Thread: [Beginners Guide to iStealer and Bifrost\[Setup and making it FUD\]](#)

kutmustakurt - December 18, 2009, 12:22 am

Okay,

I have made these tutorial explaining how to use iStealer and Bifrost and make them close to FUD without using any crypters.

The iStealer video explains how to create a ftp account and use it to get logs on your ftp account.

The Bifrost tutorial shows setting up Bifrost and creating it's servers correctly.

I have also shown how to use reshacker to change the icon of your servers.

The password for downloading is : kut

Tutorial for Bifrost:

DOWNLOAD [HERE](#)

Tutorial for iStealer:

DOWNLOAD [HERE](#)

If you are having problems downloading.

Just click the link. Enter the password. You will be directed to a new page.

Scroll to the bottom of the page and Save files to PC "click here".

Screen shot : [IMG][http://i49.\[censored\].com/s5czmx.jpg](http://i49.[censored].com/s5czmx.jpg)[/IMG]

Additional Downloads :Due to a report by a member that the link I supplied is infected I have taken the link down.

I am still waiting for him to PM me and explain what went wrong, Please download the file by searching HF or any other location that you trust.

iStealer 4.0 [HERE](#)

Beginner's Guide to Crypters and Stub: <https://hackforums.net/showthread.php?tid=207201>

NOTE: Comments and Suggestions are welcomed.?

It will help me in making more tutorials but please DO NOT pm me regarding the tutorial, If you have any questions feel free to post in the thread and me or any other HF member will surely help you.

Also DO NOT ask me to put any other downloads used in the tutorial, Google them, you will find the cracked versions easily.

DISCLAIMER : The tutorials are for knowledge purposes only. Me and HF take no responsibility what you do with the acquired knowledge.

Tutorial made only for HF and should not be posted on any other site without prior consent from me or Admin.

s t o n e d - December 18, 2009, 1:36 am
downLOADING ATM

WISH ME LUCK

Ragy - December 18, 2009, 1:38 am
show us how to use apocalypse RAT :]

andiesanchez - December 18, 2009, 1:57 am
thanx for this tutor...

s t o n e d - December 18, 2009, 10:27 am
zomg
i cant say how much i love you , cause would sound gay .

but , i fucking love this tut , made my first almost fud keylogger, although i didnt use istealer or bifrost , i used other stuff but the crypting was uber .

so i bow with respect :)
any 1 can give me dl link for istealer 4.0

i only have 5.0 :s

illus1onz - December 18, 2009, 1:08 pm
Nice tut i will try this team.

kutmustakurt - December 18, 2009, 10:07 pm
@ stoned

Have you not read the thread??
I have already posted the iStealer link in the thread.
Look additional Downloads.?

Kaden - December 19, 2009, 2:08 am
Real simple, yet effective tut Kut ;)

pretty sure this will help all of the beginners out there =)

good work ;)

illus1onz - December 19, 2009, 3:05 am

do u have to create a sql database thing? I just made a folder in my folder.

kutmustakurt - December 19, 2009, 3:12 am

NO you don't have to, a folder in File manager is ok.

Hman - December 19, 2009, 3:16 am

Thanks for the Bifrost Tut. That helps a lot to get it more UD. Thanks!

kutmustakurt - December 19, 2009, 9:40 pm

No Problem. Comments and suggestions are welcome.?

RUS7Y - December 19, 2009, 9:42 pm

Nice Work . K33p I7 Up

bobsagetfullhouse - December 19, 2009, 10:21 pm

Edit: Just realized that I have to click "loader" instead of the iStealer.exe

kutmustakurt - December 21, 2009, 7:37 am

Yes, the loader is the crack and you have to click the crack to use the software.

AvishM - December 22, 2009, 12:38 am

I followed this...virus total detected it with 1/41 AV
but when you run it it is immediately detected ?

kutmustakurt - December 22, 2009, 12:44 am

(Dec 22, 2009 01:38 AM)AvishM Wrote: [\[CITE\]](#) I followed this...virus total detected it with 1/41 AV
but when you run it it is immediately detected ?

^^^ Aren't you a smart ass.

To all the members reading. after this guy please thank him for his dedication to scan the files on Virustotal after repeatably told not to in the tutorials.

That's why I never release any tutorials in public sections.

Paradoxum - December 22, 2009, 1:13 am

I guess it was safer in The Alliance after all. ?

AvishM: Everyone just loves you. Thanks.

kutmustakurt - December 22, 2009, 1:38 am

@ katgar0602

No it's not that, it's just they can't even follow the information clearly written in a notepad in a high res. video

AvishM - December 22, 2009, 7:17 am

^^' sorry... ?

Anyway thanks for the tutorial, it was of great help to me ? ?

