Thread: [\[TUT\] How to install cammy 2.0 \(with pics\) \[TUT\]](#)

xBlackHatx - December 26, 2011, 8:00 pm

Hello HF members!

In this Thread/Tutorial i want to show you how to set up your Cammy*

First of all you need to portforwarding!(if you can't do it,i can help you)
open a port up to 1000.

Then you need a no-ip domain + you must have no-ip DUC
(download it from official site no-ip.com)
also you can use the same no-ip as using in your RAT!
but u can't using the same port as RAT using both!

Now.. open your cammy.exe and go to the bottom at the left side that say settings.
[\[IMG\]http://img845.imageshack.us/img845/5156/pic1pm.png\[/IMG\]](http://img845.imageshack.us/img845/5156/pic1pm.png)
at the Listen port..add the port that you already have portforwarded
(mine is 20113).
the other settings in boxes let it as default and click "Ok".

Then go to the second button that say "Build"
[\[IMG\]http://img402.imageshack.us/img402/3158/pic2fu.png\[/IMG\]](http://img402.imageshack.us/img402/3158/pic2fu.png)
ok..now in the first txt box "Host" add your no-ip that you made it before or this that you are using in
your RAT.

Then in the second text box "Port" add the port that u added before (that u have portforwarded).
In the last box "UPX compress".You can check it only if your Crypter that u want to crypt your
cammy server supports UPX compression!

Ok..well done with server building!

"Start up": You can add your server in start up if your Crypter supports start up option!

"Settings with Crypters": add server on start up,u can change the assembly,
u can change the icon and u can bind it
(don't choose many options..may can crash/dont work your server)

That's all!

Now you can spread the crypted server..also u can install the server to your RAT victims PC's to
have better and faster Desktop and Camera capture!
(I prefering to use it in DC coz all knows DC is slow with capturing) :)

I cant give you a Cammy* Download link coz is Spytool/Virus etc tool..and is detectable for many
Antiviruses..so i dont want to have problems with other members and say.."is infected".."try to infect
me" etc

also i have clean version of Cammy 2.0 and if anybody interested for this..please post here and the
i will PM him the Cammy 2.0 Link!

*Cammy is a remote tool that u can take camera and desktop capture from remote PC's

For more information, questions etc..feel free to PM me!

Many Thanks to @Black Shadow for cammy* link! :D <3

Thanks for reading my thread guyz!! hope this help some members!
Thank you! ?

Predator_Crack - December 26, 2011, 8:03 pm

Very easy to read and clear explained my blackfriend. Nice share, no doubts for that and that will give an end to most of complaints by people with slow rat cams and desktops.

xBlackHatx - December 26, 2011, 8:04 pm

(Dec 26, 2011 09:03 PM) Predator_Crack Wrote: [\[CITE\]](#) Very easy to read and clear explained my blackfriend. Nice share, no doubts for that.

You know bill..i really appreciate you reply!

Thanks brother! <3

Lovesosa - December 26, 2011, 8:06 pm

can i have the program please il pm u right now

Krewella - December 26, 2011, 8:06 pm

another awesome TUT by "RATs Crew"....

guys, u just rocks in RATting filed....

love u all "RATs Crew"..keep it up

Black Shadow - December 26, 2011, 8:11 pm

This is just fantastic, that's what I like about the Crew, all our members produce HQ tutorials like this,

this is the only tutorial of its kind anywhere for this program.

Top SeCrT - December 31, 2011, 11:00 pm

send it to me plz
also tell me wich cryptor working with it ?

Onetwo - December 31, 2011, 11:03 pm

Can someone explain exactly what Cammy does? Thanks, lol.

Tutelary - December 31, 2011, 11:07 pm

Pmed for the link, and also, just post the link; RAT's are detected, doesn't mean they're necessarily infected. They're just a hacking tool, like cammy.

xBlackHatx - December 31, 2011, 11:18 pm

(Jan 1, 2012 12:03 AM)?netwo Wrote: [\[CITE\]](#) Can someone explain exactly what Cammy does?
Thanks, lol.
As i said and up there..Cammy is remote Desktop and Camera viewer!
u just make a server like RAT's..and if someone got infected u can open/see his/him desktop or cam!
also have much faster capture that Darkcomet capturing! :)
If i forgot to send anyone the link plz feel free to PM me!
Thank you all for your good words guyz...really appreciated! <3

Onetwo - December 31, 2011, 11:43 pm

Pls PM me or reply here.

:D np bro!

Just use a crypter that have start up option!

just add it on start up..i think u dont need any more features...

ZDS999 - January 3, 2012, 9:13 am

Oh, too bad Cammy not so stable. 20+ Victims were too many, and totally crached the client. Hopes it get more stable in the future, cus is a really good program.

Wanji - January 4, 2012, 8:20 am

Heya. nice tutorial. I'm hoping to use it if you could send me the link.

Cheers

miracle75 - January 4, 2012, 9:18 am

Very nice tutorial, can I also have the link please.

xBlackHatx - January 4, 2012, 2:53 pm

Links was sent guyz!

