The lifetime filesonic account I bought from now is no longer working, it was converted back to a free account. Also the NBA league pass broadband account I bought from you stopped working. They were both due to billing issues. Please contact me asap, I would like another account if possible.

This guy is a scam, sold a filesonic and NBA league pass account that were carded. Both were disabled after less than a week. I'm trying to contact him to get my money back, but it's not responding to anything, PM or messenger.
