always have this problem when I'm opening it:

(Jun 17, 2012 02:34 AM)wisso Wrote: [CITE] hello bro i pmed u and didn't get reply can i know the reason bro?

I never received your PM, send it again.

Server is back, and everything is working fine again.

magiC* - *June 17, 2012, 12:45 pm*
Seeems this isnt even fud, whats up?

DeMoNi - *June 17, 2012, 12:49 pm*
xOMz Wrote: *[CITE]* Seeems this isnt even fud, whats up?
Only NOD 32 is catching it atm. I believe someone of their team bought Infinity as it gets detected too quickly with NOD 32.
Anyway I will try to re-fud it asap, but I am having my last 5 days of exams before holiday, so I will finish coding v4.

Rozyn - *June 17, 2012, 2:31 pm*
I vouch, amazing crypter! It took me from 28/37 to 0/37 with my RAT! AMAZING!

Living End - *June 17, 2012, 3:13 pm*
can i have one hour test to? t00 shooeoeeert

nem2 - *June 17, 2012, 3:35 pm*
when I try and run my crypted file, I get a .net framework error "unhandled exception"

I am new to this program so I'm sure it's me. can anyone help please?

thank you

D?xing - *June 17, 2012, 3:42 pm*
(Jun 17, 2012 03:35 PM)nem2 Wrote: *[CITE]* when I try and run my crypted file, I get a .net framework error "unhandled exception"

I am new to this program so I'm sure it's me. can anyone help please?

thank you
Repair your framework than should work fine

nem2 - *June 17, 2012, 4:12 pm*
thanks that did it. I appreciate the fast reply

Blueberrysky - *June 17, 2012, 4:50 pm*
I have a problem, when I open the file it's working but when my victim is opening it it doesen't work. It says invalid win32 application. I crypted & binded correctly...

nem2 - *June 17, 2012, 5:58 pm*
now a problem with persistence. currenty using ddoser. in the ddoser build, I have everything disabled (persistence, startup, etc).

in infinity crypter, I have:

RunPE #2 bypass proactives
inject into svchost.exe
bind off
startup on, startup svchost.exe

antis on
persistence on
add junk on
rest off

build:
hide file off
pump 0KB (don't know what this is anyway)
extension spoofer off
private stub unchecked (always errors when checked)

when I run the build on a test system, it does run ddoser. but when I kill the task it does not come back.

how can I fix this?

thank you

DeMoNi - *June 17, 2012, 10:14 pm*
Persistence Will be fixed in v4, it was detected by some AVs and I Will have to recode it.

Oats??? - *June 18, 2012, 2:24 am*
Have just purchased the product, autobuy is abit sketchy, contacting owner now.

Oats

Found the download link myself. Thanks.

EDIT, when i try to crypt it says critical error? urr help?

Oats

Found the download link myself. Thanks.

EDIT, when i try to crypt it says critical error? urr help?are you trying to use "private stub" because it doesnt work atm

DeMoNi - *June 18, 2012, 4:04 am*
Guys, dont be stupid, dont Check private stubs, as you dont own one ^^

.Prince - *June 18, 2012, 4:47 am*
to get a private stub , you have to contact DeMoNi first ! , it's 5 dollars each , long lasting , and its for your eyes only " i don't think he offers this atm so ask him " , all customers who buy the product are using the same shared stub , how ever .. DeMoNi said he'll do something like , 10 shared stubs for better and long lasting fud crypts in v 4 , so stay tuned ! ..

this crypter still my favorite , i tried so many , afew were nice , but not as nice as this one ! .

GLWS brooo !!

PedroDJ - *June 18, 2012, 4:53 am*

(Jun 18, 2012 04:04 AM)DeMoNi Wrote: *[CITE]* Guys, dont be stupid, dont Check private stubs, as you dont own one ^^

Interested in totally private STUB for LONGLASTING FUD time: can you PM me more info ?

Thank you :)

DeMoNi - *June 18, 2012, 5:04 am*

I actually don't sell private stubs, anyway just released a new stub, and guess what ;) :

is anyone else having issues with binding? im trying to bind but it doesnt seem to work i have tried different files it doesnt work with anything

michaelnagy - *June 18, 2012, 10:15 am*
(Jun 18, 2012 09:42 AM)DeMoNi Wrote: *[CITE]* If he said it does, then yes bro ^^
The core of your crypter is similar to cloudcrypter am I right?

DeMoNi - *June 18, 2012, 10:56 am*
(Jun 18, 2012 09:57 AM)Astrophysics Wrote: *[CITE]* is anyone else having issues with binding? im trying to bind but it doesnt seem to work i have tried different files it doesnt work with anything
It should work, the binder only drop the file and execute it so.

(Jun 18, 2012 10:15 AM)michaelnagy Wrote: *[CITE]* The core of your crypter is similar to cloudcrypter am I right?
No it is not, I use two different methods.
Only the injection is the same.

Parade - *June 18, 2012, 2:14 pm*
Just bought lifetime, but I'm not sure how to activate it?

DeMoNi - *June 18, 2012, 2:15 pm*

Does this crypter work well w/ hostbooter?

nem2 - *June 18, 2012, 3:49 pm*
when do you expect persistence will be working?

thanks

daemon10 - *June 18, 2012, 4:18 pm*
(Jun 18, 2012 03:24 PM)daemon10 Wrote: *[CITE]* Check Injecto again its not working i dont know why you keep saying that it works when it isnt.
It use to work before with malware now it does not work which is bs it simply does nothing.. i tryed crypting putty and crypts that but when it comes to malware ie bot it doesnt do anything.

So simply it doesnt work like it use to.. this is main reason why i liked this crypter and gave my vouch.. now to me its just like any other .net crypter.

D?xing - *June 18, 2012, 6:33 pm*
I will now be checking stub often still FUD guys

hi , it works with different apps as i tried before ..

here's what i used to do

disable server's settings , entirely ! .
load the server into the crypter , choose , inject . enable bind and choose a portable / installable file , enable startup , enable persistence , and thats it ! .

then you may edit the assembly , i highly presume it will work with you ..

(Jun 18, 2012 02:17 PM)6400 Wrote: *[CITE]* Does this crypter work well w/ hostbooter?
nope , it doesn't .. ,

--

there's no longer answer , ignore this message .

DeMoNi - *June 19, 2012, 6:06 am*

It does work with Hostbooter using ItSelf injection.

Moonpiece - *June 19, 2012, 6:48 am*

One of the best crypter I have ever used! Vouch for this user!

Clear you PMs, so I can send you the licence code.

.Prince - *June 20, 2012, 2:35 am*
i have no idea whats going on !

so let me start by saying , im so active on this thread , i have helped alot with this crypter its like im in the support team " but im not " , my idea is im very skilled with this crypter , how ever my point is , i have a very weird problem !!!!

so this is the deal , i'll try to make it short ..

i have reinstalled my windows 7 .. , installed SDK 2 , installed netframework v 4
i redownloaded the crypter , and opened it .. , now when i crypt my servers " three different clients , three different servers " the same way i did before , the executable doesnt seem to run what so ever ! , i tried it on my self , no luck , on others .. also no luck , i tried with 127.0.0.1 on my self , no luck , keep in mind when i run the non crypted server on my self or others , i / they get infected ..

so did i miss something ?? , really im so confused !! .

DeMoNi - *June 20, 2012, 2:47 am*

Hello guys
As you know, to have your server fud (0/37) is very important
and on MetaScan.org they have an option where you can upload your server and they will scan it all the time automaticly and as soon as it't not 0/37 they will send you an email telling you it for example 1/37
and if you dont remove it will continue and then resend you an email when its 2/37 and so on...

Is this ok to use or not?

It's a paid service buy the way

Again, I'm talking about .org and not .net or .com and it's a paid service

If it's not allowed, then please give alternetives that are allowed

Thanks for you help guys

...one more thing
what about uploading your server to a website that doesn't send to AV?
Is: directlink.tv ok to use?

Di???c - *June 20, 2012, 4:01 am*

You have some choices.You can use the in-built scanner in the crypter (Elementscanner), Metascan.org, Cloudscanner and scan4you i think.

Waterroll - *June 20, 2012, 4:05 am*

I would like to buy this crypter with moneybookers, 20$ .. one month :D

PokerRaiser - *June 20, 2012, 4:55 am*

(Jun 20, 2012 04:01 AM)Syff Wrote: *[CITE]* You have some choices.You can use the in-built scanner in the crypter (Elementscanner), Metascan.org, Cloudscanner and scan4you i think.
It sais not to use MATESCAN-ONLINE this is why I was wondering in regards to www.metascan.org

Maybe it's better to wait for DeMoNi to reply ?

.Prince - *June 20, 2012, 6:05 am*

i had downloaded and installed 1 GB of windows updates .. nearly all .net framework files were installed .. shockingly .. when i try to install net framework v 2 or any . v 2 framework files , it gives me an error , either " Turn on windows feature " which i did for all !! or " error can not be installed on 64 bit .

so whats up ? this is so weird really ! .

DeMoNi bro , can you please come on skype , i have already added you there before ..

is netframework v 2.0 even required ???

DeMoNi - *June 20, 2012, 8:52 am*

(Jun 20, 2012 04:55 AM)r200911 Wrote: *[CITE]* It sais not to use MATESCAN-ONLINE this is why I was wondering in regards to www.metascan.org

daemon10 - *June 20, 2012, 6:49 pm*
(Jun 19, 2012 06:06 AM)DeMoNi Wrote: *[CITE]* It does work with Hostbooter using ItSelf injection.
It does not. It use to work before but now when you run it on reboot you can even see blackwindow pop up my malware use to work with self Injection before but now it DOES NOT. He obviously changed something where it does not work with C++ malware like it used too.. sure it works with stupid stuff like putty but any C++ malware that has built in startup or C++ irc bots it will FAIL. I keep telling him this but he just keeps saying it WORKS IT WORKS. It doesnt and Self-Injection FAILS. Fix it like it was before if you dont belive it i can demonsrate you on TeamView that it doesnt and i can show you crypted file from 2 months ago how it used to work.. now you can even see little black window that pretty much tells you it failed.

True file copys it self correctly in the right path where it should same size as crypted output but malware doesnt work.. something you changed in the last month or so ago made it not work like it used too.

DeMoNi - *June 20, 2012, 9:52 pm*
@daemon10 : Hostbooter is coded in VB6 and thé only fact it does not work properly is because of its automated startup and injection. Learn before speaking shit.

daemon10 - *June 20, 2012, 10:05 pm*
Inject into it self worked fine with automated startup before. I am not speaking shit i am just pointing out the facts it use to work fine now none of the C++ malware work that use to work with Inject Into it self?

DeMoNi - *June 20, 2012, 10:16 pm*
(Jun 20, 2012 10:05 PM)daemon10 Wrote: *[CITE]* Inject into it self worked fine with automated startup before. I am not speaking shit i am just pointing out the facts it use to work fine now none of the C++ malware work that use to work with Inject Into it self?
Inject to ItSelf only works on x32 bits atm, I dont know why it stopper working on x64.
Anyway I finish m'y exams and Will start working on v4.

NOT FUD: ?

[img]http://elementscanner.net//image.php?ID=fa22fd13b11607589109daa4c7c25ea6[/img]

Edit:
*It appears delay and/or the icons makes it detected.

PokerRaiser - *June 21, 2012, 2:56 am*

My Internet is down at home so I went out to a public place and of course I can't enter the router there to open my ports for my RAT

Any suggestions? Any by-pass options?

Thanks for all help

DeMoNi - *June 21, 2012, 4:26 am*

bro i assure you i have downloaded and installed 1 GB of windows updates , nearly everything revoloves around . net framework has been installed on laptop !

my question is , is .net framework v 2.0 has any relevancy to infect a system or in server cryption ? ,

because apparently my windows refuses to install any .net file you suggested , either i have to turn windows feature on , which i did or its not supported with 64 bit

so im just wondering , anyhow DeMoNi advised me to install VMWARE , sadly i should have windows 7 ultimate , but what my OS is basic ..

anyhow i have found away around this to have windows xp on my windows 7 , i'll give it a try " currently being downloaded " .

i'll post back later on ..

D?xing - *June 21, 2012, 7:38 am*

Di???c - *June 23, 2012, 2:01 am*

(Jun 22, 2012 06:55 PM)Kyle FYI™ Wrote: *[CITE]* I can't even open this crypter :/ I paid and everything. Could I get a refund on this?
What is the error message? The crypter works perfect here. FUD 0/37.

Remember to exclude the file "Gizmo" in your antivirus program (or deactivate while you use the crypter) If the file is catched - The program comes with a error message - In case you didn't know.

I only knows that because i did it twice, and had to redownload the crypter & remove the quarantine :P

Waterroll - *June 23, 2012, 2:06 am*

Hmm could anyone help me now?