Thanks for the good words! :D

Livux - January 4, 2012, 3:24 pm

I need the download link pls. Where is it?

JasonFlinn - January 5, 2012, 5:10 pm

Hey Xblack,

First and foremost, good work on the tutorial.

I'm a big fan of simplicity and user-friendly tuts, and I think you nailed both in this one.

Second, would you PM me a link?

Thanks mate.

xBlackHatx - January 5, 2012, 5:18 pm

?

globb - January 29, 2012, 2:11 pm
Don't mean to threadjack, but I made my own thread regarding zonealarm and cammy that's gone unnoticed. If anyone has any ideas to a solution, that would be great!

<https://hackforums.net/showthread.php?tid=2160249>

Quote:Ok, so I have a couple of femslaves that I have cybergate installed on, and it works just fine with them having zonealarm installed. However, when I try to upload a cammy server to their box, it ends up getting blocked by zonealarm. I've tried disabling zonealarm in every way possible. Running taskkill /pid xxxx /f /t with no success in killing the process. Uninstalling zonealarm, and even attempting to remove zonealarm from startup in the registry (which tells me that it's unable to do). All of which I've tried on a test vm that I have setup with the same configuration just so that I can see exactly what's going on.

From my research so far, I'm assuming that cybergate's browser injection is what allows the RAT to get passed firewalls such as zonealarm, yet the cammy server doesn't have injection capabilities. My question is, is there a tool out there that will inject a server into a running process for me? I currently use icrypt gold and ultimate crypter, and I don't think either crypter is capable of doing the injection for me.

I don't like using cybergate's built in cam viewer because it's both slow, and from time to time will pop up a dialogue on the slaves screen asking which device to use for their cam. Not acceptable!

Any ideas?

Thank you too my friend! :) ?

deadman88 - February 5, 2012, 9:44 am

can i have the link too.:-)

thanks you...!!

ammarahmed - February 5, 2012, 9:44 am

when i build server it says UPX not found then if i press ok it says done :/

xBlackHatx - February 5, 2012, 9:52 am

(Feb 5, 2012 10:44 AM)ammarahmed Wrote: [\[CITE\]](#) when i build server it says UPX not found then if i press ok it says done :/

Its ok just skip it!

use UPX only if your crypter support UPX compression!

TheFeed - February 19, 2012, 11:10 am

Thanks for the TUT ... would you be so kind as to PM the Cammy link ?

Much appreciated =)

jonny2580 - February 25, 2012, 1:27 pm

Can i get this please? It would be a good addition to my RAT and allow me to take higher quality pictures, videos etc. :3

Thanks bro.

wildraichu - February 27, 2012, 6:46 am

Can I get the link for cammy? I hope somebody has it, thanks in advance

ryeguy9995 - February 29, 2012, 2:18 pm

hey id love a link to cammy! could you pm me with it? thanks in advance!

smalx - March 2, 2012, 1:39 pm

can I get the link too please?

35 chars

ColtyTheGod - March 2, 2012, 1:45 pm

(Dec 26, 2011 09:00 PM)xBlackHatx Wrote: [\[CITE\]](#) Hello HF members!

In this Thread/Tutorial i want to show you how to set up your Cammy*

First of all you need to portforwarding!(if you can't do it,i can help you)
open a port up to 1000.

Then you need a no-ip domain + you must have no-ip DUC
(download it from official site no-ip.com)
also you can use the same no-ip as using in your RAT!
but u can't using the same port as RAT using both!

Now.. open your cammy.exe and go to the bottom at the left side that say settings.

[\[IMG\]http://img845.imageshack.us/img845/5156/pic1pm.png\[/IMG\]](http://img845.imageshack.us/img845/5156/pic1pm.png)

at the Listen port..add the port that you already have portforwarded
(mine is 20113).

the other settings in boxes let it as default and click "Ok".

Then go to the second button that say "Build"

[\[IMG\]http://img402.imageshack.us/img402/3158/pic2fu.png\[/IMG\]](http://img402.imageshack.us/img402/3158/pic2fu.png)

ok..now in the first txt box "Host" add you no-ip that you made it before or this that you are using in your RAT.

Then in the second text box "Port" add the port that u added before (that u have portforwarded).
In the last box "UPX compress".You can check it only if your Crypter that u want to crypt your cammy server supports UPX compression!

Ok..well done with server building!

"Start up": You can add your server in start up if your Crypter supports start up option!

"Settings with Crypters": add server on start up,u can change the assembly,
u can change the icon and u can bind it
(don't choose many options..may can crash/dont work your server)

That's all!

Now you can spread the crypted server..also u can install the server to your RAT victims PC's to have better and faster Desktop and Camera capture!

(I preferring to use it in DC coz all knows DC is slow with capturing) :)

I cant give you a Cammy* Download link coz is Spytool/Virus etc tool..and is detectable for many Antiviruses..so i dont want to have problems with other members and say.."is infected".."try to infect me" etc

also i have clean version of Cammy 2.0 and if anybody interested for this..please post here and the

i will PM him the Cammy 2.0 Link!

