Hay guys, I have about 8000 nice fonts & I am feeling like sharing those with you.

Download: [Click Here!](#)

Size: 205 MB

I would give a scan report, but since these are all .RAR & .TTF files (NOT EXE), there's no chance of viruses.

Spoiler ([Click to View](#))

I took about 3 hour to upload as my internet's upload speed is very low. -_-

So, Saying a little Thank You is really appreciated... ?

Ok, Starting off, the download page at file-factory for non premium users is as confusing as c++ to a 5 year old, it took me literally 5 minutes to figure out which was the actual download link and which was an ad....

now for the fonts, even though theres only 26 unique fonts, theres still a large variety! thanks !

1. Never knew, downloading from Filefactory was that hard, but really I couldn't find any good file host who'd give me that space of 205 MB...

2. only 26 ? Did you really check all 8013 of them? wow! That was fast lol. O_O

There was 8013 font files, or around that number - but there was only 26 font types, all were just different sizes and types.
