Thread: [SEND FREE SMS FROM YOUR MOBILE PHONE TO ANY MOBILE PHONE](#)

Nepal Cyber Army - December 28, 2011, 11:48 pm

Hello Hack forum,

This is Nepal cyber Army

FROM NEPAL

Note: This is not fake! This is real and I am using this to send to free messages from 3-4 months ago. Trust Me !

Here How To Send A free sms from your mobile phone to any mobile Phone BY using BiNU Messenger.

1. For sending free sms all you need is to download application names BiNu Messenger for your mobile phone . You can download it from the link below :

Link : www.free-mobile-messenger.com/2011/05/15/download-binu-jar/

2. Download the apps in .jar and save it in your computer and send it to your mobile phone or download it directly from you mobile phone . I recommend you to download from pc and send it to you mobile phone because it does not charge any money for downloading.

3. Then send that apps to your mobile phone or just download it from your mobile phone. After that install it in your mobile phone and open it.

4. After opening it , create a new account with your username ,phone number (with country code) .

5. After making account then Test Your Phone and select Send Sms To (Your Number).

6.After that wait 5-6 seconds, then you will get a 4 digit pin code in your message inbox . After getting 4 digit Pin code open the BiNu again and click on sign in.

7. When You Sign In there you need is to Put your Mobile Number (with Your country code which you have just register) and in the pin code You need to enter the 4 digit pin code (which you get in your message inbox In Message).

8. And Your Are Done.

9. Select BiNu Message and send sms and emails.

NOTE: Always type Number with country code While sending message (Whom you want to send)(No need to type '+' infront of country code)

NOTE:

- a) Email is free for lifetime.
- b) You will get 10 credit in a week for sending sms.
- c) Each credit will reduce by sending each sms.
- d) For International sms your 2 credits will reduce.
- e) For another free 10 credit you need to wait for a week.

(When Your are done then 1st send me message ok .
My Number is +9779815998495).

HOPE YOU ALL LIKE IT!
(ANY PROBLE M JUST PM ME)

Tricks: You can register as many friends mobile number as you can but you need to get the particular 4 digit pin code from your friends message inbox. That's depend upon you .

2. Register as much as many mobile phone number and get the particular 4 digit pin code for particular mobile number. And sign in with any mobile number (but it must be registered.) and pin code.

3. When your 10 credit will finish then sign out again and sign in again with your friend number and pin number .keep on doing !!!!!

Evil Tips: When you send the message from any number(any but with registered) your particular number (logged in) will be shown as sender to whom you want to send sms.

For Example, You and Your Friend are John and Harry!

Let's say you manage to register John Mobile Number to BinU messenger and you also got the pin number from john mobile inbox.

When you sign in with john number mobile and pin code and you send message to Harry writing " You Mother fucker" and you send it.

NOW when the Harry will receive the message, not your number but the john Number will be the sender to the Harry and harry will be fire on John thinking John has send message to him.

HAHAHAHHAAAAHHAH!

BUT I RECOMMEND YOU NOT TO MISUSE THIS OK !.

Bye!!!!!!!!!!!!!!

Enjoy!
