Thread: [\[TUT\] How to make a proper signature \[TUT\]](#)

DFTCHE - January 5, 2012, 6:25 pm

Since I got bored of seeing signatures and tags without the basics, I decided to make this thread.
This tutorial is made by Zenron <http://zenron.deviantart.com/> , I don't own anything, It's just posted to help you improve.

Incredible tutorial. You must have spent hours on this. Nice job this will really help me and others.

Deal - January 6, 2012, 6:32 am

This is probably the best tutorial I've ever seen, great job.

Just one question, I know all the basics, however when I'm making, let's say a tag for an example, and I use a stock, and I want to erase a part of the stock, what would you suggest that I do? Like just use the erase tool and erase and paste the stock once again and use a part of the stock to fill the empty space, thanks!

? NEO ? - January 6, 2012, 6:42 am

Great tutorial.

You mean filling up the empty space when making a tag?

You can fill up the empty space with effects like for example smudge, C4D's, brushing, clipping masks, textures, pentool.

I can give you good examples or tuts if you want on the styles mentioned above, the ones on here are no good.

Pm me for more details.

That tut is really helpful also nice lot of information there

DFTCHE - January 15, 2012, 2:29 pm

Look for a flower pattern then adjust it in photoshop.

ibioz - January 15, 2012, 4:34 pm

Sick tutorial man. Best tutorial I've seen. I still want to learn more. Could you give me the link to your PSDs? Thanks.

DFTCHE - January 17, 2012, 12:29 am

Click the link in my sigspace for my Psd's.

Passtheword - January 18, 2012, 3:09 pm

This was very well done. I didn't read most of it, but it mentions a lot of key factors. I really liked how you added color in there, I don't think I've seen good examples of color use in a lot of other "Making tags" tutorials. Nicely done.

Arstegall - January 18, 2012, 3:48 pm

I'm glad you learned from it.

To all, this is not my tut. It's made by Zenron as stated in the OP.

[img]<http://i.minus.com/iGD7dL7x9bTYU.png>[/img]

it may be a bit empty?... idk I'm not good at photoshop..

DFTCHE - February 1, 2012, 3:05 pm

Read it again and again. It will definetly help you.

About your tag, remove the white border. Borders aren't used anymore.

Also remove your text, it distracts from your focal. Your smudge could use more detail and the lightning could be improved too.

Keep it up, you are going in the right direction.

Cybriss - February 3, 2012, 3:56 pm