I can't get it to FUD?
Thanksss

FUD!
Thanks for the update bro, really good and fast job

.Prince - *June 23, 2012, 2:44 am*

guys this is a reminder and an advise , based on my personal experience with this crypter and DeMoNi is .. IF ever the stub gets detected PM him , and don't post here , as PMING him would get his attention faster than POSTING here , also keep in mind posting unfud result on the thread is violating TOS ! .

if you need any help getting your server FUD , or any assistance with the crypter pm me

.Prince , Official Support Team Of Infinity Crypter .

PokerRaiser - *June 23, 2012, 2:55 am*

I'm crypting my server and I get 0/37
then the next day I get on the same file 1-3/37
I then recrypt and get it back to 0/37

1) It shows how quickly and hard this guy works in order to get us fully fud 0/37. Great work man!!

2) Does this mean that people are scanning on the wrong sites??

All I want to find out is why it only stays 0/37 for so short time

DeMoNi - *June 23, 2012, 3:02 am*

(Jun 23, 2012 02:55 AM)r200911 Wrote: *[CITE]* I'm crypting my server and I get 0/37

It is the life, a crypter is not always 100% FUD ^^
And stupid guys scans on Virustotal, jotti ...

.Prince - *June 23, 2012, 3:02 am*

you need to know that , each crypt is unique , so if a certain crypted file got detected , recrypting your server could refud it if the detection is not generic ! , DeMoNi is a genius devil , quick refuds with no time , i never worry at atll , its matter of an hour tops to refud it , ..

now we can not gurantee people don't scan on virustotal for an example , how ever if a member gets caught , its gonna be a permanent and instant ban as TOS clearly indicates that .

also a detection could accure due to down-loaders them selves uploading to these sites , virtustotal ect ..

also av companies do they work as well ..

straight to the point , this crypter is standing tall on the market ! been online for quite sometime now , keep in mind that too many other crypters went down the drain in month or so , don't mean to trash sales .

so yup , i say it loudly and proudly this crypter is awesome ! .

'Chief. - *June 23, 2012, 4:48 pm*
start up does not work when you use vbc as injection

hi , first of all , free support comes along with your purchase bro ..

bs settings are .. disable everything on bs server, persistence , start up ect ..

choose 1 more stable , inject to vbc , enable start up and choose a start up name .exe , enable persistence on the crypter , modify assembly , choose an icon , delay execution and build your server and it'll be fud and running , give it a try ;)

(Jun 23, 2012 07:08 PM)eleso Wrote: *[CITE]* What kind of problems are you having? I myself can't run the file after crypting.
whats the file you're trying to crypt ?

whats your OS , which bit ?

do you have .net frame work v 2.0 & SDK & v 4 installed ?

'Chief. - *June 23, 2012, 10:45 pm*

After a whole day I lose 400m RSGP and get the crypter to work!

Re?olution - *June 24, 2012, 12:19 am*
Just bought this crypter now, and it is excellent, vouch for DeMoNi.

eleso - *June 24, 2012, 12:50 am*

I tried reflect keylogger and syslogger. I know it doesnt work because i've tried it in about 5 different

vm's, Windows xp, vista, 7, 8 and I tried it on my own personal pc that's running windows 7, still nothing.

DeMoNi - *June 24, 2012, 2:07 pm*

Visuals - *June 24, 2012, 9:16 pm*
Could use help settings up my server, and crypting it. I added you on skype.

.Prince - *June 25, 2012, 1:09 am*
alright bro , spoke to you on skype , all good now ... still on , still offering support

btw guys who pm asking for help in crypting a file , asking for settings , please mention what are you trying to crypt .

Visuals - *June 25, 2012, 1:09 am*
Thanks prince for helping me set up my settings for both my rat and crypter, VOUCH FOR prince, answered any question i asked.

.Prince - *June 25, 2012, 1:17 am*
thanks for the vouch , only few who do vouch back for me even though i helped alot , damn lol ... , btw i accidentally deleted a huge load of new pms , please pm me back if you tried to contact me , thank you , and sorry for the inconvenience ..

BottomNotch - *June 25, 2012, 1:47 am*
Made a Crypt 1 minute ago,
Still 0/37!!
For sure, the longest lasting FUD crypter there is.
Thanks DeMoNi!!!

elmedoc - *June 25, 2012, 3:43 am*
Good Product, work 100%
Tested with blackshades stealth v2 and private http botnet.

DeMoNi - *June 25, 2012, 4:40 am*
Hey guys, here is a little preview of version 4, it should be out soon :
https://gyazo.com/f21d0bd031357dfb137eb0ba349e5052.png?1340623708

Di???c - *June 25, 2012, 5:04 am*
Looks really great, DeMoNi. Looking forward to the new release!

Cheers

SDGDIRKSDG - *June 25, 2012, 5:05 am*
Hey guys, bought the crypter yesterday and still trying to figgure out everything. But I got the following problem and hope someone could give me a push in the right direction.

Ok so I'm using Blackshades RAT. (With the following settings: .NET Settings like DeMoNi told me)
In the crypter I use:
2. Bypass Proactives (because the main screen says I shouldn't use 1: More Stable for Run PE)
I leave Inject to on svchost.exe
I put startup on and type: Svchost (startup key) and svchost.exe for the startup exe
I put Anti's on, Persistence on, Add Junk on and disable REG EDIT on.

In Icon/Assembly I pick java or Firefox, doesnt realy matter by me
For Icon I pick a Adobe or Firefox Icon (Just to test, will use other one in future)

Then in Build I use: No Fake Error message.
No extra options
Pump I put on 1mb
No extensin spoofer
And NO Private Stub (This because if I tick this on I get a critical error message, and i wont make the crypted file)

Ok so then I scan it in the crypter scanner and it gets detected by 5 scanners (Not mayor ones like norton or anything)

So ye thats the problem, I know I could just send DeMoNi a pm but i thought maybe someone else knows how to fix it, cuz I guess DeMoNi gets enough pm's per day to answer :P If I'm wrong I'll def. send him a pm with my problem.

PokerRaiser - *June 25, 2012, 5:20 am*

Dont use any icon and it Will be FUD.
For private stub, you dont own one thats why it does not work.

SDGDIRKSDG - *June 25, 2012, 6:17 am*

Thx allot DeMoNi!!!! Will try now!

EDIT: worked like a charm 100% FUD :) Thanks!

mexhezz - *June 25, 2012, 8:22 am*

Vouch for DeMoNi and Infinity Crypter! I've been using it with CG for about two months now and it works like a charm. It's FUD almost all the times, and when it's not, DeMoNi is really quick in updating it. Now I'm waiting eagerly for v.4! :)

V?mpire - *June 25, 2012, 11:42 am*

Vouch for this crypter. The GUI looks great and everything works, except for some reason when I scan it it's 1/37. Am I doing something wrong?

DeMoNi - *June 25, 2012, 11:50 am*

V4MP1R3 Wrote: *[CITE]* Vouch for this crypter. The GUI looks great and everything works, except for some reason when I scan it it's 1/37. Am I doing something wrong?
I am already on NOD 32 detection ;)
Should be FUD in few minutes.

Beanie - *June 25, 2012, 12:13 pm*

Can someone PM me their fud setup?
Their settings so I can make my crypt fud, everytime I do it I get like 2-4 detections.

I'm using Cybergate.

Thanks a lot.
P.S: Awesome GUI you got there.

V?mpire - *June 25, 2012, 12:22 pm*

(Jun 25, 2012 11:50 AM)DeMoNi Wrote: *[CITE]* I am already on NOD 32 detection ;)

Astrophysics Wrote: *[CITE]* why does bypass proactive NEVER work i have been trying to get it to work for the past 3 weeks and still nothing... could someone help me out or demoni put out a new update to fix it? it use to work until the update that happened 3 weeks ago

I didn't change anything for this injection since a long time. It is just working fine here.

Maybe your rat settings are not correct.

Anyway guys, stub is FUD, but I have to go on vacation with family to Bahamas for one week, I coded a new stub, so if the first one is detected, my friend will update it on the server.

Use Java assembly to have fud results.

Still FUD, still selling, you can use the auto-buy here to receive your product instantly : http://infinityproducts.org/

That means that your crypt did not work properly its executing vbc.exe. You need to use method RunPE Inject to: [*] ItSelf and it will work properly. Currently that method does not work either like it used too.. i am not purchasing this anymore until its fixed. I have been waiting for almost two months and still nothing.. and yes also note that ItSelf won't work on x64 systems only on x32 when he fixes it.. you can crypt stupid files like putty.exe and stuff it will work but crypting actual C++ bot it will just corrupt it.

Spreaders - *June 26, 2012, 9:40 am*

(Jun 26, 2012 09:17 AM)DeMoNi Wrote: *[CITE]* Use Java assembly to have fud results.

Thank you so much for this tip. Finally got me a FUD result. Not really a big deal, as it was only about 2 detections before.

Anyhow, I would like to give a HUGE vouch for this crypter. Been using it for about a week and I have had great results. Awesome GUI and easy to use with good functionality. Great crypter overall and well-worth the money if you're thinking about getting it!

DeMoNi - *June 26, 2012, 9:40 am*

I never said it works with C++ bots, it just worked about arround two weeks, and I never said it was. Anyway I am the only .NET crypter on the market that propose ItSelf injection, but it only works on x32, that the deal.

Anyway v4 is on the way and should be out soon.

And no you didn't wait for 2 months, as it worked only one time two or three weeks ago. I won't fix it right now, it works with 99% of the RATs, stealers, keyloggers ... Just not your stupid IRC bot.

If you need support during this week while I won't have any computer access :

MSN : theheadmaster151@live.com

Skype : supporter747

He can reset HWID, provide licence ...

Haha stupid irc bot? First of all it will not work with anything that does the dropping and i let me rephrase this it will not work with 0 C++ bots... starting from zeus, ngr or any cNc C++ malware.. (lets exclude even IRC bots) if those are stupid malwares then i bow down to you and your skills. Not all of us are here into RATS, Stealers, keyloggers thats getting old. Yes it worked before now it does not.

DeMoNi - *June 26, 2012, 3:03 pm*

(Jun 26, 2012 03:00 PM)daemon10 Wrote: *[CITE]* Haha stupid irc bot? I coded it so it does not work with this type of malware :)

daemon10 - *June 26, 2012, 3:08 pm*

(Jun 26, 2012 03:03 PM)DeMoNi Wrote: *[CITE]* I coded it so it does not work with this type of malware :)
Then it does not make it any different then any other .NET crypter out there. Either that or you can not keep up with detections (easy money on rats, keyloggers and so on?). So it would be nice if you state that in the sales thread so some customers dont buy it.. or when i noticed this problem you kept saying how it works "FINE FOR YOU". Imho crypter is there to protect apps not to make it so some customers cant use it for whatever they like. BLah just another VBC.exe crypt0r. At the beginning i gave you nice vouch for making it different and having it figured out and was sending customers your way. Anywayz thanks for the heads up.

Another few questions..
Whats the point of your Inject to then? If you made it so it doesnt work with this type of malware?
How come you did not notify the ex-customers when you implemented this feature?
What makes it different then any other .NET crypter? Since you stated that you are the only one with Inject to file option?
Is it ever going to be re-enabled?

DeMoNi - *June 26, 2012, 10:41 pm*

This Will be implemented in version 4, I was getting too much reports from this banking trojans.

daemon10 - *June 27, 2012, 4:34 am*

vbc just happens to be a good choice for injection because it accepts NOP parameters, and it is stable? - JeromeMarshall i have nothing more to say to you.. And why the f* would any C++, Delphi crypter fork into vbc.exe? Like i said you said enough lol.

I can give you a crypter thats coded in .NET right now that crypts any type of malware without any problems even on x64. And its not forking into vbc.exe and guess what? Its coded the right way. And i am not talking about rats here we are talking about top-class malware that goes on the market for couple thousand dollars and funny thing is VBC always fails it. Like i said hit me up ill show you .NET crypter that crypts this malware without any problems so you can see correctly coded crypter.

Insomnia had it going with ItSelf injection it was able to crypt anything you throw at it.

Royal ! - *June 27, 2012, 4:50 am*

Then use that crypter why are you then Bullshitting in this Thread here Then?Use the One which you say is working with C++ Malware.

jaisyxxx - *June 27, 2012, 5:53 am*

Crypter suddenly closes when i want to scan my server file, is the server down?

kinky82 - *June 27, 2012, 6:21 am*

Just two questions,how many days stub stay fud? arrive to one week or need daily update due to huge number of customer?
There is any customer here that manage >2k of blackshades bot and can give me a % rate of success update whit server crypted whit infinity?
Thanks

Waterroll - *June 27, 2012, 6:57 am*

huh, does this keep getting updated?
Or is demoni leaving :O
Anyone getting FUD results af of we speak?

