May I note that I own the \$9 ones from deal extreme, and they look NOTHING like the real ones

2 chords, no beats by dre on the top, they brake as soon as you put a litle presure on the headband.. also sound is shit, for a \$9 its pretty nice, but compared to real beats thats an absolute FAIL (:

You should check eForChina if you want beats.

Against the rules to take about fake things, back then we had a huge discussion on fake beats and

now it's all gone.

Grimace - April 2, 2013, 2:20 pm

Why bother getting fake beats? If you get called out you'll be embarrassed and for the money you spend on fake 50-60 bucks you can get actually good sounding ear buds and not fake beats from China.
