Gmail.com).
End If
If result.Contains("success":true) Then
    Return "No Steam Guard. "
End If
If result.Contains("success":false) Then
    Return "Invalid Credentials."
End If
End Function
```

Weakky. - January 7, 2012, 3:49 am

You are using a function without returning any value. Why don't you simply use a sub ? Anyway, pretty nice function ! Thanks for the share :)

StarZ - January 7, 2012, 10:24 am

I had it returning a List for my initial test.

I forgot to switch it.

Cody8295 - January 7, 2012, 11:04 am

Here's another method, gets the date as well:

```
Code Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles MyBase.Load
    ReturnNameHistory("http://steamcommunity.com/id/8295", ListView1)
End Sub

Sub ReturnNameHistory(ByVal url As String, ByVal lv As ListView)
Dim rl As New ListView.ListViewItemCollection(lv)
Dim s As String = New Net.WebClient().DownloadString(url & "/namehistory")
Dim non As Integer = System.Text.RegularExpressions.Regex.Matches(s,
System.Text.RegularExpressions.Regex.Escape("-</span>")).Count
For i As Integer = 2 To non Step 2
    rl.Add(New ListViewItem(Split(s, "-</span>")(i).Split("<")(0).Replace(ChrW(9), "")))
    rl.Item(rl.Count - 1).SubItems.Add(Split(s, """"historyDate"">")(i / 2).Split("<")(0))
Next
End Sub
```

StarZ - January 7, 2012, 11:08 am

Thanks, Cody! I'm not the best with RegEx. Thanks for your Alternative Method!

(???)?(???? - January 7, 2012, 11:10 am

Nice share. Just wondering, how do you get the code transparent?

StarZ - January 7, 2012, 11:12 am

What do you mean, (???)?(????? Cody used the [code] tags, I posted an image.

Marketplace - January 7, 2012, 11:16 am

(Jan 7, 2012 12:10 PM)(???)?(????? Wrote: [\[CITE\]](#) Nice share. Just wondering, how do you get the code transparent?

It's not transparent. The pic is darker than the HF skin

(???)?(???? - January 7, 2012, 11:18 am

Oh, it looked transparent at a glance. But what did you do to put it on that background..?

T3amworkz - January 7, 2012, 11:31 am

It's not working very correctly for me It finds a previous name but also an totally random

Cody8295 - January 7, 2012, 11:33 am

(Jan 7, 2012 12:18 PM)(???)?(????? Wrote: [\[CITE\]](#) Oh, it looked transparent at a glance. But what did you do to put it on that background..?

I made a tread a while back:

<https://hackforums.net/showthread.php?tid=1183407>

Thank you very much cody! Now to get HF's color...

StarZ - January 7, 2012, 12:00 pm

Added a Game Parser. Parses the AppID (<http://store.steampowered.com/app/> & AppID for a link to

the game itself...) And the Games Name.

Chewbaka - January 7, 2012, 12:07 pm

Here is more cleaner regex for the game grabber.

```
Code Dim r As New Regex("rgGames\[('(<id>[\d]+)'\)] = '(<game>.*)';")
```

StarZ - January 7, 2012, 12:17 pm

Yeah, I could use grouping, or just return it as a MatchCollection. But, I like to leave the end user a little to do. :)

Fake. - January 7, 2012, 1:49 pm

Oh no, you used \D - if I have a digit in my name you won't capture it :(

StarZ - January 7, 2012, 1:56 pm

Fake. Use a Wildcard. ".+" Should work...

What's the use in releasing code that's c&p-able if no one can learn from modding it to suit their needs.

Fake. - January 7, 2012, 2:01 pm

Shh, I was seeing if StarZ could correct it :O

Edit: fml, you are StarZ.

Milopeach - January 7, 2012, 2:37 pm

Code

