Thread: [\[Help\]McMyAdmin Key Gen](#)

sunbinyuan - January 7, 2012, 5:09 pm

Hey everyone,

I'm trying to make a new keygen since the McMyAdmin Admin change its key hash. I used Reflector to decrypt his source and found a nice thing

[Encryption source?](#)

Can some one help me with my keygen?

Thanks[/code]

Hi there! I wanna help you out. I remember 2 months ago I was trying to see whats inside McMyAdmin. What I saw is his SSL encrypted key.

robijn - January 9, 2013, 6:22 pm

IS thare a keygen for McMyAdmin 2??

li0nsar3c00l - January 10, 2013, 9:30 am

How about putting it in ddred section too?

Maybe ill create one, lets see if i have the time

?eumonic - January 10, 2013, 9:44 am

Any chance you could upload the source or preferably the executable for us to look at? It would be easier than just one little snippet.

Yui Asuna - January 10, 2013, 10:18 am

I think they talk about that:

<http://www.mcmyadmin.com/Download.aspx>

I'll have a look.

li0nsar3c00l - January 10, 2013, 12:25 pm

please upload the whole install folder. i dont want to install it on my new system and dont have a vm at the moment

iNach0z - January 10, 2013, 12:26 pm

Lol, why make a keygen. You can just crack it using the mcmma config files. Its easy, (for player limits)
