Thread: [Download music with 1 button! \(Grooveshark\) \[Jailbreak\]](#)

'Snorlax - January 1, 2012, 9:53 am

Go to Cydia and download Grooveshark if you want free music!

You can choose to download the music (offline mode). Last night, I downloaded 2 albums (90 songs with Skrillex) with just 2 clicks.

If you open Grooveshark and search for an artist (my example, Skrillex). Then I press Search, press Album and write Skrillex. Then there's a lot of albums, such as "My Name is Skrillex EP" "Scary Monsters And Nice Spirits" and so on.

When I click on "My Name is Skrillex EP" a lot of songs comes up.

If you want to download the whole album, press the down-arrow at the bottom of the screen. Then all songs should have a bar under the names, and it should begin to download! When a song is downloaded, the name color changes to green!

If you just want 1 song to be downloaded, simply press on the song you want and scroll down and press "Make Available Offline".

When you have the songs you want, go back to the main menu and press on "Offline Songs". In there, all your songs are stored :)

How is the quality of the songs and albums you download?

I actually don't know. It's the same quality as Grooveshark, so I guess it's good.

Too bad I don't know the bitrate :)

This is free and it's all music available on Grooveshark that is available to be downloaded.

Why pay for music when you can get it for free?

R.A.T. - January 1, 2012, 2:27 pm

mewseek has multiple sources the free version is justtt like grooveshark.. and mewseek can add your music to your ipod app/ music app just like if u had downloaded it from itunes

R.A.T. - January 1, 2012, 2:28 pm

Mine can :)

Also, I just downloaded Mewseek to test it.

When I press "Add to iPod (1)" it can't even add it, so it's a shitty program tbh.

R.A.T. - January 1, 2012, 2:33 pm

oh ok i havent used gshark in a while... but anyway mewseek has 5 sources, and has the same features as gshark for free.. it also will allow u to add 10 to your music app and unles u want to ad more to your music app u hafta pay more... but the free version is basically the same.

Mewseek can't add to library on 5.0.1, so it's shit.

When playing, you can't rewind the song or anything, there's just play/stop...

To be honest, it sucks.

Dreams - January 1, 2012, 2:38 pm

don't you need a grooveshark account to use grooveshark....?

R.A.T. - January 1, 2012, 2:38 pm

it cant add to your ipod right now but in less then a week it will be able 2... and when it canit will be able to rewind and do alot more than the grooveshark app can.. anyway u should manage all music through ifile

I'll download it and try it out. :)

EDIT: You get a free trial then it's 9\$ per month.

BBQ™ - January 1, 2012, 6:27 pm

Thought as much. It's a 14 days trial, not bad.

'Snorlax - January 1, 2012, 6:33 pm

Oh crap :S

Can't you just create unlimited trials? :P

Not on iOS 5. So, it's pretty much useless.. And it's got a shit naming system.

Most of your songs will be "sample1"

R.A.T. - January 1, 2012, 8:06 pm

lol hes right haha mewseek wins all day long bro \$10 one time buy then u can always add to ipod

Asatru - January 1, 2012, 8:28 pm

Once your trial is up as I understand it the trial is up no way to create another.

R.A.T. - January 1, 2012, 8:41 pm

Neither do I.

Grooveshark is a beast. It's one of the best looking jailbroken apps I've seen. If not the best!

N?ro - January 2, 2012, 12:00 pm

Grooveshark costs for the mobile, last time I used it (a month ago)

I'm using it now and it's free.

When I made the thread it was free, so it's free ^^

If you add the xSellize repo (<http://cydia.xsellize.com>), they have paid apps for free. Mewseek's on there

Clearly when you register it says "Trial or Buy Premium"

So it's not free, really.

R.A.T. - January 2, 2012, 12:36 pm

yes dude go with mewseek there r cracked versions also:) but i would go with paid because the creator is pretty nice.. but grooveshark is good also and it is legal... grooveshark-legal mewseek-illegal although unless u download like 500 00 songs they will not come after you becuz most of the government goes after the uploaders more than the downloaders.

gagino0323 - January 6, 2012, 4:17 am

Can we use the music in the background???

'Snorlax - January 7, 2012, 6:41 am

Do you have a certain tweak for running the music in the background?

Whenever I Press the home-button and the music is playing, it keeps playing ;)