Cape - *June 27, 2012, 8:37 am*

Well on v4 we will have random stub options so every one get unique output and FUD time will increase. ?

And for execution rate example: If you buy or convert 100 bots from different RAT to your personal RAT so you will get 95 bots for sure. Thatswhy I like Infinity Crypter because it have good FUD time with good execution rate! ?

DarkWraithh - *July 5, 2012, 8:21 am*
Completely FUD for me. Thanks DeMoNi

Beanie - *July 5, 2012, 8:33 am*
It doesn't seem to be anything different from the previous version?

Detection is currently 4..

Blueberrysky - *July 5, 2012, 8:56 am*

The binder is still not working ^^ but when you are connected just PM me on skype I need help for something with your crypter.

DeMoNi - *July 5, 2012, 9:41 am*
??|?? Wrote: *[CITE]* It doesn't seem to be anything different from the previous version?

Detection is currently 4..It is 1 if you try some assembly, and change icon with reshacker.

Blueberrysky Wrote: *[CITE]* The binder is still not working ^^ but when you are connected just PM me on skype I need help for something with your crypter.It has always bin working, I don't know what is your problem.

Zooplet - *July 5, 2012, 9:47 am*
This crypter is never FUD i suggest you guys to not buy this he banned me aswell of the crypter i did buy lifetime and now gf 50$!!!

Beanie - *July 5, 2012, 9:56 am*
Is it possible to make it 0 detection rate, or?

DeMoNi - *July 5, 2012, 10:00 am*
Zooplet Wrote: *[CITE]* This crypter is never FUD i suggest you guys to not buy this he banned me aswell of the crypter i did buy lifetime and now gf 50$!!!Multi-accounter, and infecting HF members, just GTFO.

??|?? Wrote: *[CITE]* Is it possible to make it 0 detection rate, or?You can get 1 or 0, depending on your RAT server size. I am fixing it, be patient.

kimgage - *July 5, 2012, 11:09 am*
Yep it will be FUD and i really appreciate and support the hard work, but what about the 6-8 days that we wasted ? my license is running out and not sure if im going to renew.

Blueberrysky - *July 5, 2012, 11:17 am*
(Jul 5, 2012 10:39 AM)?atchet Wrote: *[CITE]* Helped this guy. He no longer has anymore problems. The binder works fine. :)
It's true. Thank you ?atchet. But as you know it, I always have the problem with my keylogger that is not cryptable with InfinityCrypter. .NET keylogger with a good code ^^.

superfrog - *July 5, 2012, 11:29 am*
Its not fud for me at the moment still 4 detections, it hasnt updated since the previous version anything I can do?

DeMoNi - *July 5, 2012, 11:35 am*
(Jul 5, 2012 11:17 AM)Blueberrysky Wrote: *[CITE]* It's true. Thank you ?atchet. But as you know it, I always have the problem with my keylogger that is not cryptable with InfinityCrypter. .NET keylogger with a good code ^^.
You just use C/P keylogger functions, that are not compatible with reflection, used to load the file into memory.

superfrog Wrote: *[CITE]* Its not fud for me at the moment still 4 detections, it hasnt updated since the previous version anything I can do?
I updated the stub but you don't see it as it is stored online.

Crayz - *July 5, 2012, 1:31 pm*
Thanks for the quick update. I just crypted a blackshades server it's 1/37 right now.

DarkWraithh - *July 5, 2012, 2:02 pm*
I do find it amusing that with a icon, it becomes FUD, without one, it's 4/37. I'm not complaining, I was putting a icon anyway. I just find it funny because it's usually the other way around.

PokerRaiser - *July 5, 2012, 3:03 pm*
(Jul 5, 2012 11:09 AM)kimgage Wrote: *[CITE]* Yep it will be FUD and i really appreciate and support the hard work, but what about the 6-8 days that we wasted ? my license is running out and not sure if im going to renew.
Yes, same here
I know he is doing his best to make it FUD, but we really wasted a lot of days on our license when he was away on vacation

ANONYMOUs - *July 5, 2012, 5:41 pm*
demoni please!! get proactives working... PLEASE!!!! i havent gotten anyone for like 2 weeks because your crypter doesnt stop proactives and i know i should be getting people because i have 300 downloads but no people... and the server isnt corrupted cuz i clicked it myself and i connect fine if i have proactives off on norton, kaspersky, nod32 and bit defender

Pacivility - *July 5, 2012, 6:18 pm*
I am really really frustrated i am not getting what i have paid for. it is still not fud at all

ANONYMOUs - *July 5, 2012, 9:44 pm*
(Jul 5, 2012 06:18 PM)yellownblue Wrote: *[CITE]* I am really really frustrated i am not getting what i have paid for. it is still not fud at all
if its fud and doesnt bypass proactives it wont even matter that its fud...

Ghost.13 - *July 6, 2012, 2:23 am*
I am now part of the support team for Infinity Crypter.

Any questions regarding how to get FUD results, or problems with the crypter like .NET shiz, you may PM me and I'll help you out.

Good day.

DeMoNi - *July 6, 2012, 5:02 am*

Ghost.13 is now part of the team, and for any question that you have regarding the crypter (except HWID problems), you can contact him instead of me for a faster answer.
I also got the results of my exams, which are very good, I got A+ in Maths, Physics and Biology, only 5 people out of 90 did like me. My new PC is ordered, I should receive it soon (in max 3 days), and therefore, the developpment of v4 will be faster :)
Thanks to everyone that bared with me during my exams, and my holiday week. I will never let Infinity down trust me.

Leg?nd - *July 6, 2012, 5:06 am*

Pacivility - *July 6, 2012, 1:25 pm*

Not fud at all for me havent been able to get anyone in a week or so. very very frustrated.

Re?olution - *July 6, 2012, 8:35 pm*

Yea this isn't FUD at all lol =/ Getting detected even by MediaFires scanner...

organic - *July 6, 2012, 8:42 pm*

Does this count during our subscription time? You on vacation no FUD etc etc?

Beanie - *July 7, 2012, 2:11 am*

He's back, he stated it'd be fud when he came back, that was 2 days ago.. :/

kimgage - *July 7, 2012, 3:27 am*

Thanks god that i only bought this for 1 month only... 2 weeks FUD + Updates, other 2 weeks totally wasted...

Beanie - *July 7, 2012, 3:40 am*
Unless he fixed his crypters detection, he'll have the minus rep I gave him.
I'm annoyed, purchased a few weeks ago and unable to do anything as it's detected on almost all anti-virus programs..

Rev3rse - *July 7, 2012, 10:16 am*
Too expensive for a VB.NET crypter :s

DeMoNi - *July 7, 2012, 10:40 am*
Just got my new PC, installing everything to code, and I will finish stub.

Its Undetected again,Im really dissapointed by the crypter...
Detected by AVG Free,Dr.Web,F-Secure

organic - *July 7, 2012, 11:19 am*
Honestly we should receive some compensation. I know you want to keep your money and all that's fine (not really), but at least add some time onto everyone's account for all the downtime you've had. BS.

DarkWraithh - *July 7, 2012, 12:05 pm*
Hey guys, it's alright. DeMoNi went on vacation, everybody needs a break. He got his new PC, and he just needs time to get everything on it. I'm sure you guys know how long that takes sometimes.

I understand wanting some time added, and i'd appreciate it too, but thing is he did warn us that we was going to be leaving for a week. Honestly, I'm sure this crypter will be back and fixed in just a day or two, and until then I say we relax a bit, and give DeMoNi a break. Doing this isn't easy ya'know?

arrogantlyfly - *July 7, 2012, 12:32 pm*

check this

The post has successfully been reported. You can now close this window.

OT: The crypter was simply awesome up until 2 weeks back. It was FUD very often.
Right now it's never FUD. And i wouldn't mind even getting it quite UD, but norton and AVG detect it often (AVG ALWAYS) so it's pretty useless...
I'm pretty sure it's just a short amount of time that demoni will be "gone" or "busy" so i guess it should be any time soon until it's back on track...

Normally i wouldn't care. 2 weeks that have gone. i can live without it for 2 weeks.
What i DON'T like though is the fact that these are two weeks that i've paid for... Soon my subscription will run out... It's a shame that 2 weeks were wasted. It's my money that's just paid for his holiday.
I would say compensate people for the 2 weeks or so that you were away. Give them +2 weeks. But of course it's your choice.
I would be much more angry if he hadn't provided such a good service before his little break...

Yellow Skull - *July 7, 2012, 4:29 pm*
Don't post scans on the thread

Message the support team and be patient please

As it is hard for owners to keep on top all day everyday

Just wait for update

Ghost.13 - *July 7, 2012, 5:36 pm*
Update from Demoni himself:

He will be reFUDing the stub (he didn't mentioned how long it would take, so please be patient), and at the same time, release v4 of the crypter.

I also asked him if he would be willing to extend some subscription time for clients who didn't had a good time with the product, and he said that MAYBE he would extend their licenses for one more week, and I personally think that is fair enough.

We would like to apologize for this inconvenience though, as we don't control all factors for the crypter's quality, but we are trying our best to give you the best service you can get.

PokerRaiser - *July 7, 2012, 5:48 pm*
Of course I would also enjoy 1 week extension on my license BUT

The questions is what is written when we purchased the crypter
Does it say that he has to make it fud 0/37 within a certain time and if not he will extend our licenses?

I mean, if I pay my ISP a monthly fee and they cannot provide me with Internet for a week, I'm sure they would compensate me somehow because they were suppose to give me Internet 24/7

Again, it's down to what was promised back when we purchased the crypte

I'm just saying ?

Ghost.13 - *July 7, 2012, 5:53 pm*

(Jul 7, 2012 05:48 PM)PokerRaiser Wrote: [CITE] Of course I would also enjoy 1 week extension on my license BUT

Your ISP != Our crypter.

The coder always has his own freewill to decide what is supposed to happen. I asked him to give extensions just to compensate everyone who aren't satisfied with the product, just as you were saying, but if he refuses to give it, then there's nothing you can do about it since giving extensions isn't as easy as it seems, plus the fact that updates would be useless if the extensions would cause it to be unFUD within a few days time.

DeMoNi - *July 7, 2012, 5:57 pm*
This is how things will unfold :

- I will release a new FUD stub tommorow.
- I will release v4 in arround 2 weeks.
- Customers will get one week subscription for the problems we had.

Thanks everyone.

arrogantlyfly - *July 8, 2012, 6:36 am*

Yehp we are just bullshiting and getting nothing from it,great,you are right sir.

DeMoNi - *July 11, 2012, 8:16 am*

(Jul 11, 2012 08:05 AM)The_Blood_Justice Wrote: *[CITE]* @DeMoNi

I'm not alone.
Don't try to fuck me.

You need to refud your RunPE, because he isn't fud runtime for all antivirus like Malware Bytes,BitDefender and NOD32...
You don't even know what you are speaking about, MBAM and BitDefender uses HIPS protection that detect what your file do (even in memory and injected), therefore using a non self coded and public rat like darkcomet or blackshades will be detected, this has nothing to do with the runpe, it is only based on RAT behaviour. And it does bypass NOD 32 because it doesn't include HIPS protection.

????CK345? - *July 11, 2012, 8:26 am*

(Jul 11, 2012 12:50 AM)Ghost.13 Wrote: *[CITE]* Just make sure you have the proper .NET Framework to run the program.
Thank you, I was just confused on whether or not it was locked by HWID. I'll purchase in the near future.

alphadelta12 - *July 11, 2012, 8:50 am*

I am having issues after changing from Darkcomet to Blakshades, DEP protection is blocking both the crypted and uncrypted versions of my BS server. Is there any changes to settings that I should use to resolve this problem?

Username Unknown - *July 11, 2012, 9:24 am*

Thanks for the update! It's FUD again!

Process - *July 11, 2012, 11:06 am*

Everyone needs to shut the fuck up about the RunPE. Hopefully it will be updated in V4.

DeMoNi - *July 11, 2012, 1:56 pm*

I am coding v4, if anyone want to join and see ^^ : https://join.me/589-281-677

????Chicago Bulls - *July 11, 2012, 3:11 pm*

demoni, Go back on join.me, It seems to be off or you left! i am really bored. so yeah.,

but your crypter is nicee.

Ghost.13 - *July 11, 2012, 4:24 pm*

If you have any questions regarding the crypter, kindly PM me, as Demoni might be busy coding v4.

I will be on for a few more hours to answers questions related to the crypter.

Thanks.

