(???)?(???? - December 19, 2011, 8:50 am

Stop obfuscating it, it doesn't proof a single point. I'll be waiting for the unobfuscated version.

blackperuvian - December 19, 2011, 8:52 am

It a simple ofuscation..

I make it because I probably release my app and I need to prove his security

No, a crackme is supposed to test natural security, not security that anyone can get in 30 seconds by a program.

privTech - December 19, 2011, 9:03 am

i agree, this shouldnt be obfuscated! its pointless! it should be natural

(???)?(???? - December 19, 2011, 9:04 am

(Dec 19, 2011 10:03 AM)privOte95 Wrote: [\[CITE\]](#) i agree, this shouldnt be obfuscated! its pointless! it should be natural

You obfuscated your crackme too. Or you put anti on it, which are both idiotic.

privTech - December 19, 2011, 9:07 am

i put a anti on it for reflector on my .net crack me :) if your moaning about that then you need to grow up? a simple anti is easy as hell to get off.

and as for the other on in this section you need to check it over befor you flame because its not obfuscated as its not .net!

(???)?(???? - December 19, 2011, 9:09 am

Tell me the point of adding an anti. It's supposed to be a NATURAL PROTECTION.

privTech - December 19, 2011, 9:14 am

i think you will find that alot of crack me's / logins / auth methods have antis!? like isdebuggerpresent? to stop the lowlife noobs that dont even know how to crack attempting to get through? therefore only people with knowledge can get in! it actually would stop a certain percentage of people getting in

Mr.Lazy - December 19, 2011, 9:17 am

confuser obfuscator used in it...just deobsucated it...looks like easy now...so i am not trying...

privTech - December 19, 2011, 10:04 am

(Dec 19, 2011 09:48 AM)blackperuvian Wrote: [\[CITE\]](#) Here is

What exactly are we aiming for? i have this so far...

And it loads this page? but with errors due to the ScriptErrorsSuppressed tag?

Am i correct or do i need to continue further?

blackperuvian - December 19, 2011, 10:33 am

You need. To find

privTech - December 19, 2011, 11:00 am

Woooo first person to crack :D good crack me! thanks

This was really good! :)

blackperuvian - December 19, 2011, 11:33 am

Cool , what tool you use to deofuscate it or simple olly ...

(Dec 19, 2011 12:00 PM)priv0te95 Wrote: [\[CITE\]](#) Woooo first person to crack :D good crack me! thanks

privTech - December 19, 2011, 11:35 am

i didnt deobfuscate it :) although if i was going to then the tool i normally use is de4dot but it tends to render the crackme unusable when i use it on my system :) what i did for this is just click around looking at the calls until i figured it out :)

D??t? - December 19, 2011, 12:14 pm

Use confuser max label lolll .

You protection not had anti SAE and People easily dumbing it

Look here and follow this

[IMG]<http://i.lulzimg.com/a3f1b44508.png>[/IMG]

and then lets see how many guys dumb it

Furious` - December 19, 2011, 12:31 pm

At least use maximum protection.

privTech - December 19, 2011, 12:33 pm

(Dec 19, 2011 01:31 PM)Furiosus Wrote: [\[CITE\]](#) At least use maximum protection.

That's not yet cracked, see the post above from when i cracked it! you need to do further cracking :)

Azeta - November 26, 2024, 4:26 am

Replying to a 2011 thread in 2024 :D
