Thread: [\[FREE\]NO \\$HITCASH - File Binder, File Renamer, and JAVA DRIVE BY\[FREE\]](#)

Clitcoin - January 2, 2012, 9:47 am

Hey HF here are a couple tools I have come across in my browsing that I would like to share with you! I did not make these so If anyone knows who did I would love to give credit.

File Renamer:

Just upload your Hack/Virus into this and it will make 19,000+ copies of your virus with different names from Computer software, to TV shows, to music etc. Great for uploading to P2P programs.

File Binder:

Pretty cool binder, Has icon grabber in it so you dont have to go looking around for icons you can just steal them off your other files.

and JDB:

Just upload it to the hosting of your choice and edit the "CODE" file and replace the text "YOUR EXE HERE" with a direct link to your virus, then spread your site!

LINKS!

[File Binder](#)

[JDB](#)

[File Renamer](#)

Enjoy HF!

Can Some Verify these Files? Thanks :)

Clitcoin - January 2, 2012, 9:50 am

I meant to say "Scan before using" lol But i guess you got the point across!