OCD - *July 11, 2012, 5:43 pm*

Hello
does it work with Zeus or Spyeye?
Cheers

ANONYMOUs - *July 11, 2012, 5:57 pm*

(Jul 11, 2012 08:16 AM)DeMoNi Wrote: *[CITE]* You don't even know what you are speaking about, MBAM and BitDefender uses HIPS protection that detect what your file do (even in memory and injected), therefore using a non self coded and public rat like darkcomet or blackshades will be detected, this has nothing to do with the runpe, it is only based on RAT behaviour. And it does bypass NOD 32 because it doesn't include HIPS protection.
so does KIS,Sonar have this HIPS protection aswell? if so whats the point of even having bypass... and if not.. then it is your bypass proactives

Scanned by CloudCrypter.net - Online Scanner & Crypter
I used these exact settings, crypted the same server that worked with infinity before but it's still having the same problem.
Windows defender is blocking it even though the scanner says it's FUD 0/37... The .exe isn't executing properly by the looks of things, it just opens a batch file like this.
This is what it looked like when i tried to run on one of my slaves.
[img]http://screensnapr.com/e/SSWtBd.jpg[/img]
It's like this for ALL of my slaves.
I have made a new server, with the most basic options for a crypter (Which previously worked with infinity), i have changed TONS of settings in infinity crypter and it still won't work.
Still nobody has a solution for me? I'm using blackshades, is anybody else using blackshades and having problems?

DeMoNi - *July 17, 2012, 10:00 am*
Stop posting on thread Coral Beef, PM me instead.

Coral beef - *July 17, 2012, 10:19 am*
(Jul 17, 2012 10:00 AM)DeMoNi Wrote: *[CITE]* Stop posting on thread Coral Beef, PM me instead.

Can i ask why? You're pretty inactive from hackforums, you're obviously busy with more important things and you have a whole bunch of people who are willing to help looking at this thread, along with a lot of other HF community members who can also help me with my problem?

And why do i have to PM you instead of you PM'ing me? You clearly know my problem now? I really need to copy and paste it for you?

I'm not arguing, just curious as to why you don't want discussion taking place in here. I assumed it would make your life EASIER if anything :/

DeMoNi - *July 17, 2012, 10:34 am*

I know, but the problem is not related to the crypter, it is due to blackshades behaviour, that drops logs in system folder. Therefore it is detected at runtime.

Coral beef - *July 17, 2012, 10:38 am*

(Jul 17, 2012 10:34 AM)DeMoNi Wrote: *[CITE]* I know, but the problem is not related to the crypter, it is due to blackshades behaviour, that drops logs in system folder. First of all, yes it is. http://elementscanner.net//?RE=08922a17f8d88184d127b932c8e8efdf

Second of all, you're most likely going to lose your license, as clearly after crypting a file it says NEVER to use Metascan-online.

This is why the crypter becomes UD faster than it should be. Because people cant read.

DeMoNi - *July 17, 2012, 5:03 pm*

(Jul 17, 2012 04:49 PM)CybergateMe Wrote: *[CITE]* First of all, yes it is.

Listen to this while reading it:http://www.youtube.com/watch?v=8UVNT4wvIGY

Now and then I think of when we were together
Like when you said you were fud
Told myself that you were the best one out there
But felt so iffy as your costumer
But that was love and it's an ache I still remember

You can get addicted to a certain kind of sadness
Like stop spreading with knowing that you are fud
So when we found that we could not make sense
Well you said that we would still be friends
But I'll admit that i wanted to hang up when it was over

But you didn't have to ban me off
Make out like it never happened
And that we were nothing
And I don't even need your love
But you treat me like a f-a-g-g-o-t
And that feels so rough
You didn't have to stoop so low
Have your friends see it and ban me
I guess that I don't need that though
Now you're a crypter that i used to own

Now and then I think of all the times you scanned me over (just once)
But had me believing it was always something that I'd done

And I don't wanna live that way
getting scanned on metascan everyday
You said that it was accidently done
And I wouldn't catch you scanning with metascan a crypter that you used to own...

But you didn't have to ban me off
Make out like it never happened
And that we were nothing
And I don't even need your love
But you treat me like a f-a-g-g-o-t
And that feels so rough
You didn't have to stoop so low
Have your friends see it and ban me

Use Java assembly + adobe flash icon.

It will be FUD.

(Jul 18, 2012 12:45 AM)C4P3 Wrote: [CITE] DeMoNi , when you will add the promised 1 week free time ? i dont get it till now and my licencse runs out soon...
I already said it will be added after v4 release.

(Jul 18, 2012 04:17 AM)ott-hon Wrote: [CITE] It will be good to add some sites to upload the exe without distributing the sample, and some sites where is not good to upload like dropbox etc for the noobs
I added it in crypter TOS for v4, but trust me, noobs will still do this shit, they don't even read TOS or rules.

GearCEO™ - *July 18, 2012, 8:36 am*

Its 100% FUD mate. You have to use HQ Icon to make it FUD Simple! DeMoNi please concentrate on you v4 project and release this ASAP because we can't wait.

Tommorow mostly if I can get all my stuff working fine.
It will be a beta v4, as everything won't be 100% finished, but I can see you guys are not really patient so ^^.

DarkWraithh - *July 18, 2012, 11:42 am*
Thanks DeMoNi for all of your hard work.

There were a couple weeks where the crypter was pretty much useless, but thank god that it's better now. Constantly FUD, and if it isn't, it's barley detectable with just 1-4 AV's picking it up. Plus very fast updates, that where before I even have a chance to notice that it isn't FUD, you already have an update for it.

Thanks again bro, and don't listen to these other guys, take your time with v4, and make it great like I know you're going to do.

Process - *July 18, 2012, 11:43 am*
You can't really blame people for not being patient. Its just such a good crypter people are excited to get a new version :D

Bots4Sale - *July 18, 2012, 11:43 am*
revouch DeMoNi is legit and a hard working man keep it up bro

You don't even know the story.

First of all, I coded the stub for cloudcrypter and updated it during 3 months, I am waiting for my 50% fee, and never got paid by Napster.
Cloudcrypter current customers will be moved to his new project.

Coral beef - *July 21, 2012, 7:14 am*
Well i'm not getting anywhere with this crypter right now.
Can i ask, is anybody here using blackshades and cryping with infinity? If so do does it actually work? Like, does it execute properly and isn't detected by AV's (I don't want the scanner result, i'm asking if anybody can check if it actually works on a LIVE person)

Nelson™ - *July 21, 2012, 7:42 am*

I use BlackShades with Infinity Crypter and I get FUD results. It works absolutely fine. Just make sure when you make your server in bshades, you select .NET crypter settings.

Coral beef - *July 21, 2012, 10:21 am*
(Jul 21, 2012 07:42 AM)theNelson Wrote: *[CITE]* I use BlackShades with Infinity Crypter and I get FUD results. It works absolutely fine. Just make sure when you make your server in bshades, you select .NET crypter settings.
I have done so. The most basic settings.
Are you sure it's actually working though? I also get FUD results when i scan. But when i actually use it, so many AV's pick up on it and it doesn't connect even with the ones that do not detect it.

Have you actually used it and it has worked?

DeMoNi - *July 21, 2012, 10:40 am*

Blackshades works perfectly with Infinity Crypter, and is more stable than Darkcomet.

Have you actually used it and it has worked?
I don't have this crypter, nor did I buy it.

But, it seems that you are using your blackshades server to start up.

So what it is doing is almost unpacking your blackshades server, revealing that it is a virus. What I think you need to do is use the crypters startup feature (if it has one), and uncheck the startup feature on Blackshades.

Turkoz - *July 22, 2012, 6:46 am*

Hey does this works on DarkComet, and does it work good and flawless? and is DarkComet a .NET

Username Unknown - *July 22, 2012, 7:04 am*

Nelson™ - *July 23, 2012, 9:08 am*
This crypter is awesome! My bins have been FUD for a long time. I haven't had to update them in about a week. :)

DeMoNi - *July 23, 2012, 2:57 pm*
The crypter is still FUD, and listen guys, I worked all the day on a new Storage Method, and I got one working :) It is completely private, and as far as I know, no one currently use it.
I will work on another too during this night, so for version 4, there will be arround 4 differents storage method to use :)

.Ganja - *July 23, 2012, 3:01 pm*
Vouch for this crypter, keeps crypter updated with unique stub, vouch for Demoni.

ott-hon - *July 24, 2012, 1:59 am*
your own server without AV scan and direct links? or what ? :D

PeWz - *July 24, 2012, 2:14 am*
Damn crypter looks amazing mate! I'm buying this till i get $50 :)

D?xing - *July 24, 2012, 6:07 am*
(Jul 23, 2012 02:57 PM)DeMoNi Wrote: *[CITE]* The crypter is still FUD, and listen guys, I worked all the day on a new Storage Method, and I got one working :) It is completely private, and as far as I know, no one currently use it.
I will work on another too during this night, so for version 4, there will be arround 4 differents storage method to use :)
You mind replying to my pms bro thanks

? DavidCz ? - *July 24, 2012, 10:40 am*
I've just bought it, I receive it via autobuy in some seconds, it works, great great great product ! Vouch for him ;)

DarkWraithh - *July 24, 2012, 12:07 pm*
I have two days left on my license, and i'm still going to get the extra week for when v4 drops? I know that It won't be ready in two days, so I'm just trying to figure out if I should go ahead and buy another month.

Thanks for the vouch bro :) It is true, this crypter is up since a long time now ^^

(Jul 24, 2012 01:59 AM)ott-hon Wrote: *[CITE]* your own server without AV scan and direct links? or what ? :D
What do you mean ? If you are speaking about the inbuilt scanner I use scan4you API.

(Jul 24, 2012 10:40 AM)Davidlecouz Wrote: *[CITE]* I've just bought it, I receive it via autobuy in some seconds, it works, great great great product ! Vouch for him ;)
Thanks for your vouch, the auto-buy for PayPal provides you an instant delivery :)

(Jul 24, 2012 12:07 PM)WraithhDark Wrote: *[CITE]* I have two days left on my license, and i'm still going to get the extra week for when v4 drops? I know that It won't be ready in two days, so I'm just trying to figure out if I should go ahead and buy another month.
As I told everyone, the week will be added at v4 release, which will occur before Friday. My website is 100% done, therefore I can concentrate my efforts on v4.

Still FUD since now days, still selling, you can use the auto-buy here to receive your product instantly : http://infinityproducts.org/pricing.html

Guys, I just completely finished my website for Infinity Products, and I am working hard for version 4.
ETA is in 48 hours.

You can find everything you need here : http://infinityproducts.org/

A forum will be included soon.

Stay tuned ;)

daemon10 - *July 24, 2012, 6:35 pm*
Does it work with bots now or not ?

Ghost.13 - *July 24, 2012, 8:59 pm*
(Jul 24, 2012 06:35 PM)daemon10 Wrote: *[CITE]* Does it work with bots now or not ?
I believe it does work with bots, depends on what your bot is.
For compatibility issues, just PM the coder.

WizLundin - *July 25, 2012, 5:58 am*
Is there any tutorial on how to use this?

Ghost.13 - *July 25, 2012, 6:02 am*
(Jul 25, 2012 05:58 AM)lundinzz Wrote: *[CITE]* Is there any tutorial on how to use this?
There is none I believe.
I don't think there would be one since there is no definite way to use it, as the settings differ depending on where you'll use it.

arrogantlyfly - *July 25, 2012, 10:18 am*

I only got 10 hours left on mine, will I still get the week added?.. :s

and also why does it say this?

[IMG]http://img338.imageshack.us/img338/2448/erroruy.png[/IMG]

darkdream - *July 25, 2012, 10:54 am*
the crypter hide when i click build ,need the dl link to exe infinity please

WizLundin - *July 25, 2012, 10:58 am*
What settings should i use lol? im new to this..
Settings to Keyloggers?

I have the same problem, what is that ??

DeMoNi - *July 25, 2012, 11:27 am*
The website is currently down, therefore, Infinity Crypter won't be working for some minutes or hours.
Don't worry, I am trying to do all my possible to make it work again.

? DavidCz ? - *July 25, 2012, 11:30 am*
Ok, no problem :)
thanks you for the answer :)

DeMoNi - *July 25, 2012, 11:42 am*
Fixed the website, crypter should work again, sorry for the downtime of one hour.

Beanie - *July 25, 2012, 11:46 am*
Only problem now is when I try to crypt I get "not responding".

Invicta - *July 25, 2012, 11:49 am*
If this is actually FUD for more than 2 hours I'll consider buying it.

darkdream - *July 25, 2012, 11:51 am*
critical error please try again later

DeMoNi - *July 25, 2012, 11:57 am*
(Jul 25, 2012 11:49 AM)V???????????????????????? Wrote: *[CITE]* If this is actually FUD for more than 2 hours I'll consider buying it.
Yes it is FUD since now one week.

Anyway, the problem when building your crypted file come from the fact that there is a problem with the net seal online API.
It is not under my control, but it should be back soon.

arrogantlyfly - *July 25, 2012, 12:50 pm*

(Jul 25, 2012 04:47 PM)daemon10 Wrote: *[CITE]* Demoni does it work with C++ malware.. you said it will be fixed so i am asking ? Is it

I fixed it with the help of a coder friend for the v4. You can know inject to itself on x64 again !

