Thread: [Clever Way To Spread \(Tut\)](#)

**VAN1SH3D** - December 17, 2009, 7:10 pm

hey this is my first Tut so let me know if ive missed anything out or if you dont understand anything and ill be glad to help!

Things You Will Need:

MSN Messenger

MSN Plus

Things you will need to know:

as long as you can use a Cpanel you will be fine or you could allways learn as you go along!

1: install msn if you dont allready have it!

2: install msn plus!

3: go here and register with this site <http://www.drivehq.com> once registerd upload your server/bot whatever you want to spread and click publish take down the Direct link for the file so it pops up as a download straight away!

4: register at this site <http://www.1free.ws> or if you know any other sites that offer free web hosting with Cpanel then register there.

5: search google on porn sites for porn adverts and (save them as) to a folder named Newsite On Your Desktop!

6: log into your 1free account and start to put together a basic site it only has to be verry basic with a black background

(verry important a black background allows you to have much more leeway in not having too much on the page but a white background will need to be filled so make sure you have a black backround!)

7: once your done check the page and make sure its pretty real "looking"

8: you will also want to get an Error cam box (hint print screen other cam sites and edit it in paint)

Once Your Done you should Have Sumthing Like this :

(WARNING DO NOT DOWNLOAD ANYTHING FROM THIS LINK! IT IS MEANT TO ASK FOR AN

UPDATE SO WHEN THE PERVS CLICK UPDATE THAT IS UR ACTUAL INFECTION)-->  
<http://kinkycams.1free.ws/> <--(WARNING DO NOT DOWNLOAD ANYTHING FROM THIS LINK! IT  
IS MEANT TO ASK FOR AN UPDATE SO WHEN THE PERVS CLICK UPDATE THAT IS UR  
ACTUAL INFECTION)

i couldnt be botherd so you would probably do better than me!

anyway once your done with the site its time to spread!

make a fake msn account...

log on...

youw ill see a msn plus configuration box once you log on

click on customize

click on automessage

make an automessage with the link of the site you just made inside of it for exsample:

Im In A Private Show Right Now Will Be Back In 15Mins

Check Out Sum Of The Other Girls On The Site Its Tottaly Free

(LINK)

make sure you have set up the bit where you click X and all tabs close att he same time in MSN  
Plus!

it will be in the conversations tab on the same config pop up where you set up the auto message!

now all youw ill need to do is Go onto a chatsite and give out the msn accounts link example:

Hey All Add Me On MSN For FREE CAM SHOW

i can assure you you will get atleast 15 adds on msn for every time you paste that into the main  
chatroom.....

out of them 15 ads atleast 7 will click the link and out of them atleast 1 should try and open it

so if you dot he same 10 times

thats 100 people who click the link

and 10 thatw ill try and open it....

out of them 10 atleast 1-3 will be vunrable to your infection

depending on how undetectable your infection allready is...

PS. i dont need to tell you to have a girls pic up in msn so it looks legit..

another thing you dont need to talk to these faggets at all just click the add button when you get a  
request and let the horny basterds work their way towards your infection  
the longer they wait the better

any questions just pm me

or just use the html code for my site to build your own site

(WARNING) MAKE SURE YOU TAKE OUT THE LINK FOR MY SERVER AND REPLACE IT WITH  
YOUR OWN (WARNING)

I REPEAT DO NOT DOWNLOAD ANYTHING FROM THE LINK I GAVE OUT IT WAS JUST AN  
EXAMPLE SO YOU SEE IT IN ACTION!  
DOOO NOOOT CLICKKK UPDATEEEEEEEE!!!  
im starting tot hink it was a shit tut....  
hmmmm BUMP :D

STOP FUCKING LEECHING U BASTERDS 36 FUCKING VIEWS AND NOT ONE COMMENT  
WTF!!! OR U ALL TOO LAZY TO READ!! <\_< >\_> (-\_-)

**Arinex** - December 17, 2009, 11:14 pm

IMO there is better ways to spread...

**VAN1SH3D** - December 17, 2009, 11:32 pm

im just glad i got a reply LMAO well i got like 4 victims in 30 mins and das without having to waqit for  
torrents and bla bla to get heated....  
its a good way of spreading if u want to backdoor anal rape a pedo there and then.... :)

**Black Hat Jack** - December 17, 2009, 11:37 pm

-\_- this is a fail. honestly. first off. stop being an ass hole and screaming about people not  
commenting...thats gonna get you a -rep sometime. but still. this honestly is the wrost way possable  
to spread. its not cleaver, nor its it worth while. there are MUCH better ways to spread. like using a  
bot on a chat site. or posting your server/bot in a keygen/patch on some gaming/hacking(NOT  
HF!!)/warez forum(tehparadox.net maybe?)

so yeah. after your dont PMSing look at some actual useful ways to spread.

and dude. chill out. if its 30 something views and no one has commented, to damn bad.

**VAN1SH3D** - December 18, 2009, 12:16 am

jeez if i knew how to do a chat bot i would dont u think?  
jealous ass mothafucka in ur rusty old car...

**Joser** - December 18, 2009, 12:21 am

thanks.....

how did u get the cool animated video saying couldent play?

**VAN1SH3D** - December 18, 2009, 12:27 am

googles it lmao althou i was trying to find the actual link for it on google but i must have been drunk  
when i found it  
try sumthing like cam load error or sum bullkak like that...
