Thread: [Where did AryaN sales threads, and 3vbot sales threads go?](#)

Honestly. I don't see Attheckers anymore, and I don't know who the fuck coded 3vbot. What happened?

Blizzard - December 19, 2011, 2:01 am

Atthackers is no more here on hackforums since he was bann3d.

deadaccount01 - December 19, 2011, 2:08 am

And 3vbot died when the guy who held the cash decided to scam everyone. Then soon after the coder decided to scam everyone.

So as usual, the one product which everyone thought was good, turned out to be a total failure.

Atthackers is no longer on HF, Which imho has done the forum the world of good. 3vbot source went on sale a few months ago which is now public.

3vBot source is released. I could probably recreate it by putting my liver in a blender then leaving the lid off.

I love to see the people who used to suck up to 3v and talk as if it was the ONLY good thing under ngr. In reality it sucked. Hard.

TBH ngr sucks too. It's the best on hackforums but in reality it's still pretty bad.

Mhm, if you price something high enough it comes to a point where anyone who purchases it will say its good just to cover their own asses.

Coincidentally, I think we have a prime example of this in the post above.
