Thread: [Halo Reach super boosting service discounts and free offers inside](#)

EDIT OOPS wrong place >.< posting elsewhere. Already closed the thread.

I'm thinking of selling these as follows

1 million 5 bucks  
5 million for 20 dollars  
10 million for 39 dollars  
15 million for 55  
20 million for 75 dollars.

L33ts and Ub3rs

I'm offering a free million to the first l33t/Ub3r to post below.

Any member to order anything will get a million cR free of charge. This will go on for the first three members.

I can also run a silver account up to the amount you want if you don't trust me with any password or sensitive information.

Just think about it. Inheritor is the highest rank possible in Halo Reach, the only one with access to the Haunted helmet. This rank is so exclusive less than 30 people have it. More people have double letter gamertags than the amount of people who have this rank.

How it would work: If you choose to have me rank up your main/primary account I would arrange a time when you aren't on to recover your account. Thanks to the new update you won't have to recover it, merely sign in when I'm done. This isn't a hack or a mod, just a lot of boosting. You won't get reset or banned for this as it's perfectly legal. It's also time consuming unfortunately so I would need your account for 3-6 hours depending on how high of a rank you want to be, and if you're shooting for inheritor that's an all day thing for me. Because no one else can help me with this and it takes so long for me and I don't want it to get too saturated I have raised prices. The sellback rating is probably good for these accounts though seeing as the rarity of them is well known.

I'm trusted and have dealt with recovering people's accounts from back in halo 3 when a Recon helmet exploit was found. All of them got this service at no charge, I just didn't have anything to do that day and decide oh what the heck I might as well help a few people out.

So that's essentially what I'm doing here. Only I need money now. A lot of it. And fast.

PM me for more details. If you want a silver account I'd either like for you to create it or for you to tell me what you'd like the gamertag to be. I take payments upfront and accept service payments which can be charged back through paypal. I do this as to protect the buyer. Any payments over 30 dollars can be split in half, as in, I get half when I start and when I get halfway done you pay me the second half. I don't know what this does for you but I hear people like useless options :P

I won't steal your account. But seeing as it's going to be quite rare I'd expect you follow this guide to making your account as close to being unjackable as possible.

Sorry if this is dumb or has things wrong with it, I haven't slept for a few days.
