Thread: [\[Tutorial/Tour\] How to pick your distribution.](#)

TheBarret - January 2, 2012, 1:53 am

Came accros this simple but effective script/website where you take a small tour to determine what kind of distro suits your preferences.

Goto: http://www.zegeniestudios.net/ldc/index.php?select_lang=true

These are easy qeustions, on the end you can see which one is best for you.

For all the ppl that make threads on "wich and what distro shall i pick" please take this tour!

Little chart of what major route the distro came trough

For the real BIG list (2.7MB PNG) of all up-to-date distro's, click here:

p.s: My results where: Debian, Fedora, and OpenSUSE (lol?)

Thanks, I have been wondering what i should get kinda new to this OS but I like It.

Modestep - January 2, 2012, 2:04 am

I took the test and its really great, i always liked open suse and it is in the results :). I also got ubuntu, kubuntu, mandriva and linux mint

Baldy - January 2, 2012, 2:46 am

I got

Linux mint 100%

Ubuntu 100%

Mandriva 100% not sure what this is

OpenSuSE 100% Don't know what this is either

95%

Kubuntu

Fedora

Have heard about these both but don't really know much about them.

Looks like a good site with potential to give users a good idea on what operating system suits them the most.

Neat test, I scored top for OpenSuse and Fedora except I haven't used either of these.

TheBarret - January 2, 2012, 4:47 pm

Yeah this post should help alot of ppl here on this forums thats for sure.

100% match with Gentoo and Slackware, with Gentoo at the top.

TheBarret - January 2, 2012, 6:12 pm

i tell ya this website survey test is really a winner :)

Likewise.

There's a thread from awhile back with the same quiz in it.

I think they updated the distro list, some said it updated with the famous "bt5" (or likewise distro's) wich isnt true i think.
