### Ultimate Guide For MSDN Admin Accounts

This is a Step By Step for Guide for making a BIZPARK admin account and use it for generating unlimited MSDNs ...

-This gets you at least 100\$ Daily <<

--

What can i do with this guide ?

You can generate and sell MSDNs Admin accounts or Subs ..

You can generate and sell Legit microsoft softwares ..

-Admin for about : 25\$

-Sub for about : 5\$

-Each product for about 5\$ "it's a lifetime license"

--

This is a Step by Step guide which you will just follow as a kid drinking milk and making \$\$ ?

- written in a very good English and Grammar - With pictures - very easy to follow -

I won't sell Subs or Softwares cause i don't need any copyright shit here so i will only sell the Guide ...

The price is very fair for only 10\$

Yes, there are a lot of people that do this method already, but I think for simplicity sake, I believe that if you have a way to get your hands on this method, do so by purchasing this guide over the other ones.

This Requires:

(Dec 14, 2009 07:43 AM)DArkSm4sh Wrote: [\[CITE\]](#) This can't be used on Ebay cause they even report some users so it's way too risky, also many here are selling those keys for a very low price like 0.5\$ and an MSDN invite for 2\$ so it's useless ... I'am in noway attacking you PyroFR, hope you understand ..

but it's still good for your personal use not for trading ..

:/ Same goes for you there buddy. Also, look at my sales figures, you CAN sell these on ebay, people just don't follow my guide properly, and get their listings fucked.

I understand if you included Network partners in that guide, but I doubt it. The process for Network partners is harder to get into, especially after they tightened the system. :/

Yeah sure for me also, i have included good tips and selling sites in the guide, but these people selling cheap keys for 0.50\$ are just lowering the bar ...

Unfortunately I keep getting denied. I really don't know what to do anymore; I ran out of ideas. I always get a message saying that there's a problem because my e-mail domain does not correspond with my "company's" domain name.

i would like to know more about what should i include on my website.

And also this part should be the most detailed on the guide, because it looks like its most important.

I hope my account will get approved, because i really need keys until friday :/
