Thread: [Black Hole Exploit kit?](#)

Kyle FYI™ - January 7, 2012, 6:32 pm

Does anyone know how to set this up? I have the cracked copy, I just don't know how to set it up. Any help?

?Mystical - January 7, 2012, 6:39 pm

You need to get ion-cube for it. And half of the bh that are cracked dont work.

Might as well rent/buy it from the coder, cracked one won't have good rates.

tayraN - January 7, 2012, 9:54 pm

When you have it working pm me with the rates please! good luck finding anyone that is able to help you!

pushl %ebp - January 7, 2012, 9:56 pm

Good luck, that's an old version and its rates are horrible. If you can't set it up, you shouldn't be messing with it.

even if you make the exploits undetectable,you will get nothing.people had the patches since 2009/2010

believe me you are just wasting your time

I agree with you 100% , he will prob get 2% after the detection rates. Another thing is he prob doesn't know that it requires samba , loncube loader , and various other things installed on his server. And plus the new one has the Rhino exploit , makes decoded version look stupid , and decoded versions are usually not fully decoded anyways.

kids asking for bhe rofl, you can pay montly for about 1200 for it.

go find a seller on a underground russia site

You are so stupid and clearly don't know what you are talking about.

It is \$1500 for ANNUAL license. Why go find a seller? Just buy it from Paunch.

On topic: I think that the version that was released on that site was not fully decoded so even though you have installed ion cube loader on your server you will still get an error because it is domain locked.

The fuck are you on about retard? It's \$1500 for a year. Think you're big referring to an underground hacking site? Bet you've never been on one in your life. You're just another kids that's heard about underground sites, and talks shit like you're someone big on one. Oh wait, it doesn't matter, this is Hackforums, you're just another member.
