The Basics of SQLi v1.0.0

For those who complain about the PDF having a password on it, please look at the file called "The Basics of SQLi v1.0.0 - Pass.txt" before complaining.

About the Tutorial

Every person has their own way of doing things.

Instead of you going through the multiple tutorials that is on HackForum, I have done so myself and compacted it into this one tutorial to make it easier for your learning.

This tutorial goes through the most common way to perform SQLi.

This tutorial teaches you the basics of SQLi and it includes some examples to make your learning much easier.

Preview

This is only bits and pieces of the whole tutorial.

(Apr 23, 2012 11:47 PM)texeon Wrote: [\[CITE\]](#) Great tutorial!

Very well written and easy to understand.

I know pretty much all this information already, the only thing I didn't know was the way you retrieved information, like `group_concat(username,0x3a,password),4,5,6,7 dpadmin--`

you use dpadmin instead of "from dpadmin", I guess it will work, never tried.

Also I didn't know the way you retrieved the database name/s, really cool.

To everyone who is a beginner, a must read, very straightforward.

What could be improved:

Maybe adding photos

Adding text examples of what the output may be when you do something, e.g:

`UNION SELECT 1,2,3,group_concat(table_name),5,6,7 from information_schema.tables where table_schema=database()--`

You could show that it will show tables, that could include, admin, photos, gallery, settings, etc.

Make a video of you using your technique in a real situation, best examples would also show how to decrypt passwords by googling them or finding hashes.

Hope this helped, good job, I feel like writing an Ebook.

Thanks for giving me a copy!

I have sent all three of you a copy. If you have any questions, feel free to ask.

For everyone else, to get it, you must post and PM me. I don't care if you can't PM... learn to not leech. Go around the forums, find something interested and interact with the community. There are plenty of interesting topics around the forums.

The Basics of SQLi

About the Tutorial

Every person has their own way of doing things.

Instead of you going through the multiple tutorials that is on HackForum, I have done so myself and compacted it into this one tutorial to make it easier for your learning.

This tutorial goes through the most common way to perform SQLi.

This tutorial teaches you the basics of SQLi and it includes some examples to make your learning much easier.

This is only bits and pieces of the whole tutorial.

Credit

I would like to thank the many HQ members of HackForum who were kind enough to write tutorial(s) of their own.

Without those tutorials, I would not have been able to learn about SQLi, nor would I have been able to write this tutorial.

How can I get this tutorial?

To get this tutorial, you must post here and PM me. Click [here](#) to PM me.

The reason I am not posting the link here is because if the link is ever not working, I will not be able to edit the thread.

I am a regular member, which means I can not edit my thread after a certain time.

Feedback

Please post all feedback about this tutorial, so that I can improve it.

Feel free to contribute any way you can. If I made a mistake, feel free to correct me.

Could you PM it me?

Thanks,

The Basics of SQLi

About the Tutorial

Every person has their own way of doing things.

Instead of you going through the multiple tutorials that is on HackForum, I have done so myself and compacted it into this one tutorial to make it easier for your learning.

This tutorial goes through the most common way to perform SQLi.

This tutorial teaches you the basics of SQLi and it includes some examples to make your learning much easier.

Preview

This is only bits and pieces of the whole tutorial.

Credit

I would like to thank the many HQ members of HackForum who were kind enough to write tutorial(s) of their own.

Without those tutorials, I would not have been able to learn about SQLi, nor would I have been able to write this tutorial.

How can I get this tutorial?

To get this tutorial, you must post here and PM me. Click [here](#) to PM me.

The reason I am not posting the link here is because if the link is ever not working, I will not be able to edit the thread.

I am a regular member, which means I can not edit my thread after a certain time.

Feedback

Please post all feedback about this tutorial, so that I can improve it.

Feel free to contribute any way you can. If I made a mistake, feel free to correct me.

Just sent a copy out to every that PMed me. Enjoy and hope it helps.

LookAt - February 7, 2012, 12:52 am

Hi, can you send me a copy please, thanks in advance.

tigerz09 - February 7, 2012, 1:51 am

Hey, can you please PM the link!

Thanks in advance

intruder7008 - February 7, 2012, 3:35 am

i want this copy of sql injection.. thanking you!!!

BananaDodoo - February 7, 2012, 3:43 am

This seems really nice, I would really love too see what's so special about yours compared to others.

Big plus on making it a pdf! ?

fobber - February 7, 2012, 4:49 am

Sent you a PM already, but I forgot to post here, my bad.

I'd like to have tutorial if possible. I'm already able to do a little little little bit of SQLInection, but not much. So I'd like to learn more.

I sometimes use Havij, but I by far prefer to do it manually!:)

?rtificial - February 7, 2012, 8:02 am

I have sent a copy out to everyone that has PMed me. Hope to hear your feedbacks.

fobber - February 7, 2012, 8:17 am

Okay, I've just begun the reading.

