Thread: [Narooo Search - Save Energy, Save the Environment](#)

biasa199 - December 25, 2011, 6:34 pm

[\[img\]http://www.narooo.co.uk/search/templates/images_css_js/logo.png\[/img\]](#)

This is Narooo Search.

Why?

Narooo Search was developed with ONE person in mind - you. We've built our website to suit your needs. We have adapted to previous feedback given during beta testing, and have fixed any issues that may occur.

How?

It has been proven that by looking at a black screen, your computer actually SAVES energy. It doesn't give your eyes that much of a strain either.

Where?

If you want to visit us, please do so [here](#).

What would you say about

<http://blogs.wsj.com/numbersguy/does-a-darkened-google-really-save-electricity-104/> OP?

I never said that we save lots of power, but according to your post, black sites DO save a little power.

Think about how many hours you spend in a year going on Google. You can use up a little less energy each year. It doesn't have to be much, but as time goes on, that accumulates.

indicud - December 25, 2011, 8:08 pm

Well I rarely spend time on google, because I type fast.

It doesn't matter how long you spend on Google.

There are so many seconds in a year, and if you use the computer a lot, even if you type fast, they DO add up.

-- Also, you need to view the results page.

*If you don't like it, I'm fine with that, just don't trash my thread.

Webmasters - *December 25, 2011, 8:34 pm*

I like the new design, and the thought of saving energy.

I also love the host you're using, very trusted.

Thanks for clarifying that OP, appreciated.