I am adding EOF support too, so many malware using it can be crypted.

The only bots I can't make working with my crypter are the one that inject themself to native processes.

n0$f3ratu$ - *July 26, 2012, 7:55 pm*

Yes thank you buddy ;)

Anyway everyone, I have to one week in vacation in 4 hours.
I will be back next Saturday, crypter stub is still FUD and I hope it will stay.
The base of v4 is 95% done, just need to fix some bugs, and run some intensive tests. Therefore I prefer to release it when I come back, or maybe during my week of vacation if I have an access to the internet(I will take my laptop)
For any problem regarding payment, support, contact supporter747 on skype.

Cape - *July 27, 2012, 6:53 am*

Sure you used right settings for your bot ?

Beanie - *July 27, 2012, 8:37 am*
Are you using sandboxy when you're executing the .exe?

??????l??¢??? - *July 27, 2012, 1:27 pm*
Damn it. It's not FUD at this moment. 6/37. Tried to get a victim, and his antivirus detected it as Trojan. This totally fucked me up, the reason I bought the crypter was to get this victim, and now he will never open an image given by me.

Btw I binded an image, and spoofed the extension to jpg.

It's back to 0/35 in element scanner!

DeMoNi - *July 27, 2012, 2:29 pm*
virtualhacker, the crypter is not detected, it is only due to the fact that you used the JPG icon which is heavily detected.
So please use another one, and remove your scan from thread as it only your fault and not crypter's one.

TheKey - *July 27, 2012, 3:53 pm*
(Jul 27, 2012 01:27 PM)??????l??¢??? Wrote: [CITE] Damn it. It's not FUD at this moment. 6/37. Tried to get a slave, and his antivirus detected it as Trojan. This totally fucked me up, the reason I bought the crypter was to get this slave, and now he will never open an image given by me.

Btw I binded an image, and spoofed the extension to jpg.

[img]http://elementscanner.com//image.php?ID=8e6d80ef6328f9ab03a657306af282a2[/img]
Look at the detection, it states the IMG is detected. Use GIMP to slightly change the .ico image :)

Always, ALWAYS scan the crypted file before sending it, especially with an icon ;)

TIP: Don't use any assembly information, some claim it will bypass AVG, but instead it'll alert other antiviruses if the stub is already FUD :D

Knight Sniper - *July 27, 2012, 5:23 pm*
Cape and Demoni have been very helpful and this is a wonderful service! thanks guys so much! VOUCH!

are you using VBC injection method? if so then your OS is messed and you need to format and reinstall

DarkWraithh - *July 27, 2012, 10:13 pm*
I've had this crypter for a month now and I have mixed feelings about it. First off, it was bad the first week or so, but that was because he was on vacation. This past week has been amazing with it's FUD time.

I have just ran out of time on the crypter, but considering the fact that he just went on ANOTHER vacation, i'm not sure if I want risk a repeat of what happened before. Also I know that i'm going to get a week time added on. I was counting on that coming today, because he said v4 would drop today, but now he's saying that it isn't.

Don't get me wrong DeMoNi, i'm a huge fan, and I love the crypter. I just wanted to leave feedback to people looking to buy this crypter. All in all, i'd vouch for you because the positives out way the negatives with this product, and i'll definitely purchase another license depending on when the week gets added.

Anyway, have fun on vacation DeMoNi, everybody needs a break.

Ozymandias - *July 29, 2012, 9:55 am*
this is the sexiest crypter I've used, huge vouch!

Beanie - *July 29, 2012, 10:02 am*
Can't wait for V4, should be even sexier, hopefully?

PokerRaiser - *July 29, 2012, 12:00 pm*
does anyone have any idea about runtime fud for Infinity 3.9.9.7?

thx

DeMoNi - *July 29, 2012, 12:57 pm*
(Jul 29, 2012 12:00 PM)PokerRaiser Wrote: *[CITE]* does anyone have any idea about runtime fud for Infinity 3.9.9.7?

thx

It is 100% FUD scantime/runtime currently.

Anyway guess what guys ?
v4 coming in 30 minutes :)
Just let me some time to upload stuff and we are ready to go ;)

Bots4Sale - *July 29, 2012, 1:13 pm*
fuck me 4.0 lookes nice DeMoNi keep it up

DeMoNi - *July 29, 2012, 1:14 pm*
Just released v4 for everyone, reload crypter and you will have it ;)
Please contact me if any bugs are found, and don't post it here.
Moreover, you should hurry up before price will raise because of version 4.

Don't worry, I plained to add it back ^^
Anyway, any feedbacks guys ? Because I know you were impatient to get it but now, everybody is busy using it xd.

Ghost.13 - *July 29, 2012, 4:01 pm*
New GUI is pretty cool.
Features are simple and easy to use.
I don't use it nowadays, I only have it for support, just tested it, and I got 1/37 (AVG) which is not bad after all. Didn't really stirred up the settings to get FUD results since I'm not using it.

Good job Demoni. :)

Steven Bonnell II - *July 29, 2012, 4:01 pm*

This is the crypter I was waiting for. multi binder with encryption and one time execution. btw sales pic needs a update, and your text after your name, the new icon looks like some white hat tool :D

Vouch for this, lot of new things and always FUD !!!

PedroDJ - *July 30, 2012, 1:02 am*
Hi man,

today I have updated Infinity Crypter but NetSeal return me an error: can you fix it ?

Regards

Janitor - *July 30, 2012, 1:08 am*
Just bought it! Will give my opinion soon. Btw what is EOF? I can't seem to find the pre-loaded icons also...

.Ganja - *July 30, 2012, 1:49 am*
EOF is End of File, do some research, its on HF and Google.

alphadelta12 - *July 30, 2012, 3:30 am*
WOW to V4, so glad I bought Lifetime the other day, this really is amazing Demoni, top job!!!!

Cape - *July 30, 2012, 3:40 am*
Hello Infinity Customers: I am Reseller/Co-Owner of this Crypter. If anyone having HWID problem/sales/support [OR] If you want any information before buying license, Just Contact ME 24/7 Online :

Vouch for this crypter, It has lots of nice features 9/10!

GearCEO™ - *July 30, 2012, 4:28 am*
Bro please check ur pm or email ASAP.
Regards

Janitor - *July 30, 2012, 5:06 am*
For all those wondering, this is better than cube crypter, so if you are stuck between those 2, go with infinity. I was actually shocked to see infinity being fud, didn't think a 20$ crypter was that good, last

crypter I bought from 4th dimension sucked.

Matrix*.* - *July 30, 2012, 5:15 am*

Hello Cape,
thanks for fast and perfekt support
All is ok :-)
Infinity is a great crypter

p4n1c - *July 30, 2012, 5:18 am*

Vouch for infinity crytper V4 is great and support is very good! Thanks for the awesome Crypter.

Create à new folder, and pût Infinity in it.
Then try to relaunch crypter.made a new folder
copied only Infinity.exe into the new folder
I ran it and it started
now in new folder I see 2 files.
Infinity.exe and Mono.Cecil.dll
Do I need to copy the rest of the files as well?
Thx

when I crypt with "keep EOF" I get 2/37
when I crypt without I get 0/37 and the file is 4kb smaller as well

TBO I have now idea what's EOF :)

Username Unknown - *July 30, 2012, 8:15 am*
V4 is amazing! Thank you so much for the time and effort that you put into it DeMoNi!

GearCEO™ - *July 30, 2012, 8:23 am*
Bro I am still online just because I want to update my HWID. Please when you come back then wait for me. And I want to talk about Cap as well. Please don't go away. I will come back after 1.5 hour.

Regards

I am here buddy please respond me ASAP. I am waiting.

Chilloh™ - *July 30, 2012, 10:34 am*
Demoni can you add me on skype : kalashpure-01 please

I can't find on the site for 50$ lifetime

Devising - *July 30, 2012, 12:02 pm*
v4 is sick i cant wait till all the features are done and fully working

DeMoNi - *July 30, 2012, 12:37 pm*
EOF is used by some bots (that I can't give the names here), it may cause your file to be detected, therefore if your bot doesn't use it, simply unselect it from advanced options tab.

Jeung - *July 30, 2012, 12:46 pm*
ABSOLUTELY HUGE VOUCH FOR DEMONI and V4!! OMFG FUD and NOW BYPASSING SONAR EXCELLENT GUY EXCELLENT CODER!!

aakkoset - *July 30, 2012, 12:49 pm*
Nice job on v4, I seriously like the new copy function and the new look is so simple to understant. :)

PokerRaiser - *July 30, 2012, 1:53 pm*
what do you like the best in v4?

I like both the icon changer and the assembly cloner
but I think I have to go with the assembly cloner

DeMoNi this is the next generation crypter! ?

DeMoNi - *July 30, 2012, 2:25 pm*
Guys, infinity bypass KIS 2012, Sonar, and other few pro-actives ;)
Don't miss out this crypter.

alphadelta12 - *July 30, 2012, 2:52 pm*
V4 is awesome, infinity now blows every other crypter I have used out of the water

DeMoNi - *July 30, 2012, 3:49 pm*
Thanks for all the vouches guys ;)
Still FUD also ^^
I am fixing some bugs in the crypter, will release an update.

Chilloh™ - *July 30, 2012, 5:33 pm*
I just bought the crypter and i get an error if i redeem it , it says "One or more value have a bad lenght"
EDIT:
VOUCH FOR THIS CRYPTER the owner helped me in 2 minutes

Install the .net framework 2.0 and it Will work.

kangoo13 - *August 1, 2012, 10:34 am*

does the startup fonction works actually or you got problem with it ?

DeMoNi - *August 1, 2012, 10:47 am*

(Aug 1, 2012 10:34 AM)kangoo13 Wrote: *[CITE]* does the startup fonction works actually or you got problem with it ?
Thé crypter startup fonction works and bypass proactives, however you CAN use your RAT's one along ItSelf injection.

« ?inja » - *August 1, 2012, 11:26 am*

What is the average size of a crypted file? Would love to buy 6 months of this but I need the size to be pretty small so that I can work out the kinks of my new spreading method..

kangoo13 - *August 1, 2012, 11:32 am*

Demoni is that normal my file crypted is notified by AVG and avira ? :/

These are 2 known AV..

DarkWraithh - *August 1, 2012, 11:50 am*

My server is 695 KB, and I have no binds or icon. One that I had before v4 was 1,174KB. You can also pump your file with this crypter to make it bigger if you wanted.

DeMoNi - *August 1, 2012, 12:11 pm*

(Aug 1, 2012 11:26 AM)« ?inja » Wrote: *[CITE]* What is the average size of a crypted file? Would love to buy 6 months of this but I need the size to be pretty small so that I can work out the kinks of my new spreading method..
Stub Size is 25KB, add this to thé current Size of the file you want to crypt, nexr update Will also include compression option.

(Aug 1, 2012 11:32 AM)kangoo13 Wrote: [CITE] Demoni is that normal my file crypted is notified by AVG and avira ? :/

No it is not, try to not Check EOF and dont change icon or assembly.

kangoo13 - *August 1, 2012, 12:12 pm*
Yes when I untick EOF it works but what EOF does in a RAT ? is it important?

DeMoNi - *August 1, 2012, 12:19 pm*
(Aug 1, 2012 12:12 PM)kangoo13 Wrote: [CITE] Yes when I untick EOF it works but what EOF does in a RAT ? is it important?
If it does work after crypting, it doesnt matter for you. It is used by some bots to store server config data.

kangoo13 - *August 1, 2012, 12:26 pm*
ok it works , thank you a lot

Merci bien de ton super crypter :P

DeMoNi - *August 1, 2012, 3:06 pm*
Updated thread design, in-built chat system gonna be added soon in Infinity too.

v4 is more powerfull and better than v3, that explains the reason for raising the prices.
Moreover, you prefer a cheap ass crypter that die one month later when you paid for a lifetime licence ? Think a little bit, this prices are correct, not too cheap, not too expensive, affodarble for a lot of people, and safe from noobs.

Trinitite - *August 1, 2012, 5:32 pm*
I guess but it would still be nice with a lifetime license

Ghost.13 - *August 1, 2012, 5:33 pm*

(Aug 1, 2012 03:21 PM)thomja Wrote: [CITE] The new payment system that says 55 dollars for 6 months sucks!

Simple explanation.
V4 is better and more stable.
Plus, giving lifetime licenses kills the product.

