Thread: [\[ULTIMATE GUIDE\]How to set up any RAT, port forwarding and FAQ.\[MUST SEE\]](#)

Prominent - December 30, 2011, 4:17 pm

This is written by [Prominent](#), any type of stealing content or leeching will result to punishment.

[img]http://img16.imageshack.us/img16/3444/inactivitybanner.png[/img]

In this guide I will teach you how to RAT, from setting up NO-IP and portforwarding to setting up your RAT. I will not teach you how to spread.

Note: RAT settings may vary depending on the crypter you're using.

Table of content:Ports

Opening your ports

What to do if you can't

NO-IP(Setup)

Setting up:DarkComet

CyberGate

BiFrost

Cerberus

Xtreme RAT

SpyNet

Poison Ivy(To be added soon)

Port Opening

First go to <http://www.portforward.com/> , find your router's name then click on it and follow the instructions shown.

What to do if you can't open your ports

Use a VPN if you can't open your ports.

Recommended paid:nVPN.net

Recommended free:hostizzle.com

Every member in The RATs Crew for his/her support<3

[Zangetsu](#) for helping me fix a few stuff :)

AlbinoShadow - December 30, 2011, 4:18 pm

Helping reserve this post for Prominent my babycakes.

Quizzical - December 30, 2011, 4:21 pm

Really nice man, big vouch for this guide.

The Dark Side of the Moon - December 30, 2011, 4:22 pm

Looking good, I'll have a look through it and see if there is anything I can add =)

Prominent - December 30, 2011, 4:23 pm

@Quizzical: Thanks for the vouch :)

@Zangetsu: Suggestions are always appreciated! Hope you like the guide :3

MoneyXchang3R - December 30, 2011, 4:25 pm

Great high quality guide. Amazed, +repped and bookmarked this page.

Prominent - December 30, 2011, 4:28 pm

Reuploading the gyazo pictures to imageshack since gyazo has bandwidth issues.

The Dark Side of the Moon - December 30, 2011, 4:35 pm

-Suggestions-

According to your table of content:

-CyberGate and Darkcomet as well as Spynet and Xtreme RAT are out of order.

-It might also look nice if the Table of Content is made larger (font wise) and the headings colour coded to the titles. i.e. DarkComet yellow, CyberGate white and Cerebus green.

"In this guide I will teach you how to RAT, from setting up NO-IP and portforwarding till setting up your RAT. I will not teach you how to spread."

Shouldn't it be "from setting up NO-IP and portforwarding to setting up your RAT"

Prominent - December 30, 2011, 4:38 pm

Will fix those after fixing the images and I will add you to the credits because you pointed out some very good stuff. :)

Le Flou - December 30, 2011, 5:00 pm

Nice Work Prominent

Very nice :D

35chars

Tibit - December 30, 2011, 5:00 pm

Thanks for doing this Prominent, will help out with the help desk a lot too.

Prominent - December 30, 2011, 5:03 pm

Thank you for the nice feedback Le Flou and Tibit <3

I advertised the help desk here so we can help out more members that need it :)

xBlackHatx - December 30, 2011, 5:29 pm

Holly...Of the most detailed Thread on HF bro!

Huge Thread!Very helpful Prom!

My huge Vouch buddy!!u deserve it! :DThank you!

Prominent - December 31, 2011, 4:19 am

Thanks for the vouch, hope this can help new ratties out there :D

Mx. - December 31, 2011, 5:15 am

Well done prominent my lil nigga <3

Venusaur - December 31, 2011, 6:38 am

This post is great. It needs to be seen.

The Unknown - December 31, 2011, 7:09 am

Great thread got there Prominent...

Prominent - December 31, 2011, 7:24 pm

Thanks for the reply guys, hope this is useful to newcomers..

Slash - December 31, 2011, 7:28 pm

Very well presented. This should be helpful to a lot of people. Keep it up bro.

Thank you very much for the feedback, I hope it was useful to some :3

Simba™ - January 1, 2012, 6:02 am

Awesome thread, surely deserves a sticky. It has a lot of potential, and it's a thread which answers many questions about different RAT's, nice job Prominent.

Falconw0w - January 1, 2012, 7:04 am

Massive work. Good going Prominent.

?rtificial - January 1, 2012, 2:07 pm

Good job Prominent. Looks very HQ and really colorful :)

Prominent - January 2, 2012, 4:39 am

Thanks for the feedback everyone! Glad you like it.

1337B345T3R - January 2, 2012, 5:07 am

Very nice guide dude! I am sure this will be helpful to many members. Thanks for the share

The Dark Side of the Moon - January 2, 2012, 3:37 pm

- Suggestion Pt2 -

It may look better if the DarkComet section is moved over to the second page and has a title called "Setting up:" as the header for the second page.

The "Need help?" in the Table of Contents should be cyan to match the heading also.

You could also mention under the port section about modem firewalls themselves causing a lot of problems with ports being blocked and how to make custom rules / lower the firewalls security to allow the ports access. Also adding a link to canyouseeme.org to check if the port is opened.

This is probably me just being picky though, lol ?

Krueger - January 3, 2012, 10:58 am

Amazing Prominent ! :) As usual your making nice Guide/Tut's.

HaxOr? - January 3, 2012, 12:48 pm

Nice guide mate...

I bookmarked it :3

miracle75 - January 4, 2012, 9:22 am

Nice tutorial man, I liked it alot. Thanks

Ignite. - January 4, 2012, 12:48 pm

Great Guide Prominent! I can see you worked very hard on it, good job.

Serial Menace™ - January 4, 2012, 10:01 pm

the port that is on the client section on nvpn.net is automatically open? i check it with the port-forward tool and the tool is not open do i still need to manually open them via router website?
also when i try to update my NOip info to the darkcomet rat it says sock error it has something to do with proxy? i have nvpn right now btw tht vpn is hella weird lol

?Hacker™ - January 6, 2012, 7:21 am

Vouch for OP, very experienced user. :)

Prominent - January 10, 2012, 1:38 am

Check the RATs crew help desk for help, I have too much stuff to do so I won't be able to help you out a lot, sorry :/

Serial Menace™ - January 20, 2012, 10:39 pm

I downloaded the new dark comet and Im trying to give RATing another go but I keep getting "Error: I could not see your service on xx.xxx.xx.x on port (XX)

Reason: Connection refused" when I check on canyouseeme.org but when I try portforward port checker tool I download from the website it says its open and says it works. Im using Nvpn to portforward and I downloaded and installed the updated config with the opened ports to the openvpn. So is everything alright? if you think im doing something wrong PM me so we can skype or something. I really wanna get this to work

Hmm looks like i got it to work lol I think the problem was I had to configure the network and no-ip settings on darkcomet first then you check your port on canyouseeme.org and it should be a success. Felt good doing that on my own haha thanx for the previous help prominent,your tipshelped a lot

Prominent - June 3, 2012, 1:44 pm

Not sure if I should update this or not, any suggestions?

ComplexUnicorn - November 16, 2012, 2:54 am

Very useful tutorial! Exellent explanation! Thumbs up man!