```
((?:Jan(?:uary)?|Feb(?:ruary)?|Mar(?:ch)?|Apr(?:il)?|May|Jun(?:e)?|Jul(?:y)?|Aug(?:ust)?|Sep(?:tember)?|Sept|Oct(?:ober)?|Nov(?:ember)?|Dec(?:ember)?))(\s+)((?:[0-2]?\d{1})|([3][01]{1})))((?![\d])(.)(\s+)((?:[1]{1}\d{1}\d{1}\d{1})|([2]{1}\d{3})))((?![\d]) - Use it right, replace the "</div>" tag and you have the Creation date. It's quite messy and it isn't 100% if there is a date on the page prior to finding the creation date.
```

StarZ - January 7, 2012, 4:24 pm

Updated OP with a VAC Status Grabber & a Creation Date Grabber.

ra1d - January 7, 2012, 5:11 pm

This is freaking awesome!

I'm wondering if you could make something that selects your friends and send them all a message at the same time.

Would be cool if you could make something like that.

StarZ - January 7, 2012, 5:24 pm

You can using Steamworks. Or OpenSteamworks by VoiDeD.

StarZ - January 16, 2012, 10:14 pm

Updated 1/17/2012!

+ Steam Login using POST snippet.

+ Steam Login using GET snippet.

??? Matto ??? - January 17, 2012, 4:21 am

Very nice share, thanks a lot. Only problem is that the profile must be public for some of the functions to work, unless you are logged into the account.

iRtehLeet™ - January 17, 2012, 4:33 am

Why use Replace when you just use Regex groups?

??? Matto ??? - January 17, 2012, 7:19 am

Also, if the user has not setup a Steam community profile it will also fail

StarZ - January 17, 2012, 3:00 pm

Matto Add a simple Try/Catch.

iRtehLeet™ Last time I tried RegEx Grouping, I fucked up tremendously. And it also gives the user something to improve. ^,^

EnhancedMobi - January 18, 2012, 10:04 pm

hmmm, the get login and post login are the main features right?

Cause the steam games checker vac ban stats looks pointless o.O?

StarZ - January 18, 2012, 10:14 pm

Delta, They are NOT pointless. Not everyone here wants to make badware.

Mr. Cash - January 18, 2012, 10:21 pm

There is a point to them. Just because they cant be used to log someone doesn't mean they're pointless.

EnhancedMobi - January 19, 2012, 4:31 am

(Jan 18, 2012 11:14 PM)StarZ Wrote: [\[CITE\]](#) Delta, They are NOT pointless. Not everyone here wants to make badware.

no, i mean like, what would they be used for?

(sorry if i said something o.o.)

StarZ - January 19, 2012, 8:47 am

For obtaining the userdata of a Steam Community User.

EnhancedMobi - January 19, 2012, 12:18 pm

(Jan 19, 2012 09:47 AM)StarZ Wrote: [\[CITE\]](#) For obtaining the userdata of a Steam Community User.

ight thanks. ill try this out. :)!

StarZ - January 19, 2012, 12:31 pm

Say you have a list of valid accounts to sell, And need the info, You could make a program to cycle through them all, gather the information, and write the info to a file using mybb codes for color/URLs.

Vapid - January 20, 2012, 7:22 am

Thanks alot for the communityid to steamid conversion snippet! been looking around for that

Cabys - January 20, 2012, 8:18 am

Thanks for the Steam Snippets, great share!

Poverty - January 20, 2012, 9:28 am

Sub ReturnNameHistory

The ironic thing is it doesn't return anything and it's a sub

StarZ - January 20, 2012, 8:59 pm

Yes, Poverty, It added them to the listbox iirc.

kpjVideo - June 1, 2013, 10:00 am

hmm... I cant seem to download any of them ;(

Do you have an alternate link? All I get when I click skip ad is "Sorry, this offer is currently not available in your geographical area"

Thanks

mistoflegend - November 9, 2015, 4:25 am

couldy someone please teach how to use the get post login snippet?

i mean steam get login snippet

Earn - November 9, 2015, 9:22 pm