---DMD--- - December 22, 2009, 7:26 am

Nice tutorial man! Keep it up!

Diabolo - December 22, 2009, 8:44 am

Very thanks, nice and easy.

Divine - December 24, 2009, 7:32 pm

wow, I can't believe how ignorant some ppl are.

But anyways

Thanks for the tutorial

:)

Suika - December 26, 2009, 2:56 pm

Forgive the newb question, but does the bit a few pages back mean it'll be detected now?

raahul2008 - December 28, 2009, 2:55 am

hey thanks for such a tut... i am downloading now.... you are one of my best friends in HF ... keep up the good work. ?

Big Smoke - December 28, 2009, 3:08 am

thx for sharing?

ItsJustMeFL - December 29, 2009, 4:18 pm

Excellent tut. Thx!

Wow... you rock. Thanks for your help and for the tuts.

kutmustakurt - December 30, 2009, 5:10 am

@ Suika

No, it's not.

Suika - December 30, 2009, 7:06 am

Thanks. I'll try this out, if I can get my hands on the software.

kutmustakurt - December 30, 2009, 7:08 am

Here:

<https://hackforums.net/showthread.php?tid=210755>

Suika - December 30, 2009, 12:23 pm

Thanks again.

Interestingly before binding Avast detects the server > Xenocode, but not the server > ThemServer. Not sure about after binding yet. I'm guessing that Server > ThemServer > XenoThemServer won't work? On testing, the ThemServer crashed.

NoVirusThanks has only worked one of the 6 or so times I've tried it, timing out the rest, so I've no idea what that has to say about it (and yes, I've ticked the box).

Edit: On further testing; ThemServ doesn't work for me (either crashes or does nothing) and XenoServ is detected.

TheOneDeadman - December 31, 2009, 8:04 am

Hey i can't extract befrost, some archive error...

can you reupload it to #?

Sorry, i know its a very old thread but it would be nice :D

kutmustakurt - December 31, 2009, 8:11 am

Links are just fine.

Is your AV on?

amedinho - December 31, 2009, 4:54 pm

Hi Kut, i think there is a little probleme in all of this.

When all the things are downloaded and server crypted, I saw there was a file named BifrostKut in my program files, and in the file there was Kutserver.exe and logg.dat and that is just like a bifrost server is . Is that mean you hacked me ? :(

Is that mean you hacked us ? :(

please answe me sincerly

melasus - January 2, 2010, 3:06 pm

thanks for the tutorials nice work!!

amedinho - January 5, 2010, 2:48 pm

Hi Kut, Yes in fact i DO it ^^ , i turn on the original server, so your bifrost is clean. Sorry.

But there is a probleme, i do all what in the tuto and my server is 7/24 UD, everything work just fine, the keylogger , the screen capture everything. But there is a little probleme, i don't no if that have a relation with the bifrost version, but, when i infect some one and he restart his PC, he just desepear from my infected list. :(

And i coshed the AutoStart option in Installation.

PLease answe me asap.

And thanks for everything

kutmustakurt - January 5, 2010, 10:15 pm

@ amedinho

Ok, please check the option of persistence server in the builder list.

amedinho - January 9, 2010, 5:59 pm

Ok, i didn't do that.

Thanks!

kutmustakurt - January 10, 2010, 12:51 am

No problem.

I will be happy to solve any problems you guyz may have just post in the thread and Do Not pm me.

Kaleb - January 10, 2010, 5:28 pm

GOOOOOOOOOOOOOD Job!

Message Was To Short Thats Why Theres 3 Million 3 O's

bigjesse - January 10, 2010, 5:56 pm

cool thx

22222222222shooooooooooooooooooooorrrrrrt

XX Josh XX - January 12, 2010, 2:39 pm

Nice tut ty for this but I am useing diffrent rat keep up good tut's though

odko55 - January 13, 2010, 1:05 am

what is the password

BI4Ck-5py - January 13, 2010, 5:16 am

Nice tut i will try this team. good job

deepz - January 13, 2010, 9:54 am

thanks kutmustakurt :D

kutmustakurt - January 21, 2010, 9:53 am

No problem. Have any questions/suggestions post in the thread. :Oui:

Modolla - January 22, 2010, 6:05 am

Alright, I am on Bifrost and I am just having one problem. When I click build server after I enter all of my settings I can't find the server.exe file that I am supposed to open. I'm sure its probably something stupid, but, nonetheless, I can't seem to figure it out.

kutmustakurt - January 22, 2010, 6:07 am

The server.exe should be in the same folder as the bifrost.exe?

Modolla - January 22, 2010, 6:29 am

Is it supposed to extract after the first time you run bifrost.exe? I have re-downloaded the file from the link given and all that was in there is the Bifrost.exe and once I ran the program the only thing created is the directory "Computers".. Dunno

kutmustakurt - January 22, 2010, 6:32 am

Download again and remember to switch off your AV.?

