Thread: [My java program \(Dice Roller\)](#)

TheUnCoolOne - December 30, 2011, 10:49 pm

This is a simple dice roller I made with NetBeans

You can give an amount of dice to roll and then save the results in a text document

[img]http://i972.photobucket.com/albums/ae207/james13troost/diceroll.png[/img]

If you want to download it here it is:

[Download Mediafire](#)

here is the virus scan

really awesome...

can you share the coding please?

thanks in advance :)

Quote:You can always decompile, or Google it...

really?

okay googling the method.. :)

TheUnCoolOne - December 31, 2011, 3:17 pm

For some reason all my source code is screwed up and I only have the class files in the jar files.
Just use DJ decompiler
