Thread: [Foxy JDB](#) | [Sparky JDB](#) | [Galaxy JDB](#)

Instruction - December 25, 2011, 3:26 pm

Ratings:

Foxy - 4/5

Galaxy - 5/5

Sparky 1/5

I'd recommend galaxy if you need hosting & a good generator

I'd recommend foxy if you just need something thats basic

I'd recommend sparky if you want to waste money

Pardon me for asking, but what are you basing these results on?

imsmartlol - January 12, 2012, 7:21 pm

do you offer free domains aswell? or just the jdb

I've got a cracked version of Foxy and found It's quite good. Was possibly thinking of buying it actually.

2.0 is cracked - 5/37

2.5 hasn't been cracked - 3/37

3.0 is strict server side - 0/37

Buying is much better than having a cracked version. Especially if it's like 2 versions behind.

What has suddenly made you the head of the jdb market?

Also you just posted a thread saying foxy was terrible and now it's a 4/5??