DeMoNi - *August 1, 2012, 5:38 pm*

(Aug 1, 2012 05:32 PM)thomja Wrote: [CITE] I guess but it would still be nice with a lifetime license

Lifetime licences are what make all products die, for example : Cryptex, iCrypt, Dimension and Many others.
I want m'y product to stay High Quality and live a long time, therefore I did remove Lifetime.
This is better because instead of paying lifetime for a product that CAN die the week atter, you pay for a certain amount of days that you Will be sure to be able to use.
You CAN ask all coders, they would say that lifetime is useless and should be removed. More over, if you take a look on this forum, you would see that all successfull products only have a monthly based subscripion(like DarkEye).

Casual - *August 1, 2012, 5:40 pm*

That will be very screwed up If you were to charge the previous Lifetime members monthly now.

I'm not a Lifetime member, I'm on month to month. But still, they paid for It ?

Maticekk - *August 1, 2012, 7:08 pm*
Vouch for that guy ! Best crypter ever !

.Ganja - *August 2, 2012, 12:29 am*
Why are you all buying a .net crypter? I don't understand? You want to hack 1/3 of the world instead of 3/3? Don't understand anyone on this thread... Learn to buy no dependencies.

Edit: Not trashing, stating why would people want to hack 1/3 instead of 3/3... Windows Mac Linux.

Ghost.13 - *August 2, 2012, 1:39 am*
(Aug 2, 2012 12:29 AM).AntiChrist Wrote: [CITE] Why are you all buying a .net crypter? I don't understand? You want to hack 1/3 of the world instead of 3/3? Don't understand anyone on this thread... Learn to buy no dependencies.

A factor would be prices.
Non-dependent crypters which habe GOOD quality comes with a price.
Not every skid in here knows how to make money online, so they stick with a .NET crypter which can match the quality of non-dependent crypters.

Besides, .NET dependency nowadays isn't really a big issue since even XP has updates for .NET Framework. It has become essential to every Windows platform that it isn't a big problem anymore, though still, it is an issue.

DeMoNi - *August 2, 2012, 2:08 am*
(Aug 2, 2012 12:29 AM).AntiChrist Wrote: [CITE] Why are you all buying a .net crypter? I don't understand? You want to hack 1/3 of the world instead of 3/3? Don't understand anyone on this thread... Learn to buy no dependencies.

I just laugh lmfao, go code your own crypter instead of buying sources and copy/paste.
Moreover, no crypter here (even non dependencies) works on Linux/Mac.
Your autoit crypter that you didnt even code and that Will Die in one week only works on Windows.
Get your fact rights fag.

alphadelta12 - *August 2, 2012, 2:42 am*
I have a lifetime license, but tbh if having to pay every 6 months is going to extend fud time then I'm happy to pay every 6 months, to keep such a good crypter alive, as my crypter is part of my toolkit that pays my bills. So anything to keep noobs at bay that mess it all up for everyone.

Ghost.13 - *August 2, 2012, 3:34 am*
Someone just asked me for a copy of DarkComet, and I gave it to him.

For those of you who are looking for a fresh download (meaning a .RAR file downloaded directly from the DarkComet site when it was still up), just PM me. The version is 5 however, but it is more stable than his last releases, plus the servers aren't equipped with Anti-Sandboxie yet, so you can still test it after creation and crypting via Sandboxie unlike the last versions (5.2 - 5.3 if I'm not

mistaken).

You may scan the download link on VirusTotal (but not the crypted files, or you'll get banned) just to make sure that all of them are all false positives and that I didn't added anything in the package.

Good day.

arrogantlyfly - *August 2, 2012, 10:04 am*
I still never got my week extension... -___-

(Aug 3, 2012 11:57 AM)PokerRaiser Wrote: *[CITE]* yes and no :)

Well bro, it is a spoofer, I can't do anything more.

(Aug 3, 2012 12:19 PM)kai59 Wrote: *[CITE]* DeMoNi,
Pourrais-tu faire une vidéo pour prouver que ton crypter bypass bien KIS/NOD 32/norton/Avira/AVG/Comodo/Zone alarm en runtime?
Il a une fonction de persistence ton crypter, mais si le fichier détecté par kaspersky, la persistence ne suffira et kaspersky supprimera le fichier?
Je me trompe?
Thanks
Oui, je le ferais quand je serais chez moi.
Et oui bien sur ma persistence ne bypass pas le ring0 de kapersky ^^

Anyway guys, all stubs are now back FUD ;)
Enjoy.

im in the support team of this product .. pm your RAT and i will assist you ..

for an example

mainly .. if you want to use your rat start up .. use it self .. if you want to use the crypter start up then it depends .. mostly use vbc injection ..

sorry DeMoNi i was away dealing with some issues .. now im back !

PokerRaiser - *August 4, 2012, 8:55 am*
Hey Prince...

.Prince has reached their private message quota so your message could not be sent.

I wanted to ask what is the best setting here for best results?

Thx

.Prince - *August 4, 2012, 9:16 am*
use the first three features only ! , edit it as you please .. , then crypt it ! as i told you in the pm before ..

mainly use the rat start up .. then crypt it

demoni , i have shooted you a pm , please have a look its very important .

DeMoNi - *August 4, 2012, 12:31 pm*

Use these settings along ItSelf injection and it Will be working Well.

????Chicago Bulls - *August 4, 2012, 12:38 pm*
Hey DeMonI, Hows the sales coming bro...
Very nice crypter, although i am a coder, I used this and it's a pretty great crypter.

Really good and stable for Ipkiller...
vouch for demoni.

DarkWraithh - *August 4, 2012, 1:26 pm*
I love this crypter. Vouch for it.

35Char

.Prince - *August 4, 2012, 1:30 pm*
helped three so far successfully .. if anybody needs help don't hesitate to pm .

im in the official support team of this product .

FuhrerWulf - *August 5, 2012, 1:12 am*
Lol for the third time, vouch for this crypter, its da best, used it for ratting and it works fine.
Just a quickie, why is everyone using the same UI on their crypters and same website design?

DeMoNi - *August 5, 2012, 1:52 am*

I dont think m'y GUI and website design look live other people's one.

M3ltd0wn - *August 5, 2012, 3:45 am*
Your autobuy is down.

Just an FYI.

Edit: it's back now nvm.

Good luck with sales.

SIM-1204701 - *August 5, 2012, 7:20 am*
Vouch for DeMoNi, one of the best coders I know.

Arya Stark™ - *August 5, 2012, 8:01 am*
Honestly, when I saw Demoni launching this crypter. I was full sure of it being copy paste. I thought that he will only refud this & it would stay fud for max a day. I was sure that it would close down anyday now. Today I vouch for Demoni as he has earned his respect for this crypter. Even if it is copy paste, he is giving a good fud time, keeping his customers satisfied & has been running this project for a long time! All of the forum knows that this is one of the best .Net crypters! Vouch!

.Prince - *August 5, 2012, 10:00 am*
thanks for the vouch , still up , still fud , still seliing ! , use the auto buy system for instant activation " paypal " or pm DeMoNi if you plan to pay in other type of payment methods !

contact me for any assistance , im with the official support team .

DeMoNi - *August 5, 2012, 3:34 pm*
Thanks for the vouches guys, I am back home now, and Will respond to all my PMs.

PokerRaiser - *August 5, 2012, 5:02 pm*
I crypted BS server and DC server with Infinity

1 of my bots keeps getting this each time he reboots his computer

How can I get rid of it via BS and via DC?

Thx

Oran+ - *August 5, 2012, 8:19 pm*
Hello For what time The Stub are Fud usualy

Roaster - *August 5, 2012, 11:53 pm*
Looks like a nice product would buy if I had the money =\

one of how many ? , what injection method did you use ?

PokerRaiser - *August 6, 2012, 5:16 am*
(Aug 6, 2012 12:41 AM).Prince Wrote: [CITE] one of how many ? , what injection method did you use ?
so far on 2 out of 10-15...don't remember exactly.
ItSelf

.Prince - *August 6, 2012, 6:52 am*
(Aug 5, 2012 08:19 PM)Oran+ Wrote: [CITE] Hello For what time The Stub are Fud usualy
there is more than one stub to choose , a single stub lasts for a long time , when ever it gets detected .. simply choose another stub , when ever a stub has been detected , it will be simply replaced via an update ! .

(Aug 6, 2012 05:16 AM)PokerRaiser Wrote: [CITE] so far on 2 out of 10-15...don't remember exactly.
ItSelf
i don't clearly understand you , you said one of my bot , now you're saying two ..

anyhow , did my settings fix your start up issue ?

also , recheck your server settings at both of RATs .. , what injection method did you use on them ? , whats the name of your server , is it svhost2.exe , and whats the .exe start up name ?

WizLundin - *August 6, 2012, 7:16 am*
Which settings should i use for syslogger?
When im trying to test the crypted sever i always get the error
" has stopped working"

PokerRaiser - *August 6, 2012, 7:22 am*

(Aug 6, 2012 06:52 AM).Prince Wrote: *[CITE]* there is more than one stub to choose , a single stub lasts for a long time , when ever it gets detected .. simply choose another stub , when ever a stub has been detected , it will be simply replaced via an update ! .

it's very easy ... it was 1 of my bots when I wrote it...by the time you replied it was 2 and now it's 3 ?

No your settings didn't help

I wrote I used ItSelf...because that's what you suggested together with DC startup, remember?

the server name is rekop.exe and the startup name is rocketdock.exe using APP#\RocketLaunch\rocketdock.exe as per your suggestion

ViCiOuZ - *August 6, 2012, 7:25 am*

I purchased this about 4-5 days ago. I must say its amazing, I have been FUD for nearly a week now. So anyone wondering how often you will be UD and not FUD. I can honestly tell you that you will never have a UD problem ever.

DeMoNi - *August 6, 2012, 7:26 am*

(Aug 6, 2012 07:16 AM)WizLundin Wrote: *[CITE]* Which settings should i use for syslogger?

1337God - *August 8, 2012, 2:15 am*

Hmm for some reason , yesterday the crypter was working fine , but today i tried to crypt my file and the file gets corrupt :/

Not sure what the problem can be.

Edit: Tried closing and running the crypter again , it says "Error downloading the components , the crypter might not work properly"

Move Infinity to a new folder, restart PC, and relaunch it from the new folder.

No, guys he toke his laptop the supporter is off atm be patient.

Ghost.13 - *August 9, 2012, 7:55 pm*
Support is Cape and .Prince atm.
Demoni took his laptop with him, and might be finding a way to connect to the Internet to update the stubs, so kindly be patient.

tmortavu - *August 9, 2012, 8:11 pm*
Yes he will update ^^ dont worry be happy ^^

??????l??¢??? - *August 10, 2012, 12:54 am*
He has to update it, it's not FUD now. 3/37.

ANONYMOUs - *August 10, 2012, 3:39 am*
it hasn't been FUD for the past 2 days... whats up?

kangoo13 - *August 10, 2012, 3:50 am*
the assembly function isn't working? When i want to clone a file the window disappear

Ghost.13 - *August 10, 2012, 3:59 am*
Can't you guys even wait?
Are you losing bots at an extreme rate? I don't think so.
Demoni is still on vacation, and until he gets back, we can do nothing about it, so kindly calm down.

.Prince - *August 10, 2012, 4:18 am*
the crypter is very delicate .. when using any of it functions .. to successfully use the assembly changer ..

click on the bar , locate and load the file you want to clone it assembly .. high light it .. then click open .. then carry on with your crypting process ..

guys , its currently being picked up by more than 3 av companies .. i believe the detections are generic .. so the only thing i can advise you now is to wait for an update .. i hope its any time soon .

PokerRaiser - *August 10, 2012, 4:56 am*
(Aug 10, 2012 03:50 AM)kangoo13 Wrote: *[CITE]* the assembly function isn't working? When i want to clone a file the window disappearit happens only in some .exe files
try another one until you find one that works

So, kindly explain why his so called "vacations" are getting ridiculous?
He's a human being, not a robot, of course he still has to attend to his real life needs, which includes recreational stuffs.

(Aug 11, 2012 06:00 PM)Nox™ Wrote: *[CITE]* dose he reply when he is on vacation?
He does once he gets connection to the Internet.

@To everyone complaining about detections...
What I don't understand about guys like you is that whenever the stubs got even just 2/37, you always freak out like the crypter won't be updated forever. You don't even give an allowance of at least 48-hours for the coder to do his thing and update the crypter. It's not like Demoni is always online and coding 24/7.

So unless you guys stop acting like a kid and acquire some professionalism, maybe a little patience, your rants won't get anywhere and won't resolve anything.

Just my cents though, so to those whom I offend, I kindly apologize.

Crypters in HF never stay FUD for very long, especially with large customer base, so it is likely that sometimes, updates and leakages have very short gaps.

Demoni is trying his best to pace up with the updates, so kindly wait.
I will also suggest to him to cut sales or at least have a limit customer base if he wants to keep the crypter alive and running in good condition.

v Brandon xz - *August 11, 2012, 7:41 pm*

http://infinityproducts.org/pricing.htmlhow many sales have you made so far? and what is your max amount of people you want on this crypter?

