Thread: [*FREE* WordPress Cloaker *RRP \\$197*](#)

SpaceboundRocketMan - January 7, 2012, 4:14 am

You can instruct WordPress Cloaker to monitor what keywords people search for to find your site. Your WordPress Cloaker cloaking software will redirect each visitor to a specific page around the web based on your settings. Send people to wherever you feel you will make the most money.

For example, do you sell green widgets through an affiliate offer? Forget about convincing the visitor to click your link. Every time someone searches for "green widgets" WPC will redirect them instantly and invisibly to any page of your choice. This alone can account for increased sales and conversions of 500% or more.