Modolla - January 22, 2010, 6:41 am

Turned off AV and Firefox auto-scan and still nothing.

Edit: I guess the one you sent me in that pm just didn't contain the server.exe. I have found another link to it posted by another administrator however so I have it now. Thanks for your help. (I am still using the file you sent me though due to their being no limit on victims ?)

XereOs - February 2, 2010, 5:22 pm

i just want to ask if i can bind the server with any file like a picture after getting the server crypted thx

ThE_CriMiNaL - February 2, 2010, 6:02 pm

thanks for sharing this nice tutorial. i find it easy to understand.

zymeth_15 - February 16, 2010, 6:16 pm

thanks it help me alot..

nerocore - February 19, 2010, 9:14 am

can anyone Post the good (not back doored) version of this following files of this tutorial?

Bifrost
Themida

I searched the forum . but couldnt able to trust on the posted links and some of the links are already died.

Please .. Help someone.. !!

kutmustakurt - February 19, 2010, 9:36 am

Search for Bifrost ,

Themida:

<https://hackforums.net/showthread.php?tid=272715>

This one is uploaded by me.

nerocore - February 19, 2010, 9:57 am

Found the mega thread of RAT .. HOPES TO BE CLEAN

<https://hackforums.net/showthread.php?tid=29493>

.. and.. thanx for the themida :)

minipunch - February 19, 2010, 4:39 pm

Awesome BiFrost tutorial. It was very easy to follow. My only problem is I can't find a full version of the Xenocode. I found one that has the (MegaX crack) thing in the name and I tried to crack it but the final .exe comes up with a trial version nag screen.

I really would love to get a link to the Xenocode download! Please!

Falconidae - February 19, 2010, 5:52 pm

Great tutorial it helped me alot, I really appreciate it, I would +rep if I could ?

nerocore - February 19, 2010, 7:44 pm

How i can connect to socks for bifrost .. i have tor network in my pc. and how i can connect it to? to use my bifrost listening and coonecting things.. no tut found yet.

adeeTM87 - February 22, 2010, 7:11 am

Hey everyone...

I've got a problem with a istealer... I've done everything like you said in your tut... But when I send a file to a victim , when they opened it .. it said like " mirc636.exe is not a valid win32 apllication... And then I don't get any password's ?

I'm using Windows 7 ultimate 64 bit....

Can anyone help?

tono25 - March 1, 2010, 8:35 am

Thank you for this very good tutorial.

ayoufa - April 27, 2010, 12:11 pm

good work dude.

:) hope it works.

kutmustakurt - August 19, 2010, 7:11 am

@ adeeTM87

Your server is getting corrupted. Try and make changes in some settings.

Jayman007 - August 21, 2010, 3:24 pm

Great TUT as always. Wish you would get your dl link to Bitfrost back up as I don't trust many other sources. Thanks for all your time on this.

k0ran - September 22, 2010, 8:22 am

Kutmustakurt, can you upload a good version of Themida which is not backdoored .

Lucid - September 22, 2010, 9:32 am

(Sep 22, 2010 08:22 AM)k0ran Wrote: [\[CITE\]](#) Kutmustakurt, can you upload a good version of Themida which is not backdoored .

Are you accusing him of posting a infected file?

arab45 - September 22, 2010, 12:23 pm

can i do this with the istealer 6.3 legends or only istealer 4.0???

k0ran - September 22, 2010, 2:45 pm

I think I hurt myself understand .I trust him. it would have been better that he post a link .

Suit® - September 24, 2010, 12:51 am

im gonna take a geez at this tut. wish me luck D:

im sure it's great

sweetman94 - October 27, 2010, 12:53 pm

hey i followed the istealer tutorial but im still getting 10 of 16 detecting my server anyone know what i could be doing wrong?

[-Anonymous-] - October 27, 2010, 3:21 pm

Thank you for the tutorial (:

A27811 - November 15, 2010, 7:37 pm

If it's not FUD anymore, i don't mind. It'll still be a good starting place to play around with binding and whatnot. Thank you very much!

Joey Tribbiani - November 20, 2010, 3:23 am

istealer doesn't have ftp suport dude ! (version 6.3)

ISTRIKEYI - December 4, 2010, 7:47 am

Im gonna try this out soon.

Floflobel - December 21, 2010, 2:53 pm

Thank's you its very dear !!

Thank's you ;) !

iforce - January 8, 2011, 8:19 am

thanks kut for this releas

oOBiboO - January 12, 2011, 9:04 am

Thank you for the TUT's , that was useful keep it up !

Nort - January 12, 2011, 12:07 pm

Nice Guide..

Good job man!