DeMoNi - *August 12, 2012, 2:30 am*

(Aug 12, 2012 02:23 AM)Nox™ Wrote: *[CITE]* how many sales have you made so far? and what is your max amount of people you want on this crypter?

People own a subscription with a limited time, this means that the crypter won't be oversold with Lifetime Users. Therefore, the number of customers stay quite not too much, and crypter stay alive. For example, I made 2000+ sales. But currently, there is only 400 customers that own the crypter.

The limit is 600 at a time. I will stop sales when I reach it until I go down to 400-500.

jared05 - *August 12, 2012, 2:58 am*
Thanks Demoni for the update! I'll just wait for my private stub.. :)

This is due to an HWID change, please PM me or Cape your username to reset it.

@Everyone -> The server was null-routed by the hosting to mitigate DDoS attack.
I asked them tu put it back normal, they are doing this.
Please bare with me.
Moreover, the guy who DDoSed is someone from this forum.

EDIT : After I did spoke to Hosting Support, I changed from Shared Hosting to a Dedicated server,

this should resolve any future DDoS problem. Once the migration will be finished, everything will be working again.
Thank you for your patience.

ni562 - *August 13, 2012, 3:46 pm*

You never seem to be any help on here. there might be two pages of people posting about errors or asking for time frames, but you still just copy and paste the same old text which helps no one.

Because that error is from hosting not from me and its not even on my hand ?
As all knows this is the best and powerfull crypter on Market and DeMoNi stated the issue and you guys keep trashing thread So, why should I give same answer to all ?

And I am doing my job Reselling/Supporting/HWID problems etc. ?

im not even getting this error... im talking about in the past when i tried to get help from you all you did was ask irrelevant questions such as "how long is your subscription" and "how many days do you have left" etc... when all i wanted to know was when next FUD update was coming then you insulted me when I asked if the questions you were asking were even relevant

M3ltd0wn - *August 14, 2012, 1:17 pm*

If you have had this crypter for a week then you can not say these things. If you actually took the time to read the situation, you would know that the reason for the problems in the last week is a member of HF DDOSing his server... I've had this crypter for a few months now and before the attacks, this crypter has almost never been down, when it was it was because he was updating it. And it has been FUD 99% of the time. I've had several other crypters here that are no better, most where worse. So get some facts behind you before you bad mouth anyone or anything.

I didn't mention to know everything, I only said that a dedicated server won't make your web server stronger. Specs are useful on a server when you have a mitigation service.

Just wanted to clear that, you lie to your customers by saying it the dedicated will kinda protect from DDoS which is obviously wrong.

Steam™ - *August 16, 2012, 11:13 am*

When I run the server crypted it detect COCOA.dll trojan.MSIL.
i Use DarkComet.

I dont recall him saying that the dedi will protect from ddos... I could be wrong, but I believe he just stated that he was moving to a dedi rather than shared hosting. We all should be knowledgeable that a dedi is just as vulnerable to DDoS as anything else. If your not.... Please leave HF lol... I do know however that he will be setting up some security measures to prevent further DDoS. But as stated many times before, he IS ON VACATION! give the man a break... He just busted his ass getting things back online as fast as he could instead of enjoying his vacation... Now let him enjoy it a little and he will setup better security after the fact.

RawringKevin - *August 16, 2012, 11:16 am*

Did every customer lose days because of the downtime or what? I never got an update on if DeMoNi actually added days or not.

(Aug 16, 2012 11:34 AM)M3ltd0wn Wrote: [CITE] I'm on a vacation now. And I have to take business calls all day still. It's life.
Your point? To each their own. My idea of vacation is a get away that does not involve anything pertaining to my job. When I take a vacation, I have all of my calls forwarded to another member of my team. Everyone is being compensated for the downtime and everything is 100% FUD and working flawlessly, so no more need for your harsh, unwanted comments.

This is a .NET Crypter trying to Crypt VB6, it just doesn't mix. Get a VB6 crypter. I doubt DeMoNi would try to make it compatable.

Are you using up2x? If you are, DON'T. They are infecting all files. If you want to test it on a slave using blackshades, open file manager and navigate to where you want to save it. Then right click and upload it then right click and refresh (If it won't automatically) then right click and execute.
There's a simpler way but this is the way i do it and it works for me :P.

most people use malware bytes when they know they are infected, in my experience it has always been detected by this, but occasionally malwarebytes was unable to remove it.

Stop flamming here with bullshit accusations.
First, the crypter was down maximum 3 days.
Secondly, you can ask all customers, it stays quite a long time FUD.
EOF support is included since now 1 month, and you don't even know how it works.
IF you want your file FUD for a full month without being detected, go buy a private crypter for 500$/month.
The support team work for free on their spare time, and they helped a lot of customers.

If you are unhappy, just find another crypter.

Updated to version 4.1.0.6, added anti-emulator. It will take like 3-4 seconds to load your crypted file in memory, but it will bypass a lot of proactives and defenses.

(Aug 20, 2012 08:03 PM)Scottocs Wrote: *[CITE]* I'm interested in this crypter but I see problems with Blackshades and startup and I use Blackshades.
It's fine with Blackshades, i used Blackshades and it starts up with it.

I've been using this Crypter for about 3 months using BlackShades PAID Version.

(Aug 20, 2012 10:21 AM)t z l Wrote: [CITE] I've been having alot of problems with start-up and the blackshades rat. Im not sure if it's the settings when creating my server or my setting's when crypting it. Could someone please post their settings.
I use Blackshades, you must not be doing it right.

The update downloads "ildasm.exe" to my desktop.
Does anyone know what it may be?

604gse20 - *August 20, 2012, 11:41 pm*
i am also getting freezing and auto quit when crypting something. however it does end up crypting.

is the startup in inifinity permanently broken? i am using startup with dark comet but it pops up a 2nd box asking to run msdcsc.exe, if the user hits no the server doesn't install. I recall infinity started up silently when the startup feature was working

DeMoNi - *August 21, 2012, 1:30 am*
Guys, I don't know what you have with the Startup.
I tested both methods using different settings in a Windows 7 VM. It worked everytime.
Please instead saying it doesnt work, PM me the real issue (wrong key, file not moving ...)
Moreover, you can use your RAT startup, but it seems no one listen to me.

Cape - *August 21, 2012, 2:52 am*

here is download link bro which include all rat settings
http://#/729970281

52dsl - *August 21, 2012, 3:20 am*
thanks man, works 100% fine,
best crypter, i recommend it!

kiowa - *August 21, 2012, 3:48 am*

Quote:hey so when i am about to crypt it , it freezes and does nothing then it closes every time. what can i do ?

same here..I have crypter for 1 month and I am able to crypt only 2 servers...rest of the time the crypter was broken...(server problem, gizmo...)

the FUD time is getting worse and worse..

bonkersone - *August 21, 2012, 4:07 am*

If you do selfinject and startup bypass, the crypter crashes.

And another thing,

Fud time's are bad i have not been able to crypt a file that was fud for more then a day.
I suggest that you do something about this like:

Ban the real noobs (who upload to vt and shit
Don't have so much customers
Make more stubs, only 1 available atm (and it's not FUD)

Deus_ - *August 21, 2012, 4:17 am*

Crypter crashes for me when I try to crypt anything

Arckos - *August 21, 2012, 4:40 am*

Ha when i crypt something it will crypt but then just closes itself

DeMoNi - *August 21, 2012, 5:24 am*

If you have a problem with the crypter closing ItSelf, please contact me. And the crypter is FUD, use an icon and that's all.

EDIT : Fixed the crash error when crypting, sometimes I am stupid.

bonkersone - *August 21, 2012, 7:48 am*

I am using a icon, I don't like to tell you that you're crypter is not fud but it's just the truth.

I'm using darkcomet server, on this specific setup:
No settings enabled in the rat startup .eg
And for the crypter
And selfinject with advanced startup
also botkiller and anti's
also i've got an icon and version info

Link to scan: http://elementscanner.net//?RE=b598576e6f0b9cc1457c7d3f5e2a3dc6

(Aug 21, 2012 02:01 PM)Aryanking Wrote: [CITE] Does this crypter bypass firewalls? Does it still bypass Sonar and KIS? if yes, would that mean, it bypasses Symantec Endpoint Protection?
It currently doesnt bypass firewalls, however it bypasses KIS, Sonar, MBAM, AVG ...

(Aug 21, 2012 10:12 PM)Pro-s hacks Wrote: [CITE] Infinity crypter isn't working for my paradox rat i have .net 20 and I am still getting a .net error someone help?
Use ItSelf injection and EOF support.

??????l??¢??? - *August 22, 2012, 1:43 am*

Hey Demoni,
First, I tried the startup feature of the crypter, but it didn't work. Then again, I tried the starup feature of my RAT client, but it still didn't work. But when I don't crypt my server and use the Startup feature of the RAT, it seems to be working great. So what I have understood is that the startup is not working because of the crypter.

I would ask you to look into this to have an update done for this.

I was fixing the both detections but internet went done. And I am on m'y iPhone right now.
I Will also come back home in exactly one day, update Will be really fast.

(Aug 25, 2012 09:34 AM)Kyle FYI™ Wrote: [CITE] I wouldn't suggest this crypter, been waiting over 4 months for him to fix a issue for me.

It has been 4 months I told you to install à simple VM to get it work.

DarkWraithh - *August 25, 2012, 2:00 pm*

Yes! I'm so excited to have this crypter again. Let me explain my past history with it.

I purchased this originally for a month, and had a rough start because of DeMoNi's vacation. BUT, to repay us, he gave us all a extra week onto our license, which was outstanding. The crypter is absolutely wonderful, with FUD times of up to even 10 days in the past. When it becomes detected, it's been fixed within 12hours most of the time and the support is amazing. There are many different people willing to help with this crypter, and you can even post right on this thread for help from users of the crypter.

Vouch for DeMoNi. #1 Crypter on this Market.

Does anyone know the settings for predator logger?

masc - *August 26, 2012, 1:43 am*

(Aug 25, 2012 10:02 PM)yousif666 Wrote: [CITE] Does anyone know the settings for predator logger?
I have tried nearly every setting and it still does not work. I haven't been able to get it to work since buying it.

PedroDJ - *August 26, 2012, 2:02 am*

I own Predator Dinasty 8 too: seems that Infinity doesn't crypt it correctly with any setting.

DeMoNi: if you need Predator Dinasty 8 server to make test, feel free to PM me.

It depends ... If you spread via torrents is good to have assembly (and icon btw).
But yeah, it's FUD and is an excellent cryper. The execution rate is also very good for a .NET.

... And thank you for answering me (I thought it was just me). (:

DeMoNi - *September 2, 2012, 8:13 am*

(Sep 2, 2012 07:39 AM)?n-'pä-py?-l?r Wrote: *[CITE]* It depends ... If you spread via torrents is good to have assembly (and icon btw).

Thank you for the incoming update sir!

? Ace of Spades ? - *September 11, 2012, 1:27 am*

exited for next update. hope demoni will come back soon.

myth0z - *September 11, 2012, 2:48 am*

Hm, last day of my subscription and it's still 5/37. :(
Also Cape promised me +3 days of subscription, when the webserver was down for like 4-5 days. Never get 'em!

I understand that you have a life, DeMoNi, but if you can't handle a service, that you guaranteed for, you should get another coder, that supports you, to give your customer everything you promised in your first post like 0/37, Bypasses and something like that.

Just an advice, don't be offended :)

Cape - *September 11, 2012, 3:01 am*

Vouch for DeMoNi, Great Crypter, just scanned and always output FUD. GLWS mate

[img]http://elementscanner.com//image.php?ID=b612f8a7650c8656ae252c8a0d5e2a81[/img]

panda911 - *September 24, 2012, 12:21 am*
i keep getting an error every time i try to use it
it says an unknown error has occurred. please try again later

alphadelta12 - *September 24, 2012, 3:54 am*
I keep getting the same error as panda. Hopefully its just an issue downloading an update as it is detected by AVG (of all the shitty AV's to get detected by)

Knowing Demoni and the service so far this will be fixed very quickly.

jaisyxxx - *September 24, 2012, 11:12 am*
Please update server, its detected by AVG. For the rest the crypter is working fine.

Arckos - *September 24, 2012, 3:58 pm*
OP, any chance your doing a refud soon? Looks like its getting detected by a few AV's

Thanks, love your crypter

DeMoNi - *September 24, 2012, 4:10 pm*
Stub updated, just crypt again, and it will be FUD :

[img]http://multiscanner.org/scan_watch_image.php?id=MTQ2OTM0&type=MQ==[/img]

Mushies - *September 24, 2012, 8:29 pm*

just letting you know that there is an issue with the scanner, it says cannot connect to host or something along those lines.

