Blackhole exploit kit has the latest exploits and is the best you can buy on a public forum.

Blackhole costs \$1.5k and maxes at like 10% load rate on shitty vulnerability ridden Asian traffic.. For the price, I don't think it's worth it..

you must be joking

the exploits are not fud,so you need to refud (obfuscation/crypting ..)

even if you make the exploits undetectable,you will get nothing.people had the patches since 2009/2010
