Thread: [\[TuT\]Traffic Spammer - How to hide your traffic without upgrading!\[TuT\]](#)

The Broken Sniper - January 2, 2012, 4:31 pm

What is TrafficSpammer? This is a Autosurf Program that is very useful to drive huge amount of traffic on your website or blogs. I find this website very useful and this really drives so many traffic on my websites from different countries. But the question is the traffic safe?

Many people now in the internet uses some autosurf programs to gain traffic on their website, Most of this people need a good type or quality type of traffic because they use it in their Internet Business like Google Adsense, Bidtraffic and more. To answer the question, Is the traffic safe? "NO" it's not safe because those advertisers will check where your traffic comes from, and if they notice that most or major of your traffic is coming from an autosurf programs they will disable your account. That's why i decided to make this tutorial for those people who wants to hide their traffic from autosurf especially for Trafficspammer.

The concept is simple, we will use redirect and we will use a free blog platform which is blogger.com.

We will use this code :

Code `<meta content='0;url=http://www.blahblah.blogspot.com/' http-equiv='refresh'/>``[/code]``[/quote]`

First, make a blogger account here: [Blogger](#)

Now that your blog is created, find the design button and go to edit html.

Then look for this code:

Code `<b:include data='blog' name='all-head-content'/>` (Use Ctrl + F then paste that code)

Paste this code the code mentioned above:

Code `<meta content='0;url=http://www.nameofblogspot.blogspot.com/' http-equiv='refresh'/>`

Now, where it says "nameofblogspot" change that to the name of your blog. Eg:

Hackforums.blogspot.com. (which is surprisingly a real site)

What this code will do is change the referrer link to any blog of your choosing. This is EXTREMELY useful for ad sense and SEO (Search Engine Optimization).

I hope you guys enjoyed my tutorial! Feel free to leave a thanks or comment below!

The Broken Sniper - January 22, 2012, 8:11 pm

Is nobody going to thank me or anything? This took me quite some time to write up.

Dota2MasterRace - January 22, 2012, 11:49 pm

Does this still work? I remember trying this a while ago, but it just refreshes my page...

ESjonne98 - January 23, 2012, 7:31 am

Does this still work??? onko joku huomest? momo

? NEO ? - January 23, 2012, 7:38 am

Did anyone tried this.

Please post.

The Broken Sniper - January 25, 2012, 10:03 pm

Some thanks would be much appreciated :)

LegacY96 - January 29, 2012, 7:01 pm

Thanks for the tut man! Very very useful!

The Broken Sniper - January 30, 2012, 2:59 pm

If you need any help, send me a PM and I will help you.

kokoiv - January 30, 2012, 6:35 pm

Yes very nice tutorial! Helped me out

thanks ;)

The Broken Sniper - January 30, 2012, 9:43 pm

No problem kokoiv, I just hope that other people also try it out!

TeamBreta - January 31, 2012, 2:55 am

yes this work but traffic spammer will block your site if you paste this code on your website
use this tutorial and use this site <http://adf.ly/58Vv3> not traffic spammer

1. paste your site without any re-direct codes
2. and when <http://adf.ly/58Vv3> approve your site then edit your site with redirect codes

P.S I use this method to earn money from VirUrl and they pay me so this method work for me 100%

The Broken Sniper - January 31, 2012, 4:39 pm

Alright thanks, unfortunately I cannot edit the post after 1440 minutes...

LegacY96 - January 31, 2012, 4:46 pm

Apparently so, I hope all others are exceptions like you :)

kokoiv - February 1, 2012, 11:09 am

Traffic spammer didnt block my website aswell. Tho as vision mentioned i pasted the code after approval.

Did anyone have problems with this code on blogger yet? Before i used a javascript which redirected to another page. My blog got taken down for containing malicious scripts. Wondering if this will be the same case?

The Broken Sniper - February 1, 2012, 3:18 pm

See, I told you it would work! Hope this works well for you guys!

pointblank - February 12, 2012, 8:45 am

This technique is effective and I have already tried it before with my own site, not traffic spammer. This is worth and I must thank the creator of this post to share with all.

Thanks a lot

The Broken Sniper - February 12, 2012, 9:51 am

No problem pointblank, thanks for the great feedback!

Andy?? - February 12, 2012, 9:58 am

Hey i did this but i am confused on what it does
does it bring traffic to your blog?

kujrakovic1 - February 12, 2012, 10:15 am

so what should i do to start earning with this

evildead4ucomon - February 12, 2012, 11:23 am

nice tutorial u posted here...will help in near future..thanks freind

ahmedthebest - February 12, 2012, 6:18 pm

What this code will do is change the referrer link to any blog of your choosing.
will it cahgne the refferer to google or facebook?

The Broken Sniper - February 12, 2012, 8:07 pm

No it will not change it to google or facebook. The only way for that to work is if you get Facebook to paste this redirect code in their coding. Which I presume will happen right after....never.

Dota2MasterRace - February 12, 2012, 8:24 pm

Oh i see how this works now XD. I thought that we place the code on our OWN blog.

damncoldnight - February 13, 2012, 4:20 pm

thanks for this tut man! :) I really liked it.

Greed™ - February 20, 2012, 1:28 pm

nice tut
gonna try it tomorrow to increase my sites traffic :D

The Broken Sniper - February 20, 2012, 1:34 pm

Thanks for the great feedback guys, much appreciated :).

Tua ZiA Truzza - February 20, 2012, 2:03 pm

<meta content='0;url=https://hackforums-monetize.blogspot.com/' http-equiv='refresh'/>

The Broken Sniper - February 20, 2012, 4:40 pm

Yeah, except we don't want to do that Tua.

ThaWeatherman - April 16, 2012, 1:47 am

not to flame, but you copy-pasted this from here

<http://bidtraffictips.blogspot.com/2011/09/traffic-spammer-how-to-hide-your.html>

make sure to not take credit for what isnt yours! unless of course this link ^ is your website!

Haha good idea Cadence. You will receive lots of mullah from this :)