DeMoNi - *September 25, 2012, 8:12 am*

(Sep 24, 2012 08:29 PM)Mushies Wrote: *[CITE]* just letting you know that there is an issue with the scanner, it says cannot connect to host or something along those lines.

Seems Scan4you is having some troubles today.

If anyone is experiencing problems with the scanner, please shoot me a PM with a screenshot.

[img]http://multiscanner.org/scan_watch_image.php?id=MTQ2OTM0&type=MQ==[/img]

Contact me to buy the crypter.

I just want to say, that even though Demoni is very busy, and doesn't always respond back to PM's or IM right away, he does keep the crypter updated.. The new update has been released!!

Thanks man!

DeMoNi - *October 13, 2012, 12:44 am*
(Oct 12, 2012 05:59 PM)Arckos Wrote: *[CITE]* hmm with this new update my server needs admin permission, is this normal or am i using wrong settings.
It should not do that, can you re-try to crypt a different RAT or do another test ?

Arckos - *October 13, 2012, 3:56 am*
(Oct 13, 2012 12:44 AM)DeMoNi Wrote: *[CITE]* It should not do that, can you re-try to crypt a

different RAT or do another test ?
Sure, I've tried it with blackshades net and stealth servers. i was playing around with the settings but seems everytime i do a crypt it needs admin permissions. i've tried changing the injection and for the other options tab i had nothing selected there incase one of those may be the reason why it was making the server needs permissions.

hopefully this helps, if you need any more info let me know :)

edit - looks like when i try to save it with a different extension, permission isn't required but the only thing is i need the extension to be .exe :s
and if you try to rename it to .exe it then wants permissions again

.Prince - *October 13, 2012, 5:11 am*
revouching , still the best crypter i ever used .. keep up the good work bro .

alphadelta12 - *October 13, 2012, 1:14 pm*
Great update with the file extension issue on the scanner, however nothing I do will get rid of the Dr Web detection, I have made new DC servers, binded documents and changed icons etc but it still stays detected for some reason.

Dr Web detection is fine by me however its not the same as a page full of green :)

Still an awesome crypter

DeMoNi - *October 13, 2012, 1:24 pm*
(Oct 13, 2012 01:14 PM)alphadelta12 Wrote: *[CITE]* Great update with the file extension issue on the scanner, however nothing I do will get rid of the Dr Web detection, I have made new DC servers, binded documents and changed icons etc but it still stays detected for some reason.

vouch for this crypter!

very simple and slick working!

what is the most stable settings you guys recommend with blackshades?

DeMoNi - *October 14, 2012, 4:16 pm*
For those having detections, please PM me or catch me on skype.
It is completely FUD for me now.

Marcus Aurelius - *October 15, 2012, 7:23 pm*
FUD as always

Love this crypter never lets me down! :)

Must Buy.

TakTik~ - *October 15, 2012, 7:35 pm*
I added you on Skype waiting for a reply I'm looking to buy this.
Thanks

Target™ - *October 16, 2012, 7:15 am*
Is this still FUD? I think ill buy the three month package :o

DeMoNi - *October 16, 2012, 8:35 am*

(Oct 16, 2012 07:15 AM)5252 Wrote: [CITE] Is this still FUD? I think ill buy the three month package :o

Yes it is, be sure to contact me if you want to buy it.

Guys, if any of you do own an antivirus, please be sure that it doesnt send samples automaticaly to AVs companies like NOD 32, Dr. Web and Kapersky.

If I found it does, your licence will be banned. To not get banned, just uncheck the options such as ThreatSense, CloudScan ...

Did you use the icon changer?

The Stub is fud until you change the icon then it becomes detected by 4 AV's.

Demoni has informed me and posted in the thread that it is being fixed.

.Prince - *October 29, 2012, 7:24 pm*
hit the crypt button again , you'd be fine ..

Marshmallow Man - *October 29, 2012, 7:41 pm*
I get that error when I open the file. :S https://gyazo.com/d3cd2ed87453480ed7a0024520cadd1f

cloudz4me - *October 29, 2012, 9:59 pm*
putting some icon my server gets 4/34 detection while no icon its only 1/34.

does custom icon helps for lesser detection?

guys where i can get some custom icon?

DarkWraithh - *October 29, 2012, 10:52 pm*
I bought this crypter again four days ago, and since then, I still haven't been able to get it to work. I've downloaded the settings that supporter747 told me to download, and I'm setting it up for a DarkComet server exactly as it says, but it's still corrupting my server.

He told me it must be a issue with the stub three days ago, and said it would be fixed within the hour. I've been locked out of my HF account to be able to post here sooner. If anybody could help, that would be great. I'm going to try re'downloading InfC from the website again now.

Okay, so I re'downloaded it, and it still has the same issue. Nothing is different about it. Please help guys.

Beanie - *October 30, 2012, 5:17 am*
This is now detected by 5 for me.
With and without a ICON changer.

Tried most settings aswell.

Cape - *October 30, 2012, 10:49 am*

(Oct 30, 2012 05:42 PM)??|?? Wrote: *[CITE]* Nah, just posting here for the fun of it.
Sarcasm isn't necessary. I was simply wondering, why stick with a .NET crypter for this long? thats all. (A great .NET crypter none the less)

DarkWraithh - *October 30, 2012, 6:03 pm*
(Oct 30, 2012 10:49 AM)Cape Wrote: *[CITE]* Well at that time there was some stub issue and now I am facing this problem too it might be server issues wait for DeMoNi to come online and fix this problem ASAP. ?
Can somebody please fix this. I haven't been able to use this crypter, and I bought it days ago. My time on my license is ticking for no reason.

aKinGh - *October 30, 2012, 6:04 pm*
I plan on buying this when this gets fixed and get some money.

? Ace of Spades ? - *October 30, 2012, 10:36 pm*
at the time it is fud but when we bind some thing with server it detected by 4 anti virus please demoni get back and fix it

Beanie - *October 31, 2012, 1:32 am*
(Oct 30, 2012 05:44 PM)ANONYMOUs Wrote: *[CITE]* Sarcasm isn't necessary. I was simply wondering, why stick with a .NET crypter for this long? thats all. (A great .NET crypter none the less)
Because I've got lifetime with it, why else?
Can we get another update please =)

Mises - *October 31, 2012, 6:15 am*
Hey DeMoNi, I sent you a PM regarding my question.

It would help if you could please answer it.

Beanie - *October 31, 2012, 8:26 am*
OK, well, can we get a stub update :)

DeMoNi - *October 31, 2012, 8:27 am*
(Oct 30, 2012 10:53 AM)??|?? Wrote: *[CITE]* Quick question Demoni, what's the recommended RAT for the crypter, in your personal preference :)
Darkcomet is and will always be the best.

(Oct 30, 2012 06:03 PM)DarkWraithh Wrote: *[CITE]* Can somebody please fix this. I haven't been able to use this crypter, and I bought it days ago. My time on my license is ticking for no reason.
Maybe PM me will be the best choice no ?

(Oct 31, 2012 06:15 AM)d0s3s Wrote: *[CITE]* Hey DeMoNi, I sent you a PM regarding my question.

It would help if you could please answer it.
Answered it, enjoy the crypter bro.

(Oct 31, 2012 08:26 AM)??|?? Wrote: *[CITE]* OK, well, can we get a stub update :)
This is the last time I will say this, stop spamming the thread with posts.

I manage everything properly, however, it seems that Kapersky own a crypter copy, or someone didn't disable cloud scanning on his PC with KIS.

Marshmallow Man - *November 4, 2012, 8:18 pm*
what settings shall i use for darkcomet 5.3.1?

Th? Jok3? ™ - *November 5, 2012, 3:32 pm*
Any update avabile !??? Still not fud =(
[img]http://elementscanner.com//image.php?ID=df4a5c35321549ed2c4bb3249eb9f000[/img]
btw: i saw much people ask correct settings is for CyberGate, and Spyenet or Blackshade , maybe some people get helping if u gave correct settings for setups RATs and Crypter. if u can make a tutorial or something take a pictures with that crypter settings and rats. Still appreacite.
?

DarkWraithh - *November 5, 2012, 4:46 pm*
So what's up with this? I still have been unable to use it, and it's been over a week now. I'm not a very happy customer.

GearCEO™ - *November 6, 2012, 5:39 am*
Be patient guyz because DeMoNi is HQ member. He will fix this ASAP.

Tested on my VM, that popped up.
Well it was maybe because Net Seal updated, and disabled auto-update, so it was not working properly since you didn't had the new update.

Could you retry now ?

VOUCH!

This crypter is one of my favorite crypters of all time, it is constantly FUD and will never let you down, EVERY single features this has is indeed FUD and is updated on a daily basis. It has long FUD times too, i have had it for a while now and it is still going as strong as when i bought it. I. LOVE. IT.

604gse20 - *November 8, 2012, 7:03 pm*

great crypter.. i was away for a month now booting it up and getting an unknown error has occured when i start up infinity. does anyone know how to fix it

Devoted - *November 8, 2012, 11:27 pm*

Bullguard seems to pick it up + it is not included in the live scanner.

Hi, could you please make a video of using the binder option in the crypter too ?

When I used it (a month ago) I couldn't make it work if I used the inbuilt binder. I am thinking to buy again because the file I crypted with this crypter lasted for two weeks so I was satisfied, but I need to get the binded file fud too, that is why I would like to know is the inbuilt binder working well now?

I noticed that in this crypter you add the file using the binder option and then crypt it altogether... will I get the same quality result if I first bind the file with Celesty binder and then just crypt it with Infinity crypter ... will it be the same as if I used the Infinity inbuilt binder (which somehow didn't work while I used it)?

Thanks.

Then you used wrong settings on your RAT.
And its behaviour made it detected on runtime by Bullguard.

Which settings for cybergate 1.07.5?

Should I use cg startup, injection. Can you show with pictures how it should look?

..

Also, if anyone else but the creator got some working settings, please share. :)

.Prince - *November 10, 2012, 11:01 am*

hi DeMoNi , i assume you're doing a stub update .. btw guys , does anybody else face a problem after using the inbuilt icon changer ? " the file doesn't run / execute successfully " , or is it just me , hmm .
other than that still my favorite crypter among others i own .

DeMoNi - *November 10, 2012, 3:22 pm*

Use no options in Cybergate, ItSelf injection in crypter, and whatever other options in crypter.

(Nov 10, 2012 12:01 PM).Prince Wrote: *[CITE]* hi DeMoNi , i assume you're doing a stub update .. btw guys , does anybody else face a problem after using the inbuilt icon changer ? " the file doesn't run / execute successfully " , or is it just me , hmm .

There should not be any problems with icon changer, since it does only edit some native resources.

New builder released also, which will increase FUD time for NOD 32.
Remember that anyone having AVs installed on their pc, and distributing samples, will be instantly banned from crypter without no REFUNDS.

.Prince - *November 20, 2012, 11:48 am*

guys for fuck sake disable your avs ! , here's what im doing

av is off at all times , every bit of it , make sure to check all of your av settings , especially the contributing to help / sending feedback ect ....

now if you feel like you really need to scan your pc , or browse an untrusted website , simply move all of your infinity crypter folder , in matter of fact , all of your hack tools or what ever to an external hard drive , unplug it , scan your pc , once done , trun off your av , plug your external hard drive / usb , move back your hack tools .

that will definitely help coders of which you use their products !

--

@ DeMoNi . thanks for the fix , i really hope that you keep it updated this time , and good luck at school .

It seems there is a little problem with the server.

Thanks for informing us of the problem. I honestly thought I was going crazy and had a virus or something.

Assailant - *November 25, 2012, 1:46 pm*

Crypter isn't even working for me anymore.

When ever I try and click protect file it says some rubbish about cannot connect to the servers,

Please contact a member of staff.. and sometimes it just goes not responding.

EDIT: Didn't see the above post, any ideas on when it may be done ?

Blueberrysky - *November 25, 2012, 8:05 pm*

I will always remember when Demoni blocked my license because I tried to do a money back on paypal and it didn't work. Btw, his crypter wasn't working because that was the version 3 of the software and he was in vacation, and he couldn't do anything. Lost 50$ and an infinity crypter license --' Was it my fault? ^^

Jabberjay - *November 25, 2012, 11:46 pm*

Crypting seems to be working now as the servers are back up.

For the $50 that you lost, yes. As you said: "I tried to do a money back on paypal and it didn't work".
For the crypter license that you lost, yes. As you said: "I tried to do a money back on paypal".

Apparently you didn't read the TOS before buying:
"9) Any dispute or chargeback will result in a permanent and non-reversible ban of your license."

DeMoNi - *November 26, 2012, 12:05 pm*

Sorry for the few hours of dowtime, server is back up, and stub is FUD as always :

I know, but that is stupid because I didn't do a moneyback for nothing. The software wasn't working and DeMoNi was in vacation. He could be mild for this time.
