Thread: [Steam Account Checker\[Preview\]](#)

Milopeach - January 9, 2012, 4:54 am

I'm looking for ideas on what to add to my steam account checker that may be free/for sale sometime soon.

Features:

-Checks each account for: (Screenshot #1)Games

Creation Date

Steam ID

Community ID

VAC Status

Steam Guard Status (If Active, View Screen #2)

Games

Email (Only works if Steam Guard is Active - ?)

-Convert between SteamID and CommunityID

-Scrape usernames from forum

-Import Proxies. (Currently Proxies and Web Requests don't work for me, If you can help me fix this then I'd repay you somehow)

Coming soon:

-Steam, Bruteforcer (I am currently attempting to use the Cuda pack from NVIDIA - If you have experience with setting this up then please PM me.)

-Statistics

-Delimiter Options (Usually the seperator. i.e. ":")

-Friends list scaper

-PC Client Login (If account is successful and you wan in. :P)

-Much, Much more!

Note: Some of these are much easier done than others so they might be added sooner rather than later.

I'll hop on TV when I'm on MSN if you'd like, very easy to implement just use the .Proxy property

Request.Proxy = New WebProxy("IP:PORT")

Also does this login using webrequests or is this data available on the public profile?

Milopeach - January 9, 2012, 5:15 am

Logins via Requests.

And yes, Teamviewer would be highly appreciated. :)

Are you willing to release this for public or would be selling them?

Chewbaka - January 9, 2012, 5:27 am

I love how in the .NET section, when someone posts one thing about something new, within a couple days, there are bunch of more threads about the same thing. If you are going to make this into a cracker, make the ListView have less columns.

Go outside mayne. ?

Were you intentionally suppose to fuck up the grammar of that sentence? :P

I made a tool similar to this a while ago, Only for single accounts though. I made it for users who Sell Steam Accounts.

When I posted a thread for my 5 Digit, That template was generated by my tool. Also, Good luck OP.

IIRC, To Login from it Launch Steam.exe with the "-username Userhere -password passhere" params.

ra1d - January 9, 2012, 10:57 pm

Looks pretty good.

Keep up the good work mate.

OffCode - June 30, 2019, 1:19 am

That looks good!

Good luck for your project :)

+1. Back when people wanted to learn...

Raddify - June 30, 2019, 8:31 pm

very old thread holy whoa (still a dope concept, wonder if it would work still)

SIM-3991524 - July 1, 2019, 6:31 pm

is it multithreaded/async?
