Thread: [\[Release/VB.Net\] iChat - PHP Chat By Blink](#)

Blink - December 18, 2011, 12:34 pm

Before reading, please notice that this thread is from 2011, which means the coding is pretty bad. :P
iChat By Blink

Hey HF, I was just searching for a project on my Pc, then I saw my iChat project, and thought it could be nice for other people so I decided to release it here on HF. I made this a while ago so there will be some stupid code in it cause at that time I wasn't that good, but not bad either.

iChat In Action ! (GIF) [\(Click to View\)](#)

iChat is a PHP chat system, so you wont have to portforward. I wrote this 100% myself and the form code is fully commented so it's easy for you to understand it.

It's also a command based interface, with a command handler to easy add/modify commands.

There might be some bugs, but I'm not sure anymore.

To let this chat work for you upload the php files to your webhost and then set your url as chatserver in iChat connect form.

Download: Pm me, to many leechers.

Normal users: 150+ posts

L33ts and Ub3rs can just pm me !

If you're going to use this give me credits.

Hope you like it, and if you download it please reply !

Weakky. - December 18, 2011, 12:37 pm

Fucking awesome ! I've been waiting a long for this !

Thanks a lot man !

Ærion - December 18, 2011, 12:38 pm

Wow, it's amazing !

Thanks for sharing !

ColdPatch - December 18, 2011, 1:05 pm

Wow, Just wow, Was just looking for it on google before i came here.
thanks!

Support. - December 18, 2011, 1:13 pm

Wow. Great release dude, it's good to see different shit released.

Doctor07 - December 18, 2011, 1:14 pm

Thankyou so much for this release! I've been attempting to code something very similar to this,

cheers!

g1ll1s - December 18, 2011, 1:42 pm

Nice, I can learn from this. Thanks for sharing.

netFaux - December 18, 2011, 1:47 pm

Wow, mad sexy source.

Did you code this your self?

DrBeats - December 18, 2011, 2:36 pm

This is some pretty amazing work
good work man :)

Jeff. - December 18, 2011, 2:54 pm

Now this is something very impressive o.o

I'd take a look into this for sure thanks allot for the share :]

MisterK - December 18, 2011, 3:39 pm

This is something I was looking for a long time ago. Thanks a loot for this and will surely give credit if I use it one day ;)

I was about to say this myself, considering it uses PHP means he is just issuing web requests rather than using a p2p connection or however a chatserver should work.

I'm going to take a guess about how this works:

Connects to the db and pulls messages every few seconds VIA a php script

Sends requests when you input data to the PHP script with your message and name then the php inserts into db

Didn't open it, but it's my best guess.

Blink - December 19, 2011, 7:14 am

Thanks guys ! Didn't expect to get that much good feedback !

And yes this is fully coded by me. Not that complicated ^^.

I agree with this, nice release but i wouldn't suggest anyone to use this without fixing it first.

simon-benyo - December 19, 2011, 9:45 am

Thanks Man Nice Share I'd take a look at it in my free time :D

Neel - December 19, 2011, 10:01 am

Nice. I created something better than this, not meaning to brag or anything, but good job.

Blink - December 20, 2011, 11:26 am

Thanks for the positive comments guys !:) Love to read them.

And for the people saying this isn't good, be happy that it isn't the 1000th theme.

And also keep in mind that I made this a while ago.

Thanks, and yes suggestions are always welcome ? Though I'm probably not going to work at this anymore.

And 40 downloads and only 20 replies ? :/

Mr.TwEaK - December 21, 2011, 4:32 am

This is great Blink I'm going to take a look at this tonight and see what I can do with this source to make it better, if you don't mind epic share man much appreciated.

Falconite - December 21, 2011, 5:07 am

Awesome will try this out for sure Luks great :P

Impurity - December 21, 2011, 6:01 am

Thanks for the share! Will check it out when I get home. Looks great!

And this is opensource so people can edit everything if they want.

Blink - December 30, 2011, 12:11 am

Over 150 downloads and only 30 replies? Leaving a message after you download is always nice :) anyways, this could be usefull for more people, so :D

saafinkhan - December 30, 2011, 6:11 am

this is very amazing work keep it up bro i m just a beginner in php can u teach me how the file upload in webhost ???

The php files edit the txt files with custom information send by the chat client. And the chat client

reads the data from the txt files.

If you want more info about php go to <http://www.php.net>

Apple - December 30, 2011, 7:38 am

Blink, just for future reference, you can cut code from this size:

```
Code Function IsIPBanned(ByVal strIP As String) As Boolean
    Dim URL As String = strChatSite & "/ipbans.txt"
    Dim request As WebRequest = WebRequest.Create(URL)
    Dim response As WebResponse = request.GetResponse()
    Dim reader As StreamReader = New StreamReader(response.GetResponseStream())
    Dim IPBans As String = reader.ReadToEnd
    If IPBans.Contains(strIP) Then
        Return True
    Else
        Return False
    End If
End Function
```

To this, using a simple web client:

```
Code function IsIPBanned(ByVal IP as String) as Boolean
    Dim W as String = new WebClient().DownloadString(strChatSite & "/ipbans.txt")
    Return W.Contains(strIP)
end function
```

It's also bad habit to do something like this:

Code if CheckBox1.Checked = True then
Just do this:

Code if CheckBox1.Checked then
:-)

Blink - December 30, 2011, 7:44 am

I know, but when I made it I didn't know.
Now people can edit it if they want.

Beneq1 - January 5, 2012, 11:04 am

Your chat is amazing! Can I get a link to the source code?
Thank you in advance!!

Eloquence - November 16, 2012, 6:29 am

This looks amazing great job! It's nice and simple. You should try making it so that instead of a messagebox, it displays the commands in the chat but only client side so it doesn't broadcast to the others. I don't really think it would be that difficult either ? Overall great job keep up the amazing work!

ComplexUnicorn - November 16, 2012, 7:01 am

nice app ive been looking for something like this could u pm me the file plz for vs2010

Envyous - July 2, 2013, 2:30 am

Well cool app! Very useful for quick conversations and diagnostic trouble shooting with clients.
Although it did need a couple of background works and a progress bar to keep the ui thread free and friendly.