*Cammy is a remote tool that u can take camera and desktop capture from remote PC's

For more information, questions etc.. feel free to PM me!

Many Thanks to @Black Shadow for cammy* link! :D <3

Thanks for reading my thread guyz!! hope this help some members!

Thank you! ?

Thanks for this tut very much very, clearly to understand thank you!

david007 - March 2, 2012, 1:50 pm

here is where i got mine from the official site

<http://www.ic0de.org/showthread.php?9205-Cammy-2.0>

NoFundog - March 4, 2012, 11:00 am

DI link fro cammy, official site...

<http://www.ic0de.org/showthread.php?9205-Cammy-2-0>

Do not download from anywhere else.. you will end up with a bad version....

you must register, but it takes only a minute.

Edit:

Sorry didn't see it was allready posted.. :)

smalx - March 24, 2012, 5:50 am

Can anyone hep with this? I downloaded cammy to avoid the issue of a RAT's webcam capture opening up the slaves webcam software. I'm just testing cammy on myself, and as soon as I start viewing my webcam, my logitech software opens. As I understood it, cammy was the only way to guarantee the software was bypassed. Am I doing something wrong? There aren't many settings to play with so don't know how I can stop it happening.

cody1005 - March 24, 2012, 7:04 am

well done bro very nice explanied tutorial

Dragon Siege - March 24, 2012, 8:41 am

Nice Tutorial! :) Might Get Cammy Later :)

Natas - March 25, 2012, 5:04 pm

really nice tut helped me a lot found it by just searching cammy

thanks going to try and find a link now then it will be port forward time lol

GuyoOfRS - May 1, 2012, 2:07 am

Do I have to pay to get a No-IP domain? o.o

Daemon. - May 5, 2012, 3:09 am

can i please have the cammy* link?...

Noobalicious - May 7, 2012, 6:06 pm

Hey man I was just wondering if i could get a direct link :-D ~.~

CharleyisHere1 - June 26, 2012, 5:08 am

(Dec 26, 2011 09:00 PM)xBlackHatx Wrote: [\[CITE\]](#) also u can install the server to your RAT victims PC's to have better and faster Desktop and Camera capture!
(I prefering to use it in DC coz all knows DC is slow with capturing) :)
How do you install the cammy server in DC ?

carpman - July 26, 2012, 4:25 am

nice tut mate keep it would like the download link cheers

Omarion - July 26, 2012, 5:34 am

The guide worked perfectly for me yesterday :) Thanks to you!

leiche71 - July 26, 2012, 12:56 pm

nice tut 4 me but..
can i have the link please ?

dread5000 - July 31, 2012, 6:58 pm

I need a clean fixed version of Cammy, anyone have it??

thaitanium - September 1, 2012, 8:58 am

Many thanks for making this tutorial!!

KingFaith - September 1, 2012, 9:35 am

nice simple but well explained tut mate. i was going to make one myslef but never got round to doing it, thanks.

CyberShadow - September 1, 2012, 10:00 am

can i have the cammy 2.0 link ? plx

Regards

-cybershadow ?

Admin_Black - September 1, 2012, 11:29 am

Awsome TUT..there have an any Crypter to FUD this..if you have help me..:D

knayplus - September 1, 2012, 11:54 am

loooks nice ^^ i will test it now :D Thank you

pcalibur - September 16, 2012, 1:21 pm

could i get a copy of cammy please? Thank you!

mattiasrosendahl - September 19, 2012, 11:21 am

i would really like to have this awesome program!! :) Please pm me it!!!

Thanks in advance bro! :D

redfish4646 - September 29, 2012, 4:22 am

Nice tut!! Once I get my DC working I would love to give it a try. Does the cam light come on with this program? Do they need to have their cam on?

bobo17 - September 30, 2012, 8:19 am

Thanks for sharing this man. Well done!

Chaoskitten - October 1, 2012, 7:11 am

cool tut, but it says your acc is closed, where can i get clean link?

ZilksKin - October 4, 2012, 12:36 pm

Hey, thanks for the Tut, Just heard about cammy randomly. Could you send me the link please?

godlike13 - October 5, 2012, 11:39 am

Hey, I'm interested, May I have the link, please?

Aarya™ - December 26, 2012, 5:22 am

Is this thread still active?

I'd like to have a copy of Cammy please :)

Chinchan - December 26, 2012, 6:41 am

Very nice tut, I'd like to test it, could you send me the link please ? Thanks in advance :)

OwNeDI337 - December 26, 2012, 7:33 pm

Really great tut i like it :D

so couldd you send me the link so i can try the tut :D

Thanks in advance :D

Jean_42 - December 27, 2012, 2:01 am

Thank you for the guide even if the user account is closed.

Do you know if there is an alternative to Cammy, an other software with the same fonctions. Can we crypte it easily (UPX crypting) ?

Young Hustle - December 27, 2012, 4:27 am

thanks man im gonna set this up now :D:D

daringtakers - January 19, 2013, 7:22 am

Where to download clean version from ?