First of all, it seems easy to understand. Some of he text is a bit hard to read, since there is some "DPA" watermarks, that touches the text. Since their colors are almost identical, the text is hard to read.

Anyway. I've some problems with "Findind the Numbers of Columns".

I'm trying to inject this site: <http://udlejning.1st-sound.dk/index.php?p=rental&subject=rigging>, I know that it's vulnerable, since if I add a ', then I get a SQL error. And also I tested with Havij. Okay, so I go to <http://udlejning.1st-sound.dk/index.php?p=rental&subject=rigging>', and it tells me, that it has a SQL syntax error. Great! Now I need to find the number of columns, so I start easy of, with a simple <http://udlejning.1st-sound.dk/index.php?p=rental&subject=rigging order by 1>, but now it tells me Det valgte emne eksistere ikke. (The chosen element doesn't exist.)

Am I doing something wrong?

Thanks in advance.

Oh yeah, also, I was able to do this <http://udlejning.1st-sound.dk/index.php?p=rental&subject=light or 'a'='a>, so obviously the site IS vulnerable.. For sure..

Woohoo.. I was able to do it on another website, one that used integer, instead of a string. I know that it isn't anything big, but I've never really done it all myself (Okay, I still got some help from the PDF file). So I'm kinda proud. Hehe.

This is the results I got, if anyone is interested:

Thanks!

fobber - February 8, 2012, 1:11 am

I'm not referring to a typo. I'm referring to I'm having some problems with using this, on sites that

expects a string instead of an integer.

Like this: <http://udlejning.1st-sound.dk/index.php?p=rental&subject=rigging> - When I do the union select thing, it tells me that the product doesn't exist, instead of giving me a SQL error.

Yes, this method is for databases higher than 5, so if it is lower, this tutorial will not entirely work. Thank you for catching the error. I have updated the tutorial and will release that once I find more ways of improving it. So keep giving me more feedback on it.

Sasori - March 6, 2012, 9:02 pm

texeon - April 23, 2012, 11:47 pm

Great tutorial!

Very well written and easy to understand.

I know pretty much all this information already, the only thing I didn't know was the way you retrieved information, like `group_concat(username,0x3a,password),4,5,6,7 dpadmin--`

you use dpadmin instead of "from dpadmin", I guess it will work, never tried.

Also I didn't know the way you retrieved the database name/s, really cool.

To everyone who is a beginner, a must read, very straightforward.

What could be improved:

Maybe adding photos

Adding text examples of what the output may be when you do something, e.g:

```
UNION SELECT 1,2,3,group_concat(table_name),5,6,7 from information_schema.tables where table_schema=database()--
```

You could show that it will show tables, that could include, admin, photos, gallery, settings, etc.

Make a video of you using your technique in a real situation, best examples would also show how to decrypt passwords by googling them or finding hashes.

Hope this helped, good job, I feel like writing an Ebook.

Thanks for giving me a copy!

(May 1, 2012 12:43 PM)nanotech31 Wrote: [\[CITE\]](#) I really don't believe in begging so you can keep you tuts, I will learn from around the forum but 1 question though

I just need to know why you have decided to ignore my request? is it my post history or is me

asking thecorrosiveone for a proposal as I was new here, you know you can save me a lot of headache just letting me know what I have done on HF or maybe I'm just paranoid.

but for your tuts, pls keep it cos if you don't want to share with me then there is no point asking for a 3rd time n be ignored and I doubt if your tut will get me the info I'm hunting for .

What next a ban on my account?

I did not ignore anyone. If you sent me a PM, but did not post, I will reply. If you posted and sent me a PM, I will send you the eBook. If you only posted, I will ignore you. I share it with anyone who is capable of reading. Reading is not hard. If you cannot read the thread, what are the chances you can read the eBook? I can't ban you... why would I?

The Basics of SQLi

For those who complain about the PDF having a password on it, please look at the file called "The Basics of SQLi v1.0.0 - Pass.txt" before complaining.

About the Tutorial

Every person has their own way of doing things.

Instead of you going through the multiple tutorials that is on HackForum, I have done so myself and compacted it into this one tutorial to make it easier for your learning.

This tutorial goes through the most common way to perform SQLi.

This tutorial teaches you the basics of SQLi and it includes some examples to make your learning much easier.

Credit

I would like to thank the many HQ members of HackForum who were kind enough to write tutorial(s) of their own.

Without those tutorials, I would not have been able to learn about SQLi, nor would I have been able to write this tutorial.

How can I get this tutorial?

To get this tutorial, you must post here and PM me. Click [here](#) to PM me.

Feedback

Please post all feedback about this tutorial, so that I can improve it.

Feel free to contribute any way you can. If I made a mistake, feel free to correct me.

Vouches/Comments

Sorry if I missed any. Just PM me and I will fix that.

I have sent a copy to the 3 of you.

I made small minor changes to the eBook a while ago, but was to lazy to make into a pdf file and upload it. I have finally done it. The new thread can be found here:
